Speed Reading Finding it tough to concentrate? If you discover your mind wanders once you are learning, you will really be scanning too slowly! If you read too slowly your brain has the spare capacity, thus your thoughts can get lost on a tangent. This section can introduce you to Speed Reading - merely, reading faster; additionally to Skimming a text to induce a fast summary, and Scanning a text to quickly notice relevant info. You can simply train yourself to scan a lot of quickly - if you're willing to practice. Improving your Reading Speed Physically, once reading, your eyes move spasmodically across variety of "fixation points." (Experiment: you'll see this if you get a lover to take a seat down opposite you. raise them to follow your finger with their eyes, as you draw an outsized circle within the air in between the 2 of you. you may see that their eyes do not follow your finger swimmingly, however, jump from purpose to purpose in a very variety of polygonal shape pattern within the air). Speed readers do not attempt to soak up and perceive every and each word. they do not "read aloud" in their head. Speed scanners read in "blocks," therefore increasing the number of words they can in any "fixation." So... Relax. Focus. Use a ruler or index card to guide your eyes down the page of text, line by line. you will feel self-conscious, however, it works! as an alternative, simply run the top of a pen underneath every line. Move the pen, ruler or card swimmingly

across/down the page, and force your eyes to stay up. Remember, do not fixate on every and each word. You will be shocked what quantity you are taking in. Skim Reading The aim of skim reading is to induce the final plan, gist or summary of a text and its content, to not have a close understanding of the text. As Woody Allen illustrates, "I scan War and Peace.... it's regarding Russia." Use the Contents page to induce an summary. Read the primary and least sentence of every chapter / section / paragraph to visualize wherever the text goes and what it's covering. Scanning Scanning is what you are doing after you scan terribly quickly for a particular piece info. as an example, once trying up variety in a very phone book. Use headings and titles and info clues (e.g. bold text, indented quotations) on the page to assist you aim on what you are looking for. Don't attempt to scan each word. speed reading. Most of us will not have received any reading tuition since we were children and we are likely to read at about two to four hundred words (roughly one page of a book) per minute. However, it is possible to read at much higher speeds. With speed reading training one can easily increase this rate to between five hundred and a thousand words a minute, and with more dedicated practice, speeds of two to three thousand words a minute are possible - equivalent to being able to read a novel in one or two hours. Speed reading is a useful tool to have in your reading arsenal, but there are further techniques that will enable you to get through all the material you need to read. These range from establishing the correct mental set for the type of reading you are doing, to understanding how the brain most easily absorbs new information, to skimming and scanning effectively and to understanding how redundancy in language can help you to reduce the amount of material you need to read. Our Speed Reading Quick Course will show you how to read at much higher speeds and get through all the information you need to without compromising your enjoyment or your comprehension.

Speed Reading Speed reading can come to your rescue when you have to refer to a lot of work for a single project or assignment, especially when you are already familiar with the major concepts but want to widen your knowledge base regarding the topic. Human mind is a lot more capable than we give it credit for, and there are ways that you can use your maximum mental capabilities. One of them is speed reading. It can help you go through piles of reading material in half (or less) than the time it would usually take you to read it. I am writing this book largely from experience. I became interested in speed reading when someone I know got through piles of reading in a few days and completed his dissertation, whereas it took me days to write the text of my own dissertation. I had to know some of his techniques. Honestly, the eye fixation techniques work best if you have great familiarity with the topic at hand. My friend was able to speed-read his way to a Ph.D. because he was highly familiar with the topics and concepts related to his dissertation topic. So let's get this myth out of the way: you cannot increase your reading speed to thousands of words

per minute. You can only bring an improvement in your reading speed while still keeping it within human range (less than 900 words per minute). That too is only when you are familiar with the topic. I will recommend reading at normal rate when concepts are novel to you. The first chapter has all the theory regarding speed reading, the controversies, and the research facts. I believe that theory is necessary for practice. The second chapter contains the actually eye fixation techniques in a step-wise way. You can actually start practicing these methods right after reading them. The third chapter is about the comprehension and retention of the reading material, which is actually the main aim of reading anything. The third chapter also contains a step-wise methods to enhance retention and comprehension including the SQ3R. Speed reading apps and software have also emerged. They make use of the basic principles of eye-fixation techniques and provide even quicker ways to go through reading material. I want to stress the fact that there is no replacement for traditional book reading. Speed reading can, however, come in handy when you have to complete a lot of reading in a short amount of time. So keep that in mind while you are reading this book.
