

The Map That Came To Life

Are YOU the ultimate map-reader? Do you know your trig points from your National Trails? Can you calculate using contours? And can you fathom exactly how far the footpath is from the free house? Track down hidden treasures, decipher geographical details and discover amazing facts as you work through this unique puzzle book based on 40 of the Ordnance Survey's best British maps. Explore the first ever OS map made in 1801, unearth the history of curious place names, encounter abandoned Medieval villages and search the site of the first tarmac road in the world. With hundreds of puzzles ranging from easy to mind-boggling, this mix of navigational tests, word games, code-crackers, anagrams and mathematical conundrums will put your friends and family through their paces on the path to becoming the ultimate map-master!

Collins UK in Maps is a multi-topic atlas of the UK, which introduces the most relevant topics to reflect the Geography Key Stage 2-3 requirements of the National Curriculum. Formerly published as Collins Keystart UK Atlas, this collection of maps can be used to investigate different themes and topics. It tells a story in maps, diagrams, charts, words and photographs each of which presents information to compare and examine. We live on a remarkable planet and this atlas helps us to make sense of the UK today and understand how things came to be as well as how they might change in years to come. Suggested activities on each spread encourage users to explore further.

If you're lost she'll find you But who will save her? A thrilling new FBI series for fans of Tess Gerritsen and Karin Slaughter. FBI Agent Elsa Myers has a secret... Elsa Myers is smart, determined, and gifted with an extraordinary ability to find missing children. When vulnerable teenager Ruby disappears from Queens, she is put on the case. But Elsa's skills are rooted in her own troubled past. She is haunted by her mother's murder, her father is dying, and her relationship with her sister is crumbling. As the case begins to look hopeless, it becomes more and more personal, tangling with the traumatic history she has worked so hard to hide. As the darkness gathers around her, Elsa has to make a choice: can she save Ruby, if it means losing herself? 'Compellingly told, with a striking sting in the tail.' Daily Mail 'A triumph!' Karen Dionne, author of Home 'A perfect, deeply satisfying thriller that grips right to the end.' Jane Casey, author of Let the Dead Speak

Over the course of the twentieth century, there was a major shift in practices of mapping, as centuries-old methods of land surveying and print publication were incrementally displaced by electronic navigation systems. William Rankin argues that although this shift did not render traditional maps obsolete, it did revise the goals of the mapping sciences as a whole. Military cartographers and civilian agencies alike developed new techniques for tasks that exceeded the capabilities of paper, such as aiming long-range guns, navigating in featureless environments, regularizing air travel, or drilling for offshore oil. "After the Map "reveals the major conceptual ramifications of these and other changes and in doing so offers a new way of understanding the central political-geographic shift of the twentieth century. Seen first and foremost as affecting a transformation in the nature of "territory," the change from paper mapping to electronic systems is not a story about technological improvement or the wizardry of precision; instead, it is about the "kind" of geographic knowledge and therefore governance that can exist in the first place. "

Armed with hundreds of blank maps she had painstakingly printed by hand, Becky Cooper walked Manhattan from end to end. Along her journey she met police officers, homeless people, fashion models, and senior citizens who had lived in Manhattan all their lives. She asked the strangers to "map their Manhattan" and to mail the personalized maps back to her. Soon, her P.O. box was filled with a cartography of intimate narratives: past loves, lost homes, childhood memories, comical moments, and surprising confessions. A beautifully illustrated, PostSecret-style tribute to New York, Mapping Manhattan includes 75 maps from both anonymous mapmakers and notable New Yorkers, including Man on Wire aerialist Philippe Petit, New York Times wine critic Eric Asimov, Tony award-winning actor Harvey Fierstein, and many more. Praise for Mapping Manhattan: "What an intriguing project."—The New York Times "A tender cartographic love letter to this timeless city of multiple dimensions, parallel realities, and perpendicular views." —Brain Pickings "Cooper's beautiful project linking the lives of New Yorkers is one that will continue to grow." —Publishers Weekly online

When Sammy's group loses their map on a camping trip, can he use his SEN Superpowers to save the day and lead them safely back to the campsite? SEN Superpowers: The Map Challenge explores the topic of dyslexia with an empowering story and adorable illustrations. The SEN Superpowers series celebrates the positive traits associated with a range of common SEN (Special Education Needs) conditions, boosting the confidence and strength-awareness of children with those conditions, while also allowing for better understanding and positivity among their peers. Each book includes a page of discussion points about the story, a page of tips for how to boost abilities (inclusive for children with and without special educational needs), and, finally, a further page of notes for parents and teachers. The books feature a dyslexic-friendly font to encourage accessibility and inclusivity for all readers.

"This book traces how the geographical sciences have become entwined with politics, territorial claim making, and nation-building in Israel/Palestine. In particular, the focus is on the history of geographical sciences before and after the establishment of the state of Israel in 1948, and how surveying, mapping, and naming the new territory become a crucial part of its making. With the 1993 Oslo Interim Agreement, Palestinians also surveyed and mapped the territory allocated to a future State of Palestine, with the expectation that they will, within five years, gain full sovereignty. In both cases, maps served to evoke a sense of national identity, facilitated a state's ability to govern, and helped delineate territory. Besides maps geopolitical functions for nation-state building, they also become weapons in map wars. Before and after the 1967 war between Israel and its Arab neighbors, maps of the region became one of the many battlefields in which political conflicts over land claims and the ethno-national identity of this contested land were being waged. Aided by an increasingly user-defined mapping environment, Israeli and Palestinian governmental and non-governmental

organizations increasingly relied on the rhetoric of maps in order to put forth their geopolitical visions. Such struggles over land and its rightful owners in Israel/Palestine exemplify processes underway in other states across the globe, whether in South Africa or Ukraine, which are engaged in disputes over territorial boundaries, national identities, and the territorial integrity of nation-states. Maps, no less, have become crucial tools in these struggles"--

Tours of six magical lands offer a map and directions for Peter Pan's Neverland, Dorothy's Land of Oz, the Giant's kingdom, Alice's Wonderland, Aladdin's Kingdom, and Snow White's Enchanted Forest, with hidden treasures to find in each one.

From 1950 to 1990, the Soviet Army conducted a global topographic mapping program, creating large-scale maps for much of the world that included a diversity of detail that would have supported a full range of military planning. For big cities like New York, DC, and London to towns like Pontiac, MI and Galveston, TX, the Soviets gathered enough information to create street-level maps. What they chose to include on these maps can seem obvious like locations of factories and ports, or more surprising, such as building heights, road widths, and bridge capacities. Some of the detail suggests early satellite technology, while other specifics, like detailed depictions of depths and channels around rivers and harbors, could only have been gained by actual Soviet feet on the ground. The Red Atlas includes over 350 extracts from these Cold War maps, exploring their provenance and cartographic techniques as well as what they can tell us about their makers and the Soviet initiatives that were going on all around us.

I decided to make this separate book of maps to accompany 'Intrepid Dudes of the Inca Empire', because readers might want to refer to them at several points while reading, so I thought it could be useful to have them in a different file. The book refers to the maps by number (e.g. Map 2) at points when you might want to take a look at them. There are maps of countries, the empire itself and more detailed maps of specific parts of countries. Also, I love maps.

#MapsForTheWin!

I fell into the deepest of holes. I am no one. I awake in a windowless room--naked, filthy, bruised, robbed of my every memory. I feel inexplicably drowned in a sea of hatred and rage. I...don't know who I am. But I know I must escape. This is Matt Wells, hero of *The Death List* and *The Soul Collector*, as you've never seen him. Crime writer Matt Wells could never have conjured a plot this twisted--a secretive militia running sick brainwashing experiments in the Maine wilderness, himself a subject. He knows they've been subconsciously feeding him instructions...but for what? Taunted by maddening snatches of a life he can't trust as his own, Matt's piecing it together: three gruesome killings he's blamed for...and a woman...someone from his past he should remember.

The Ordnance Survey and Modern Irish Literature offers a fresh new look at the origins of literary modernism in Ireland, tracing a history of Irish writing through James Clarence Mangan, J.M. Synge, W.B. Yeats, James Joyce, and Samuel Beckett. Beginning with the archives of the Ordnance Survey, which mapped Ireland between 1824 and 1846, the book argues that one of the sources of Irish modernism lies in the attempt by the Survey to produce a comprehensive archive of a land emerging rapidly into modernity. The Ordnance Survey instituted a practice of depicting the country as modern, fragmented, alienated, and troubled, both diagnosing and representing a landscape burdened with the paradoxes of colonial modernity. Subsequent literature returns in varying ways, both imitative and combative, to the complex representational challenge that the Survey confronts and seeks to surmount. From a colonial mapping project to an engine of nationalist imagining, and finally a framework by which to evade the claims of the postcolonial nation, the Ordnance Survey was a central imaginative source of what makes Irish modernist writing both formally innovative and politically challenging. Drawing on literary theory, studies of space, the history of cartography, postcolonial theory, archive theory, and the field of Irish Studies, *The Ordnance Survey and Modern Irish Literature* paints a picture of Irish writing deeply engaged in the representation of a multi-layered landscape.

'A lovely debut from a gifted young author. Violet Moller brings to life the ways in which knowledge reached us from antiquity to the present day in a book that is as delightful as it is readable.' Peter Frankopan, author of *The Silk Roads*
The Map of Knowledge Violet Moller traces the journey taken by the ideas of three of the greatest scientists of antiquity – Euclid, Galen and Ptolemy – through seven cities and over a thousand years. In it, we follow them from sixth-century Alexandria to ninth-century Baghdad, from Muslim Cordoba to Catholic Toledo, from Salerno's medieval medical school to Palermo, capital of Sicily's vibrant mix of cultures, and – finally – to Venice, where that great merchant city's printing presses would enable Euclid's geometry, Ptolemy's system of the stars and Galen's vast body of writings on medicine to spread even more widely. In tracing these fragile strands of knowledge from century to century, from east to west and north to south, Moller also reveals the web of connections between the Islamic world and Christendom, connections that would both preserve and transform astronomy, mathematics and medicine from the early Middle Ages to the Renaissance. Vividly told and with a dazzling cast of characters, *The Map of Knowledge* is an evocative, nuanced and vibrant account of our common intellectual heritage. 'An endlessly fascinating book, rich in detail, capacious and humane in vision.' Stephen Greenblatt, author of *The Swerve: How the World Became Modern*

It's one of the first things we discover as children, reading and drawing: Maps have a unique power to transport us to distant lands on wondrous travels. Put a map at the start of a book, and we know an adventure is going to follow. Displaying this truth with beautiful full-color illustrations, *The Writer's Map* is an atlas of the journeys that our most creative storytellers have made throughout their lives. This magnificent collection encompasses not only the maps that appear in their books but also the many maps that have inspired them, the sketches that they used while writing, and others that simply sparked their curiosity. Philip Pullman recounts the experience of drawing a map as he set out on one of his early novels, *The Tin Princess*. Miraphora Mina recalls the creative challenge of drawing up "The Marauder's Map" for the Harry Potter films. David Mitchell leads us to the Mappa Mundi by way of *Cloud Atlas* and his own sketch maps. Robert Macfarlane reflects on the cartophilia that has informed his evocative nature writing, which was set off by Robert

Louis Stevenson and his map of Treasure Island. Joanne Harris tells of her fascination with Norse maps of the universe. Reif Larsen writes about our dependence on GPS and the impulse to map our experience. Daniel Reeve describes drawing maps and charts for The Hobbit film trilogy. This exquisitely crafted and illustrated atlas explores these and so many more of the maps writers create and are inspired by--some real, some imagined--in both words and images. Amid a cornucopia of over two hundred full-color images, we find here maps of the world as envisaged in medieval times, as well as maps of adventure, sci-fi and fantasy, nursery rhymes, literary classics, and collectible comics. An enchanting visual and verbal journey, *The Writer's Map* will be irresistible for lovers of maps, literature, and memories--and anyone prone to flights of the imagination.

Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! "Filled with wonder and sorrow and happiness." —Alison McGhee, #1 New York Times bestselling author of *Someday* A heartfelt story of a young girl seeking beauty and connection in a busy world. As the seasons change, so too does a young Hmong girl's world. She moves into a new home with her family and encounters both birth and death. As this curious girl explores life inside her house and beyond, she collects bits of the natural world. But who are her treasures for? A moving picture book debut from acclaimed Hmong American author Kao Kalia Yang. "Full of heart. And hope. This is exactly the kind of book I want to read to my daughter, and I wish I could hand a copy to every kid. Powerful, beautiful, and transcendent."—Newbery medalist and New York Times bestselling author Matt de la Peña "With the clear, careful, and beautiful language we've come to expect from her, Kao Kalia Yang unfurls her first children's book, a journey waiting to reward our every step. This sad but heartening work reminds us how important it is that we care for our neighbors, and in so doing, we may discover we are not so different—a message that our children need now, more than ever."—Bao Phi, author of *A Different Pond* "A young Hmong girl settles into her new home, and as the seasons change, so does the world around her. A Map Into the World is a beautiful and hopeful story about love and loss, family and friendship, and it belongs in every reader's hands."—Sarah Park Dahlen, Associate Professor in the MLIS Program at St. Catherine

Maps are not just diagrams of the route from A to B - from the earliest times they have helped us make sense of our world, from the very local to the global. Simply organised as a progression through time, each map is not only a beautiful work of art in its own right but also tells us about our changing perception of the earth. Sometimes, of course, maps tell lies and there are examples represented here that are meant to alter or influence our understanding of the world around us. There are maps of oceans and continents charted by heroic adventurers sailing into the unknown, at sea for years in tiny ships. For every example of a beautifully embellished map that has survived there must have been scores of cartographers who perished at sea or in 'unknown parts'. Maps are not just about understanding and representing the physical world: they have an administrative use in demarcating national boundaries or individual plots of land, a social use in showing who lives where, a military use in depicting the layout of enemy positions, a political or propaganda use in showing one country or faction at an advantage over others. All are represented in this book, a history of the world in images from around the globe and from every epoch.

This powerful and lyrical debut novel is to Syria what *The Kite Runner* was to Afghanistan; the story of two girls living eight hundred years apart—a modern-day Syrian refugee seeking safety and an adventurous mapmaker's apprentice—"perfectly aligns with the cultural moment" (*The Providence Journal*) and "shows how interconnected two supposedly opposing worlds can be" (*The New York Times Book Review*). This "beguiling" (*Seattle Times*) and stunning novel begins in the summer of 2011. Nour has just lost her father to cancer, and her mother moves Nour and her sisters from New York City back to Syria to be closer to their family. In order to keep her father's spirit alive as she adjusts to her new home, Nour tells herself their favorite story—the tale of Rawiya, a twelfth-century girl who disguised herself as a boy in order to apprentice herself to a famous mapmaker. But the Syria Nour's parents knew is changing, and it isn't long before the war reaches their quiet Homs neighborhood. When a shell destroys Nour's house and almost takes her life, she and her family are forced to choose: stay and risk more violence or flee across seven countries of the Middle East and North Africa in search of safety—along the very route Rawiya and her mapmaker took eight hundred years before in their quest to chart the world. As Nour's family decides to take the risk, their journey becomes more and more dangerous, until they face a choice that could mean the family will be separated forever. Following alternating timelines and a pair of unforgettable heroines coming of age in perilous times, *The Map of Salt and Stars* is the "magical and heart-wrenching" (*Christian Science Monitor*) story of one girl telling herself the legend of another and learning that, if you listen to your own voice, some things can never be lost.

Much more than a history atlas, this book drops you right in the heart of the action, as 130 detailed maps tell the story of pivotal episodes in world history, from the first human migrations out of Africa to the race for space. After the foreword written by renowned broadcaster and historian Peter Snow, purpose-made regional and global maps present the history of the world as it happened, charting how events traced patterns on land and ocean - patterns of exploration, discovery, or conquest that created powerful empires, fragile colonies, or terrifying theatres of war. An interplay of text and graphics leads you around the page so that you can follow the story of civilizations through ancient, medieval, and modern times. But not every page is full of maps. At key points in *History of the World Map by Map*, broad, sweeping introductions provide a chance to step back and look at entire periods, such as World War 2, or to explore overarching themes, such as the Industrial Revolution. Picture spreads, meanwhile, focus on epoch-defining moments or developments, such as fascism and communism, and the invention of printing.

From *Mappa Mundi* to modern election maps, the United Kingdom has evolved rapidly, along with the ways in which it has been mapped. In this time, cartography has not only kept pace with these changes, but has often driven them. In this beautiful book, more than 90 maps give a visual representation of the history of Britain. Every map tells a story and this book tells the incredible history of Britain through maps, and includes many famous examples of cartography, along with some that deserve to be better known. See the establishment of Great Britain, the British Empire expand, the impact of World Wars and the latest statistical mapping. Maps include* Rudge Cup (schematic map of western forts on Hadrian's Wall), 2nd century AD* Matthew Paris map of the Anglian Heptarchy (Anglo-Saxon Kingdoms), c. 1250* Gough map of Britain, 1360* *Cambriae Typus*, first published map of

Wales, 1573* Raven maps of the Ulster Plantations, 1622* Enclosure map (eg of Norfolk, c. 1800)* Booth Poverty Map of London, 1886* Map of Beeching cuts to Britain's railways, 1963* Map of EU Referendum voting patterns, 2016

Looks at the experiences of people who have had near death experiences and compares it to religious and philosophical beliefs about the afterlife from around the world.

This "absorbing history of the Ordnance Survey"—the first complete map of the British Isles—"charts the many hurdles map-makers have had to overcome" (The Guardian, UK). Map of a Nation tells the story of the creation of the Ordnance Survey map, the first complete, accurate, affordable map of the British Isles. The Ordnance Survey is a much beloved British institution, and this is—amazingly—the first popular history to tell the story of the map and the men who dreamt and delivered it. The Ordnance Survey's history is one of political revolutions, rebellions and regional unions that altered the shape and identity of the United Kingdom over the eighteenth and nineteenth centuries. It's also a deliciously readable account of one of the great untold British adventure stories, featuring intrepid individuals lugging brass theodolites up mountains to make the country visible to itself for the first time.

Short-listed for Best Short Romance at the Romantic Novelists' Association Romance of the Year Awards 2019 One of the most original and charming books you will ever read, this is perfect for all those who love Eleanor Oliphant and The Keeper of Lost Things

"Old maps lead you to strange and unexpected places, and none does so more ineluctably than the subject of this book: the giant, beguiling Waldseemüller world map of 1507." So begins this remarkable story of the map that gave America its name. For millennia Europeans believed that the world consisted of three parts: Europe, Africa, and Asia. They drew the three continents in countless shapes and sizes on their maps, but occasionally they hinted at the existence of a "fourth part of the world," a mysterious, inaccessible place, separated from the rest by a vast expanse of ocean. It was a land of myth—until 1507, that is, when Martin Waldseemüller and Matthias Ringmann, two obscure scholars working in the mountains of eastern France, made it real. Columbus had died the year before convinced that he had sailed to Asia, but Waldseemüller and Ringmann, after reading about the Atlantic discoveries of Columbus's contemporary Amerigo Vespucci, came to a startling conclusion: Vespucci had reached the fourth part of the world. To celebrate his achievement, Waldseemüller and Ringmann printed a huge map, for the first time showing the New World surrounded by water and distinct from Asia, and in Vespucci's honor they gave this New World a name: America. The Fourth Part of the World is the story behind that map, a thrilling saga of geographical and intellectual exploration, full of outsize thinkers and voyages. Taking a kaleidoscopic approach, Toby Lester traces the origins of our modern worldview. His narrative sweeps across continents and centuries, zeroing in on different portions of the map to reveal strands of ancient legend, Biblical prophecy, classical learning, medieval exploration, imperial ambitions, and more. In Lester's telling the map comes alive: Marco Polo and the early Christian missionaries trek across Central Asia and China; Europe's early humanists travel to monastic libraries to recover ancient texts; Portuguese merchants round up the first West African slaves; Christopher Columbus and Amerigo Vespucci make their epic voyages of discovery; and finally, vitally, Nicholas Copernicus makes an appearance, deducing from the new geography shown on the Waldseemüller map that the earth could not lie at the center of the cosmos. The map literally altered humanity's worldview. One thousand copies of the map were printed, yet only one remains. Discovered accidentally in 1901 in the library of a German castle it was bought in 2003 for the unprecedented sum of \$10 million by the Library of Congress, where it is now on permanent public display. Lavishly illustrated with rare maps and diagrams, The Fourth Part of the World is the story of that map: the dazzling story of the geographical and intellectual journeys that have helped us decipher our world.

Examines the pivotal relationship between mapping and civilization, demonstrating the unique ways that maps relate and realign history, and shares engaging cartography stories and map lore.

A skeptical H. G. Wells investigates time-travel mysteries including an aristocrat's love affair with a murdered prostitute from the past, a Victorian woman's escape to the future, and a plot to murder celebrated authors to steal their written works.

'Set in a vividly realised world of elite Alphas and their 'weaker' Omega twins, it holds a mirror up to our obsession with perfection' Guardian The second book in Francesca Haig's incredible Fire Sermon series.

A Map to the Door of No Return is a timely book that explores the relevance and nature of identity and belonging in a culturally diverse and rapidly changing world. It is an insightful, sensitive and poetic book of discovery. Drawing on cartography, travels, narratives of childhood in the Caribbean, journeys across the Canadian landscape, African ancestry, histories, politics, philosophies and literature, Dionne Brand sketches the shifting borders of home and nation, the connection to place in Canada and the world beyond. The title, A Map to the Door of No Return, refers to both a place in imagination and a point in history -- the Middle Passage. The quest for identity and place has profound meaning and resonance in an age of heterogenous identities. In this exquisitely written and thought-provoking new work, Dionne Brand creates a map of her own art.

MRS P'S JOURNEY is the enchanting story of Phyllis Pearsall. Born Phyllis Isobella Gross, her lifelong nickname was PIG. The artist daughter of a flamboyant Hungarian Jewish immigrant, and an Irish Italian mother, her bizarre and often traumatic childhood did not restrain her from becoming one of Britain's most intriguing entrepreneurs and self-made millionaires. After an unsatisfactory marriage, Phyllis, a thirty-year-old divorcee, had to support herself and so became a portrait painter. It is doing this job and trying to find her patron's houses that Phyllis became increasingly frustrated at the lack of proper maps of London. Instead of just cursing the fact as many fellow Londoners probably did, Phyllis decided to do something about it. Without hesitation she covered London's 23,000 streets on foot during the course of one year, often leaving her Horseferry Road bedsit at dawn to do so. To publish the map, and in light of its enormous success, she sets up her own company, The Geographer's Trust, which still publishes the London A-Z and that of every major British city. MRS P'S JOURNEY is the account of a strong, independent woman who has left behind an enduring legacy.

A contemporary follow-up to the groundbreaking Power of Maps, this book takes a fresh look at what maps do, whose interests they serve, and how they can be used in surprising, creative, and radical ways. Denis Wood describes how cartography facilitated the rise of the modern state and how maps continue to embody and project the interests of their creators. He demystifies the hidden assumptions of mapmaking and explores the promises and limitations of diverse counter-mapping practices today. Thought-provoking illustrations include U.S. Geological Survey maps; electoral and transportation maps; and numerous examples of critical cartography, participatory GIS, and map art.

A compelling exploration of the ways that humans have mapped the world throughout history - now in a compact new edition Map:

Exploring the World brings together more than 250 fascinating examples of maps from the birth of cartography to today's cutting-edge digital maps and reflects the many reasons people make maps - to find their way, to assert ownership, to encourage settlement, or to show political power. Carefully chosen by an international panel of experts and arranged to highlight thought-provoking contrasts and similarities, it features maps by the greatest names in cartography and lesser-known creators, as well as rare maps from indigenous cultures around the world.

On the last day of second grade, twins Spencer and Maggie Parker come home from school to find a camper van in their driveway. And not just any camper; a magic camper that can transport them to every state in the continental US. This is perfect for Maggie, who loves geography and is a star student, and for Spencer, who's been failing his geography quizzes and could use the real life extra credit. Together, the twins travel to a surprising new place--the rolling fields of Colorado! There they get suited up in cowboy gear, eat a hearty breakfast in the Mess Hall, and join a cattle drive. But when the group takes a moment to rest, the ranch's prized cow, Snowflake, is stolen by a band of rogue cowboys. The twins must discover how to work together in order to save Snowflake, and find their way home again.

Why have people from different cultures and eras formulated myths and stories with similar structures? What does this similarity tell us about the mind, morality, and structure of the world itself? From the author of 12 Rules for Life: An Antidote to Chaos comes a provocative hypothesis that explores the connection between what modern neuropsychology tells us about the brain and what rituals, myths, and religious stories have long narrated. A cutting-edge work that brings together neuropsychology, cognitive science, and Freudian and Jungian approaches to mythology and narrative, Maps of Meaning presents a rich theory that makes the wisdom and meaning of myth accessible to the critical modern mind.

'My name is Mike and I am a map addict. There, it's said...'

"Romantic and unforgettable." —Nicholas Sparks Two strangers take the road less traveled... Heather Mulgrew's world is already mapped out: she is going to travel abroad with her friends after college, come back to a great career in September, and head into a life where not much is left to chance. But that was before an encounter on an overnight train introduces her to Jack, a passionate adventurer who changes the course of her journey and her life. Throwing Heather's careful itinerary to the wind, they follow Jack's grandfather's journal through post-World War II era Europe: Vienna, Budapest, Turkey—exotic places that serve only to heighten their feelings. As September looms, Jack urges Heather to stay with him, to keep traveling, to give in to the romance of their experience; Heather convinces him to return to the United States. Jack has a secret that could change everything. And Heather's world is about to be shaken to the core. J.P. Monniger's The Map That Leads to You is a breathtaking novel about love, loss, and the best-laid plans that are meant to be broken.

The complete collection of the short stories in the Life According to Maps series. --- Maps * * * If Maps ruled the world, his best pal Benji would be court jester, and every day would celebrate a new experiment. No, scratch that. If Maps ruled the world, his best pal would still be living next door, and there wouldn
