????????????????????10%??

Discusses global trading covering such topics as investments, bonds, futures, currency markets, global mutual funds, and forecasting.

Praise for The Index Trading Course "George and Tom apply their considerable options trading and teaching expertise to the arena of broad-based and sector indices. Index options traders will find the techniques, systems, and strategies invaluable-and so will those who aren't yet index traders, but want to learn to be." —Larry McMillan, President, McMillan Analysis Corporation author, Profit with Options "I've known both George and Tom for many years and have seen firsthand how they both can captivate a room with their knowledge of options trading and vibrant personalities. Now they have managed to capture that magic in this easy-to-understand how-to manual on trading index options." —David Kalt, CEO, optionsXpress Holdings Inc., www.optionsXpress.com "I traded in the OEX pit for almost twenty years and I can't believe how well George and Tom nailed the core strategies and trading intricacies of index products. Nice job!" —Tom Sosnoff, CEO, thinkorswim, Inc. "Education has been a major factor in the explosive growth in the options markets. Once again, Fontanills and Gentile have delivered as leaders in options education with The Index Trading Course and The Index Trading Course Workbook. These books provide a disciplined approach to trading index and ETF options through risk management." —Christopher Larkin, Vice President, U.S. Retail Brokerage E*TRADE Securities LLC (www.etrade.com/options) "I found The Index Trading Course and The Index Trading Course Workbook to be filled with useful and practical information on options, ETFs, the market, and trading in general. They explain the unique characteristics of these instruments in understandable terms and should provide a good foundation to those interested in trading index options and options on ETFs. The quizzes and media assignments in the Workbook are wonderful learning tools that help reinforce the information and concepts presented in the main book." —Debra L. Peters, The Options Institute

Oliver Velez, co-founder of *Pristine.com* and current CEO of *Velez Capital Management*, is renowned for his effective trading skills and specialized knowledge in technical analysis. His educational seminars are sought after by traders and often attended multiple times to extract every piece of wisdom from his presentations. Now, one of his most legendary sessions jumps from the screen into your hands in this coursebook of Velez's famed *Swing Trading* techniques. With detailed text and a vivid 90-minute DVD, you'll explore and master a highly profitable niche that exploits the two- to five-day holding period – a method too brief for large institutions, too lengthy for day traders, yet perfectly suited for individual investors with a mind toward success. In his captivating, high-energy style, Velez shows you how to: Spot opportunities using proven swing trading criteria; Define periods of market uncertainty and make the right moves; Discover key set-ups and effectively use moving averages; Read charts successfully, especially Japanese *Candlesticks*; Win by going against conventional trading wisdom; Understand and profit from understanding market psychology. Only in this book/DVD course combination will you be able to fully absorb the wealth of material that Oliver Velez is set up to offer. The easy-to-understand definitions and eye-opening self-tests bring the information to you and the power to your trades. Don't end up on the wrong side of the market. *Swing Trading* is the perfect tool for the investor who wants to understand the forces that shape the trading arena. This presentation has been viewed live and on DVD by hundreds of thousands of traders. Now you can use this course to rise above the impulse of novice traders. It's the best way to master the cycles and win consistent

profits.

The Index Trading Course Wiley

A timely guide to profiting in markets dominated by high frequency trading and other computer driven strategies Strategies employing complex computer algorithms, and often utilizing high frequency trading tactics, have placed individual traders at a significant disadvantage in today's financial markets. It's been estimated that high-frequency traders—one form of computerized trading—accounts for more than half of each day's total equity market trades. In this environment, individual traders need to learn new techniques that can help them navigate modern markets and avoid being whipsawed by larger, institutional players. *Trading the Measured Move* offers a blueprint for profiting from the price waves created by computer-driven algorithmic and high-frequency trading strategies. The core of author David Halsey's approach is a novel application of Fibonacci retracements, which he uses to set price targets and low-risk entry points. When properly applied, it allows traders to gauge market sentiment, recognize institutional participation at specific support and resistance levels, and differentiate between short-term and long-term trades at various price points in the market. Provides guidance for individual traders who fear they can't compete in today's high-frequency dominated markets Outlines specific trade set ups, including opening gap strategies, breakouts and failed breakout strategies, range trading strategies, and pivot trading strategies Reveals how to escape institutional strategies designed to profit from slower-moving market participants Engaging and informative, *Trading the Measured Move* will provide you with a new perspective, and new strategies, to successfully navigate today's computer driven financial markets

The new edition of the definitive reference to trading systems—expanded and thoroughly updated. Professional and individual traders have relied on *Trading Systems and Methods* for over three decades. Acclaimed trading systems expert Perry Kaufman provides complete, authoritative information on proven indicators, programs, systems, and algorithms. Now in its sixth edition, this respected book continues to provide readers with the knowledge required to develop or select the trading programs best suited for their needs. In-depth discussions of basic mathematical and statistical concepts instruct readers on how much data to use, how to create an index, how to determine probabilities, and how best to test your ideas. These technical tools and indicators help readers

identify trends, momentum, and patterns, while an analytical framework enables comparisons of systematic methods and techniques. This updated, fully-revised edition offers new examples using stocks, ETFs and futures, and provides expanded coverage of arbitrage, high frequency trading, and sophisticated risk management models. More programs and strategies have been added, such as Artificial Intelligence techniques and Game Theory approaches to trading. Offering a complete array of practical, user-ready tools, this invaluable resource: Offers comprehensive revisions and additional mathematical and statistical tools, trading systems, and examples of current market situations Explains basic mathematical and statistical concepts with accompanying code Includes new Excel spreadsheets with genetic algorithms, TradeStation code, MetaStock code, and more Provides access to a companion website packed with supplemental materials Trading Systems and Methods is an indispensable reference on trading systems, as well as system design and methods for professional and individual active traders, money managers, trading systems developers.

An Introduction to Technical Analysis from One of the Top Names in the Business "Essential Technical Analysis is a highly valued resource for technical traders. The importance of comprehensive and well-researched market behaviors, indicators, and systems were well expressed graphically with many examples. No technical analyst should be without this book. Stevens's book could become another classic." -Suri Duddella, President of siXer.cOm, inc. (Forbes magazine's "Best of the Web" in Technical Analysis Category) "Essential Technical Analysis will give the new student of technical analysis a good overview of both classical chart patterns and a myriad of technical indicators, but so will many other texts. What sets this volume apart is that it presents the subject in the context of real-world trading situations, not idealized well-chosen examples. Books on technical analysis, especially those aimed at novices, are typically filled with charts in which the selected patterns are both unambiguous and work perfectly. As Leigh Stevens recognizes and confronts, however, the real world is a far more sloppy place: charts may often contain conflicting indicators, and patterns don't always work as described. Reading Essential Technical Analysis is like sitting beside a veteran technical analyst and having him describe his methods and market experiences." -Jack Schwager, author of Market Wizards, Stock Market Wizards, and Schwager on Futures "Leigh Stevens's depth of experience, acquired over many years, has generated a deep understanding of, and commitment to, the discipline of technical analysis. He is also one of those rare individuals who have both the ability to convey the essence of his ideas in a wonderfully simple and straightforward way and through the use of personal anecdotes and experiences. There are not many people around who can both walk the walk and talk the talk." -Tony Plummer, author of Forecasting Financial Markets, Director of Rhombus Research Ltd., and former Director of Hambros Bank Ltd. and Hambros Investment Management PLC "Leigh Stevens brings his considerable years of experience to this project. He has crafted a real-world book on technical analysis that gives you the benefit of his trials and errors as well as 120 years of observations and market wisdom from Charles Dow to the latest indicators and approaches. Investors who suffered from the bursting of the technology bubble in 1999 and 2000 should read Essential Technical Analysis from cover to cover and learn to apply the lessons to the next market cycle." -Bruce M. Kamich, CMT, past President of the Market Technicians Association and Adjunct Professor of

New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.

An indispensable, hands-on companion to The Index Trading Course In The Index Trading Course, financial experts George Fontanills and Tom Gentile provide an in-depth look at the tools and techniques used to trade in this profitable market. Now, in The Index Trading Course Workbook, Fontanills and Gentile offer a wealth of practical exercises that will help further your understanding of index trading, as well as test and apply what you've learned before you take one step into the real markets—where time and money are luxuries you can't afford to lose. The media assignments found in each chapter are especially useful. They'll help you put the material you've read into action by prompting you to access some of the extensive media tools currently available to all traders—including financial papers, magazines, the Internet, and television. This hands-on companion to The Index Trading Course also includes a complete answer key for every multiple-choice question and covers a wide range of issues related to this discipline such as: Core stock market indexes along with the sector offerings from a variety of financial entities Actively traded index products, including exchange traded funds (ETFs), index options, and ETF options Options strategies used for different trends and volatility situations Indicators and systems Trade adjustments The art of risk management

Use this invaluable tool to gain a competitive edge and avert bad investment decisions. Well-known options strategist and instructor George Fontanills has updated his time-tested and bestselling book, The Options Course. The new edition improves and expands upon the original to help you avoid some common and costly options mistakes. The systematic, step-by-step approach, covers everything from basic concepts to sophisticated techniques and is designed for investors at all levels of experience.

With Mayo's INVESTMENTS: AN INTRODUCTION, 11E, introduce students to today's most important investment topics from the perspective of an individual financial planner. This edition provides an inviting, comprehensive approach to investments—from the fundamentals students need to master for success on the CFP exam to more advanced topics. This edition is an ideal, understandable choice for business students as well as finance majors. Concepts build on one another in this edition's updated Financial Advisor's Investment Case at the end of each chapter—providing a strong overview of today's most pertinent investment opportunities and challenges. Throughout each chapter, this edition clearly emphasizes how students can apply what they're learning to make solid investment decisions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

An introduction to the commodities market shows readers how to successfully invest in futures, stocks, stock indices, and options, explaining how the commodities market works, how to identify and track investment opportunities, the fundamentals of money management, how to find the right broker, and more. Original.
