

The Illustrated Man Flamingo Modern Classics

Ray Bradbury brings wonders alive. For this peerless American storyteller, the most bewitching force in the universe is human nature. In these eighteen startling tales unfolding across a canvas of tattooed skin, living cities take their vengeance, technology awakens the most primal natural instincts, and dreams are carried aloft in junkyard rockets. Provocative and powerful, "The Illustrated Man" is a kaleidoscopic blending of magic, imagination, and truth--as exhilarating as interplanetary travel, as maddening as a walk in a million-year rain, and as comforting as simple, familiar rituals on the last night of the world.

The Illustrated Man Harper Perennial

This book is a study of contemporary spirituality as it is practiced in the world today, characterized by its secular and inclusive nature, and applied to art and art education. It identifies the issues facing a formal introduction of contemporary spiritual concepts into a secular and multicultural arts educational environment. Lander begins by separating the notion of "the spiritual" from the study of organized religions. She uses examples of art from different cultures in contemporary spiritual systems, making the study a reference book for contemporary spirituality and spirituality in art education, with usable definitions and practical examples suitable for scholars in art and visual studies, art education, and contemporary spirituality.

Includes words and phrases from United States history and from such current subcultures as technology and the Internet, the media, recent immigrants, and fashion.

It's the week before Hallowe'en, and Cooger and Dark's Pandemonium Shadow Show has come to Green Town, Illinois. The siren song of the calliope entices all with promises of youth regained and dreams fulfilled . . . And as two boys trembling on the brink of manhood set out to explore the mysteries of the dark carnival's smoke, mazes and mirrors, they will also discover the true price of innermost wishes . . .

While there is no shortage of books on the environment there are few introductory texts that outline the social theory that informs human geographical approaches to the interactions between ecology and society. Students arriving at university often lack the understanding of history, economics, politics, sociology and philosophy that contemporary human geography requires. *Environments in a Changing World* addresses this deficit, providing foundation knowledge in a form that is accessible to first year students and applied to the understanding of both contemporary environmental issues and the challenge of sustainability. Students are challenged to develop and defend their own ethical and political positions on sustainability and respond to the need for new forms of ecological citizenship.

Lucidly written and encompassing an enormous historical expanse, "Masks" uncovers the changing ways we have tried to understand the elusive and often illusory nature of racial identity in Western thought and literature.

Explores the state of health care in relation to African Americans from the early days of the U.S. to the present, covering topics such as the insurance industry, social and economic factors, eugenics, and medical experiments.

Bertie used to have a lot of dirty habits, but with help from his family he has learned not to do such things as licking the dog or eating candy off the floor.

The study of religion and popular culture is an increasingly significant area of scholarly inquiry. Surprisingly, however, Christopher Partridge's *The Lyre of Orpheus* is the first general introduction to the subject of religion and popular music. His aim in this book is to introduce a range of theoretical and methodological perspectives to be used in the study of religion and popular music and popular music subcultures. He addresses a range of issues from postcolonialism to postmodernism, from sex to drugs, from violence to the demonic, and from misogyny to

the flora and fauna of China. Yet despite the importance and extent of this scientific activity, it has been entirely neglected by historians of science. This book is the first comprehensive study on this topic. In a series of vivid chapters, Fa-ti Fan examines the research of British naturalists in China in relation to the history of natural history, of empire, and of Sino-Western relations. The author gives a panoramic view of how the British naturalists and the Chinese explored, studied, and represented China's natural world in the social and cultural environment of Qing China. Using the example of British naturalists in China, the author argues for reinterpreting the history of natural history, by including neglected historical actors, intellectual traditions, and cultural practices. His approach moves beyond viewing the history of science and empire within European history and considers the exchange of ideas, aesthetic tastes, material culture, and plants and animals in local and global contexts. This compelling book provides an innovative framework for understanding the formation of scientific practice and knowledge in cultural encounters.

Fa-ti Fan's study of the encounter between the British culture of the naturalist and the Chinese culture of the Qing is both a delight and a revelation. The topic has scarcely been addressed by historians of science, and this work fills important gaps in our knowledge of British scientific practice in a noncolonial context and of Chinese reactions to Western science in the eighteenth and nineteenth centuries. In addition to the culture of Victorian naturalists and Sinology, Fan shows an admirable grasp of visual representation in science, Chinese taxonomic schemes, Chinese export art, British imperial scholarship, and journeys of exploration. His treatment of the China trade and descriptions of Chinese markets and nurseries are especially welcome. I learned a great deal, and I strongly recommend this book. --Philip Rehbock, author of *Philosophical Naturalists: Themes in Early Nineteenth-Century British Biology*

By focusing on the experiences of British naturalists in China during a time when it was gradually being opened up to foreign influences, Fan makes at least two important contributions to history of science: He gives us an authoritative study of British naturalists in China (as far as I know the only one of its kind), and he forces us to rethink some of our categories for doing history of science, including how we conceive of the relationship between science and imperialism, and between Western naturalist and native. Fan's scholarship is meticulous, with careful attention to detail, and his prose is clear, controlled, and succinct. --Bernard Lightman, editor of *Victorian Science in Context*
