

## The Interior Design Reference Specification Book Everything Interior Designers Need To Know Every Day Paperback Common

From the history of interior design to professional development, this guide completely covers the process of interior design - the development of a design concept, analysis of built spaces, programming and functional relationships, space planning, and design development presentations.

DIVA comprehensive handbook of all the crucial information interior designers need to know on a daily basis. In the world of interior design, thousands of bits of crucial information are scattered across a wide array of sources. Color, Space, and Style collects the information essential to planning and executing interiors projects of all shapes and sizes, and distills it in a format that is as easy to use as it is to carry. Section 1, Fundamentals, provides a step-by-step overview of an interiors project, describing the scope of professional services, the project schedule, and the design and presentation tools used by designers. Section 2, Space, examines ways of composing rooms as spatial environments while speaking to functional and life-safety concerns. Section 3, Surface, identifies options in color, material, texture, and pattern, while addressing maintenance and performance issues. Section 4, Environments, looks at aspects of interior design that help create a specific mood or character, such as natural and artificial lighting, sound and smell. Section 5, Elements, describes the selection and specification of furniture and fixtures, as well as other components essential to an interior environment, such as artwork and accessories. Lastly, section 6, Resources, gathers a wealth of useful data, from sustainability guidelines to online sources for interiors-related research. Throughout Color, Space, and Style appear interviews with top practitioners drawn from across the field of interior design./div

This handy, one-stop answer book helps interior designers, decorators and architects come up with fast, on-the-spot design solutions by putting the latest codes and standards, costs, materials and specification information at their fingertips. \* Materials and specification checklists for fast and easy interior design decisions and solutions \* Content organization follows the logical progression of the design process \* Updated unit costs for furnishings, fixtures, and other interior components and systems

Guides students and professionals through the interior design process, from planning to execution, in an updated edition that includes new information on project management, building systems and codes, and lighting.

A new and innovative approach to both designing and analyzing proposed and existing facilities for ADAAG compliance With its emphasis on physical accessibility, the Americans with Disabilities Act Accessibility Guidelines (ADAAG) have far-reaching implications for the design or renovation of virtually all public-use buildings and sites in the United States. Yet there has been little guidance on how to design and review the drawings and specifications of an existing or proposed facility to assess its ADAAG compliance. This invaluable reference provides such guidance at last for architects, interior designers, landscape architects, engineers, builders, planners, facilities managers, specification writers, construction code officials, teachers, and students, as well as individuals concerned with access issues. The authors present the ADAAG in an easily understandable format grouping ADAAG criteria into detailed checklists for specific interior and exterior spaces such as offices, classrooms, retail shops, restaurants, restrooms, and parking garages. This sensible approach makes the review process of any room, building, or site highly manageable. For additional convenience, the presentation parallels the design process from schematic design through construction documents, including detail, schedule, and specification review. Complete with review forms, checklists, graphics, and other information necessary to ensure ADAAG compliance, this thorough guide will prove invaluable to everyone involved with the design or retrofit of accessible buildings and sites.

CONSTRUCTION DRAWINGS AND DETAILS FOR INTERIORS DISCOVER FOUNDATIONAL CONCEPTS AND THE LATEST DEVELOPMENTS IN INTERIOR CONSTRUCTION DOCUMENTS In the newly revised Fourth Edition of Construction Drawings and Details for Interiors, distinguished interior design professors Rosemary Kilmer and W. Otie Kilmer deliver a comprehensive and practical perspective on the preparation and understanding of construction documents. The authors use a highly visual presentation and offer extensive sample drawings and details, as well as photographs, to show readers the fundamentals of drafting, drawing types, plans, and schedules, and computer-aided design. The Fourth Edition includes new sections on contract administration, field measuring tools, safety and security, and smart systems and controls. A companion website offers PowerPoint lecture slides, an instructor's manual, activities, test questions, and solutions. New appendices feature examples of interior design projects and common symbols for construction drawings. The book also includes: A thorough introduction to drawing communication, equipment, and classification systems, including information about Building Information Modeling and building certification programs for sustainability A discussion of green building certification programs An exploration of the design process, including concept development, hand sketching, design development, preliminary designs, sketches, and presentations A practical review of contract documents, including specifications, contracts, construction drawings, as-built drawings and demolition plans, and floor plans An in-depth examination of structural, mechanical, and plumbing systems Construction Drawings and Details for Interiors is perfect for interior design students, early-career professionals hoping to improve their understanding of project drawing conventions, or anyone studying for the NCIDQ exam.

Written from the viewpoint of the working designer, this textbook describes each material's characteristics and teaches students how to evaluate, select and specify materials.

Studio environments can be defined as multi-dimensional integrated production spaces where basic design trainings take place and where design issues including theoretical notions such as sociological, political, phenomenological, and other dimensions are discussed. Present approaches within the literature and social media on this topic gives cause for students to evaluate their future professions over finished and pictorial products rather than ontological and processual means. While there are many resources available on the present approaches of aesthetics and visuality of interior spaces, there is not much research available on new design methodologies, related design processes, and new applied methods in interior architecture. Based on different contexts, these methods of design practice have the potential to enrich design processes and create multiple discussion platforms within project studios as well as other design media. These different representations and narration methods for research in the context of interior architecture can be effectively used in design processes. The Handbook of Research on Methodologies for Design and Production Practices in Interior Architecture proposes new design methodologies and related design processes and introduces new applied method approaches while presenting alternative methods that have been used within design studios in the field of interior architecture. The chapters deal with four major sections: the design process and interdisciplinary approaches; then scenario development and content; followed by material, texture, and atmosphere; and concluding with new approaches to design. While highlighting topics such as spatial perception, design strategies, architectural atmosphere, and design-thinking, this book is of interest to architects, interior designers, practitioners, stakeholders, researchers, academicians, and students looking for advanced research on the new design methodologies and processes for interior architecture. "The original edition of this book, Color, Space, and Style, was published by Rockport Publishers in 2007"--Preliminary page.

For the past decade, *Specifications for Commercial Interiors* has been the definitive guide to required information on regulations and liabilities, materials performance criteria, and specification writing for interior systems. Today more than ever, every professional involved in the design of commercial and institutional interior space needs to know how to evaluate materials, avoid liability, and comply with current regulations. This new edition has been completely revised. Every section has been updated, and new chapters have been added on paneling, life cycle costing, data management, and fire performance testing. The book also incorporates the 1989 specification data issued by the Construction Specifications Institute. Used for a required course in the College of Architecture at Arizona State University, this book consists of 18 chapters—well documented with charts, diagrams, and checklists—which are organized into three parts. The first part defines professional and product liability and outlines the latest regulations and standards. Three separate chapters are devoted to fire hazards and their effect on interior finishes, upholstery, and furniture specification. Part 2 discusses interior systems and materials: rugs and carpets, resilient and hard-surface flooring, interior wall finishes, paneling, window systems, and commercial furniture. Life cycle costing is covered, as are the requirements for barrier-free public interiors. Part 3 establishes guidelines for coordinating drawings, schedules, and specification documents. The latest technological developments are referred to throughout the text, and up-to-date terminology is defined in glossaries at the ends of chapters. The book is an invaluable reference for interior designers, architects, and students of these professions.

The National Council for Interior Design Qualification (NCIDQ) certifies interior designers in the United States and Canada with a 13 1/2-hour, closed-book exam, offered every April and October. The exam is divided into three sections, each of which may be taken individually. The Interior Design Reference Manual is the designer's primary source for exam preparation. This manual provides an overview of the exam topics and practice problems, with solutions. Updated for the new NCIDQ exam format, the second edition of the Interior Design Reference Manual is the most efficient and thorough review for the interior design exam. Along with an explanatory review of exam topics, the Manual provides 233 exam-like practice problems (with solutions) and test-taking strategy. The book is enhanced by illustrations, tables and charts of data, and a detailed index.
