Reaching far beyond sword and sorcery, *The Scar* is a story of two people torn by disaster, their descent into despair, and their reemergence through love and courage. Sergey and Marina Dyachenko mix dramatic scenes with romance, action and wit, in a style both direct and lyrical. Written with a sure artistic hand, *The Scar* is the story of a man driven by his own feverish demons to find redemption and the woman who just might save him. Egert is a brash, confident member of the elite guards and an egotistical philanderer. But after he kills an innocent student in a duel, a mysterious man known as "The Wanderer" challenges Egert and slashes his face with his sword, leaving Egert with a scar that comes to symbolize his cowardice. Unable to end his suffering by his own hand, Egert embarks on an odyssey to undo the curse and the horrible damage he has caused, which can only be repaired by a painful journey down a long and harrowing path. Plotted with the sureness of Robin Hobb and colored with the haunting and ominous imagination of Michael Moorcock, *The Scar* tells a story that cannot be forgotten.

At the height of the Vietnam War, American society was so severely fragmented that it seemed that Americans may never again share common concerns. The media and other commentators represented the impact of the war through a variety of rhetorical devices, most notably the emotionally charged metaphor of "the wound that will not heal." References in various contexts to veterans' attempts to find a "voice," and to bring the war "home" were also common. Gradually, an assured and resilient American self-image and powerful impressions of cultural collectivity transformed the Vietnam war into a device for maintaining national unity. Today, the war is portrayed as a healed wound, the once "silenced" veteran has found a voice, and the American home has accommodated the effects of Vietnam. The scar has healed, binding Americans into a union that denies the divisions, diversities, and differences exposed by the war. In this way, America is now "over" Vietnam. In *The Scar That Binds*, Keith Beattie examines the central metaphors of the Vietnam war and their manifestations in American culture and life. Blending history and cultural criticism in a lucid style, this provocative book discusses an ideology of unity that has emerged through widespread rhetorical and cultural references to the war. A critique of this ideology reveals three dominant themes structured in a range of texts: the "wound," "the voice" of the Vietnam veteran, and "home." The analysis of each theme draws on a range of sources, including film, memoir, poetry, written and oral history, journalism, and political speeches. In contrast to studies concerned with representations of the war as a combat experience, *The Scar That Binds* opens and examines an unexplored critical space through a focus on the effects of the Vietnam War on American culture. The result is a highly original and compelling interpretation of the development of an ideology of unity in our culture.

Growing up as a boy from the Parayar caste, in the milieu of Christian, Hindu and Muslim communities, K.A. Gunasekaran narrates the familiar tale of caste oppression and prejudice prevalent in the villages of Tamil Nadu. As the narrative unfolds, the reader is shown how the low caste negotiates differently with the three religious communities. The deep pain of the Paraya surfaces through the risible anecdotes that ridicule the grievously unjust practices of the upper castes. The book emphasises the fact that Indian villages are doubly caste-conscious and cruel, and that Dalit emancipation rests in better education for the community. Gunasekaran writes in an earthy and colloquial style to capture the innocence, cruelty and drama of a South Indian village. Considered the first modern Dalit autobiography in Tamil, *The Scar* is an important book calling for Dalit assertion and emancipation.

A severely burned teenager. A guitar. Punk rock. The chords of a rock 'n' roll road trip in a coming-of-age novel that is a must-read story about finding your place in the world...even if you carry scars inside and out. In attempting to describe himself in his college application essay—to "help us to become acquainted with you beyond your courses, grades, and test scores"—Harbinger (Harry) Jones goes way beyond the 250-word limit and gives a full account of his life. The first defining moment: the day the neighborhood goons tied him to a tree during a lightning storm when he was 8 years old, and the tree was struck and caught fire. Harry was badly burned and has had to live with the physical and emotional scars, reactions from strangers, bullying, and loneliness that instantly became his everyday reality. The second defining moment: the day in eighth grade when the handsome, charismatic Johnny rescued him from the bullies and then made the startling suggestion that they start a band together. Harry discovered that playing music transported him out of his nightmare of a world, and he finally had something that compelled people to look beyond his physical appearance. Harry's description of his life in his essay is both humorous and heart-wrenching. He had a steeper road to climb than the average kid, but he ends up learning something about personal power, friendship, first love, and how to fit in the world. While he's looking back at the moments that have shaped his life, most of this story takes place while Harry is in high school and the summer after he graduates.

Metoyer, Jr., author, *Small Fires in the Sun*

Vol. 9, no. 9-vol. 28, includes a survey of current dermatological literature (quarterly).

Despite the ubiquity of automobility, the reality of automotive death is hidden from everyday view. There are accident blackspots all over the roads that we use and go past every day but the people that have died there or been injured are not marked, unless by homemade shrines and personal memorialization. Nowhere on the planet is this practice as densely actioned as in the United States. *Road Scars* is a highly visual scholarly monograph about how roadside car crash shrines place the collective trauma of living in a car culture in the everyday landscapes of automobility. Roadside shrines—or road trauma shrines—are vernacular memorial assemblages built by private individuals at sites where family and friends have died in automobile accidents, either while driving cars or motorcycles or being hit by cars as pedestrians, bicyclists, or motorcyclists. Prevalent for decades in Latin America and in the American Southwest, roadside car crash shrines are now present throughout the U.S. and around the world. Some are simply small white crosses, almost silent markers of places of traumatic death. Others are elaborate collections of objects, texts, and materials from all over the map culturally and physically, all significantly brought together not in the home or in a cemetery but on the roadside, in drivable public space—a space where private individuals perform private identities alongside each other in public, and where these private mobilities sometimes collide with one another in traumatic ways that are negotiated in roadside shrines. This book touches on something many of us have seen, but few have explored intellectually.
