Feng shui (the art of positioning) and Chinese astrology (the science of auspicious scheduling) have always captured western imagination, but in the process, these classical disciplines have been diluted by popular culture, sometimes beyond recognition. Now, an accomplished scholar of Chinese language, literature, and philosophy restores them in this remarkable volume, the first and only authentic translation of the original Chinese treatise on the Art of Scheduling and Positioning. Intellectually accurate and true to the original work, yet written to be accessible to the general reader as well as the specialist, the Imperial Guide reveals the organic connection between feng shui and astrology - a link overlooked by most other books on these two arts and illuminates the most complex aspects of feng shui and astrology theory in accessible language and lucid imagery. This guide introduces the essential concepts of Chinese cosmology: yin and yang, the five processes, the ten heavenly stems, the twelve earthly branches, the twenty-four seasonal nodes, and the sixty-four

"The Three Kingdoms gives us The Iliad of China. First of the five great works of traditional prose fiction, this master narrative transforms history into epic and has thereby educated and entertained readers of five centuries with unforgettable exemplars of martial and civic virtue, of personal fidelity and political treachery. Moss Roberts's translation, the first complete rendering in English, is one of surpassing excellence and impeccable scholarship. It should delight and captivate Western readers for many more years to come."—Anthony C. Yu, University of Chicago "Moss Roberts's elegant and powerful translation of China's most important historical romance has a stunning directness that aptly conveys the dramatic boldness of the original episodic narrative. English readers may now finally understand why this 15th-century novel so strategically shaped the political world-view of generations of Chinese."—Frederic Wakeman, Director of the Institute of East Asian Studies, University of California, Berkeley

China, the world's oldest and most populous state, remains an enigma to most people in the West, even at a time when that country is playing an increasingly prominent role on the international stage. These efforts are ongoing and of great importance. In this study of desire in Late Imperial China, Martin W. Huang argues that the development of traditional Chinese fiction as a narrative genre was closely related to changes in conceptions of the fundamental nature of desire. He further suggests that the rise of vernacular fiction during the late Ming dynasty should be studied in the context of contemporary debates on desire, along with the new and complex views that emerged from those debates. *Desire and Fictional Narrative in Late Imperial China* shows that the obsession of authors with individual desire is an essential quality that defines traditional Chinese fiction as a narrative genre. Thus the maturation of the genre can best be appreciated in terms of its increasingly sophisticated exploration of
