Folktales and fairy tales are living stories; as part of the oral tradition, they change and evolve as they are retold from generation to generation. In the last thirty years, however, revision has become an art form of its own, with tales intentionally revised to achieve humorous effect, send political messages, add different cultural or regional elements, try out new narrative voices, and more. These revisions take all forms, from short stories to novel-length narratives to poems, plays, musicals, films and advertisements. The resulting tales paint the tales from myriad perspectives, using the broad palette of human creativity. This study examines folktale revisions from many angles, drawing on examples primarily from revisions of Western European traditional tales, such as those of the Grimm Brothers and Charles Perrault. Also discussed are new folktales that combine traditional storylines with commentary on modern life. The conclusion considers how revisionists poke fun at and struggle to understand stories that sometimes made little sense to start with.

Introducing Children's Literature is an ideal guide to reading children's literature through the perspective of literary history. Focusing on the major literary movements from Romanticism to Postmodernism, Thacker and Webb examine the concerns of each period and the ways in which these concerns influence and are influenced by the children's literature of the time. Each section begins with a general chapter, which explains the relationship between the major issues of each literary period and the formal and thematic qualities of children's texts. Close readings of selected texts follow to demonstrate the key defining characteristics of the form of writing and the literary movements. Original in its approach, this book sets children's literature within the context of literary movements and adult literature. It is essential reading for students studying writing for children. Books discussed include: \*Louisa May Alcott's Little Women \* Charles Kingsley's The Water-Babies \*Lewis Carroll's Alice in Wonderland \*Frank Baum's The Wizard of Oz \*Frances Hodgson Burnett's The Secret Garden \*P.L.Travers' Mary Poppins \*E.B.White's Charlotte's Web \*Philip Pullman's Clockwork.

Despite being a source of continuing interest to educational scholars, research into the literary understanding of elementary school students has emphasized written materials over multimodal mediums such as picturebooks. Focusing on students in Grades one and five, this book describes children's interpretations of and responses to a variety of contemporary picturebooks, specifically those books that employ Radical Change characteristics and metafictional devices. In dealing with picturebooks, Sylvia Pantaleo seeks to show the ways in which literature teaches artistic codes and conventions, critical thinking skills, visual literacy skills, and interpretative strategies. Aside from investigating specific picturebooks, Pantaleo discusses the broader implications of reading, viewing, and creating print and digital texts in schools. These exercises, she argues, reflect the changing nature of communication and representation in the world of elementary school students. Incorporating postmodernism, social constructivism, and other theoretical frameworks, Pantaleo contextualizes her research and examines ways in which literature highlights broader social and cultural characteristics. An extensively researched look at the pedagogical value of literature in the classroom, this book introduces new dimensions to discussions of contemporary picturebooks in elementary education and the social nature of intertextuality.
