

The Tempest A Case Study In Critical Controversy Case Studies In Critical Controversy 2nd Second By William Shakespeare 2008 Paperback

Designed for "teaching the conflicts," this critical edition of Shakespeare's *The Tempest* reprints the authoritative Bevington text of the play along with 21 selections representing major critical and cultural controversies surrounding the work. The distinctive editorial material helps readers grapple not only with the play's critical issues but also with cultural debates about literature itself. The second edition includes four new readings, revised headnotes that more helpfully contextualize the critical essays, a portfolio of visual representations of Caliban, and an appendix on writing about critical controversies and *The Tempest*.

Essays in Memory of Richard Helgerson: Laureations brings together new essays by leading literary scholars of the British and European middle ages and early modern period who have been influenced by the groundbreaking scholarship of Richard Helgerson. The contributors evince the ongoing impact of Helgerson's work in critical debates including those of nationalism, formal analysis, and literary careerism.

This study on New World-utopian politics in *The Tempest* traces paradigm shifts in literary criticism over the past six decades that have all but reinscribed the text into a political document. This book challenges the view that the play has a dominant New World dimension and demonstrates through close textual readings how an unstable setting at the same time enables and effaces discursively over-invested New World interpretations. Almost no critical attention has been paid to the play's vacuum of power, and this work interprets pastoral, utopian, and 'American' tensions in light of the play's forever-ambiguous setting as well as through a 'presentist' post-1989 lens, an oft-neglected historical and political paradigm shift in Shakespeare criticism.

Anna Maria Ortese: Celestial Geographies features a selection of essays by established Ortese scholars that trace her remarkable creative trajectory.

The preoccupation of the English Church with the word of scripture during Elizabethan and Jacobian times had both powerful and subtle effects of the literature produced during and immediately after that period, say scholars of English from North America and the Antipodes. They examines works from the 1590s--the last decade of Elizabeth's reign, to 1652--just after the death of Charles I--by both well known and little known authors. Hermeneutics and Phenomenology in Paul Ricoeur: Between Text and Phenomenon calls attention to the dynamic interaction that takes place between hermeneutics and phenomenology in Ricoeur's thought. It could be said that Ricoeur's thought is placed under a twofold demand: between the rigor of the text and the requirements of the phenomenon. The rigor of the text calls for fidelity to what the text actually says, while the requirement of the phenomenon is established by the Husserlian call to return "to the things themselves." These two demands are interwoven insofar as there is a hermeneutic component of the phenomenological attempt to go beyond the surface of things to their deeper meaning, just as there is a phenomenological component of the hermeneutic attempt to establish a critical distance toward the world to which we belong. For this reason, Ricoeur's thought involves a back and forth movement between the text and the phenomenon. Although this double movement was a theme of many of Ricoeur's essays in the middle of his career, the essays in this book suggest that hermeneutic phenomenology remains implicit throughout his work. The chapters aim to highlight, in much greater detail, how this back and forth movement between phenomenology and hermeneutics takes place with respect to many important philosophical themes, including the experience of the body, history, language, memory, personal identity, and intersubjectivity.

The Victorians were obsessed with the empirical but were frequently frustrated by the sizeable gaps in their understanding of the world around them. This study examines how literature and popular culture adopted the emerging language of physics to explain the unknown or 'imponderable'.

Focusing attention on the neglected area of relations between brothers and sisters during the early modern period, this volume explores the sibling dynamics that shaped family relations in Italy, England, France, Spain, and Germany. Using an array of feminist and cultural studies approaches, prominent scholars consider sibling ties from a range of interdisciplinary perspectives - including art history, musicology, literary studies, and social history - to articulate underlying paradigms according to which sibling relations were constructed.

The Tempest and its Travels offers a new map of the play by means of an innovative collection of historical, critical, and creative texts and images.

This book challenges a longstanding and deeply ingrained belief in Shakespearean studies that The Tempest--long supposed to be Shakespeare's last play--was not written until 1611. In the course of investigating this proposition, which has not received the critical inquiry it deserves, a number of subsidiary and closely related interpretative puzzles come sharply into focus. These include the play's sources of New World imagery; its festival symbolism and structure; its relationship to William Strachey's True Reportory account of the 1609 Bermuda wreck of the Sea Venture (not published until 1625)--and the tangled history of how and why scholars have for so long misunderstood these matters. Publication of some preliminary elements of the authors' arguments in leading Shakespearean journals (starting in 2007) ignited a controversy that became part of the critical history. This book presents the case in full for the first time.

This book constitutes the refereed proceedings of the 17th International Conference on Entertainment Computing, ICEC 2018, held at the 24th IFIP World Computer Congress, WCC 2018, in Poznan, Poland, in September 2018. The 15 full papers, 13 short papers, and 23 poster, demonstration, and workshop papers presented were carefully reviewed and selected from 65 submissions. They cover a large range of topics in the following thematic areas: digital games and interactive entertainment; design, human-computer interaction, and analysis of entertainment systems; interactive art, performance and cultural computing; entertainment devices, platforms and systems; theoretical foundations and ethical issues; entertainment for purpose and persuasion; computational methodologies for entertainment; and media studies, communication, business, and information systems.

In the English Renaissance, poetry was imagined to inspire moral behaviour in its readers, but the efficacy of poetry was also linked to 'conjunction,' the theologically dangerous practice of invoking spirits with words. Magical Imaginations explores how major writers of the period ? including Spenser, Marlowe, and Shakespeare ? negotiated this troubling link between poetry and magic in their attempts to transform readers and audiences with the power of art. Through analyses of texts ranging from sermons and theological treatises to medical tracts and legal documents, Genevieve Guenther sheds new light on magic as a cultural practice in early modern England. She demonstrates that magic was a highly pragmatic, even cynical endeavor infiltrating unexpected spheres ? including Elizabethan taxation policy and Jacobean political philosophy. With this new understanding of early modern magic, and a fresh context for compelling readings of classic literary works, Magical Imaginations reveals the central importance of magic to English literary history.

Wooden Os is a study of the presence of trees and wood in the drama of Shakespeare and his contemporaries – in plays set within forests, in character dialogue, and in props and theatre constructions. Vin Nardizzi connects these themes to

the dependence, and surprising ecological impact, of London's commercial theatre industry on England's woodlands, the primary resource required to build all structures in early modern England. *Wooden Os* situates the theatre within an environmental history that witnessed a perceived scarcity of wood and timber that drove up prices, as well as statute law prohibiting the devastation of English woodlands and urgent calls for the remedying of a resource shortage that was feared would result in eco-political collapse. By considering works including *Friar Bacon and Friar Bungay*, the revised *Spanish Tragedy*, and *The Tempest*, Nardizzi demonstrates how the "trees" within them were used in imaginative ways to mediate England's resource crisis.

Laura Wilder fills a gap in the scholarship on writing in the disciplines and writing across the curriculum with this thorough study of the intersections between scholarly literary criticism and undergraduate writing in introductory literature courses. *Rhetorical Strategies and Genre Conventions in Literary Studies* is the first examination of rhetorical practice in the research and teaching of literary study and a detailed assessment of the ethics and efficacy of explicit instruction in the rhetorical strategies and genre conventions of the discipline. Using rhetorical analysis, ethnographic observation, and individual interviews, Wilder demonstrates how rhetorical conventions play a central, although largely tacit, role in the teaching of literature and the evaluation of student writing. Wilder follows a group of literature majors and details their experiences. Some students received experimental, explicit instruction in the special topoi, while others received more traditional, implicit instruction. Arguing explicit instruction in disciplinary conventions has the potential to help underprepared students, Wilder explores how this kind of instruction may be incorporated into literature courses without being overly reductive. Taking into consideration student perspectives, Wilder makes a bold case for expanding the focus of research in writing in the disciplines and writing across the curriculum in order to grasp the full complexity of disciplinary discourse.

This book examines how Shakespeare's plays resurface in current complex TV series. Its four case studies bring together *The Tempest* and the science fiction-Western *Westworld*, *King Lear* and the satirical dynastic drama of *Succession*, *Hamlet* and the legal thriller *Black Earth Rising*, as well as *Coriolanus* and the political thriller *Homeland*. The comparative readings ask what new insights the twenty-first-century remediations may grant us into Shakespeare's texts and, vice versa, how Shakespearean returns help us understand topical concerns negotiated in the series, such as artificial intelligence, the safeguarding of democracy, terrorism, and postcolonial justice. This study also proposes that the dramaturgical seriality typical of complex TV allows insights into the seriality Shakespeare employed in structuring his plays. Discussing a broad spectrum of adaptational constellations and establishing key characteristics of the new adaptational aggregate of serial Shakespeare, it seeks to initiate a dialogue between Shakespeare studies, adaptation

studies, and TV studies.

This book focuses on the challenges and uncertainties involved when island geography is translated into words and images, and it explores the complexities and contradictions of islands as figures of thought in Western modernity. Other studies have shown how islands have been imagined as bounded, easily controllable spaces and colonial territories; *The Aesthetics of Island Space* argues that they have been linked to disorientation and confusion as much as to spatial mastery and control. The book traces four lines in the vast sea of Anglo-American island stories, each of which has its beginning in one of modernity's voyages of discovery. The chapters focus on America's island gateways (Roanoke and Ellis Island), visions of tropical islands (Tahiti and imagined South Sea islands), the islands of the US-Canadian border region in the Pacific Northwest, and the imaginative appeal of geologically mutable islands. The book studies the journals of explorers and scientists alongside literary texts and films. It discusses a panorama of real and imagined journeys that take their narrators, protagonists, and readers to the limits of human perception and understanding, where borders are drawn and dissolved in a disorienting world between water and land.

The second Oxford edition of Shakespeare's *Complete Works* reconsiders every detail of their text and presentation in the light of modern scholarship. The nature and authority of the early documents are re-examined, and the canon and chronological order of composition freshly established. Spelling and punctuation are modernized, and there is a brief introduction to each work, as well as an illuminating and informative General Introduction. Included here for the first time is the play *The Reign of King Edward the Third* as well as the full text of Sir Thomas More. This new edition also features an essay on Shakespeare's language by David Crystal, and a bibliography of foundational works.

Popular English travel guides from the sixteenth and seventeenth centuries asserted that women who wandered too far afield were invariably suspicious, dishonest, and unchaste. As the essays in *Travel and Travail* reveal, however, early modern women did travel, often quite extensively, with no diminution of their moral fiber. Female travelers were also frequently represented on the English stage and in other creative works, both as a reproach to the ban on female travel and as a reflection of historical women's travel, whether intentional or not. *Travel and Travail* conclusively refutes the notion of female travel in the early modern era as "an absent presence." The first part of the volume offers analyses of female travelers (often recently widowed or accompanied by their husbands), the practicalities of female travel, and how women were thought to experience foreign places. The second part turns to literature, including discussions of roving women in Shakespeare, Margaret Cavendish, and Thomas Heywood. Whether historical actors or fictional characters, women figured in the wider world of the global Renaissance, not simply in the hearth and home.

Tempest, speculated to be one of the last plays he ever wrote as well as the most compressed. Moreover, *The Tempest* covers themes regarding the soul and the human spirit's capacity for growth. This Bright Notes Study Guide explores the context and history of Shakespeare's classic work, helping students to thoroughly explore the reasons it has stood the literary test of time. Revisiting *The Tempest* offers a lively reconsideration of how *The Tempest* encourages interpretation and creative appropriation. It includes a wide range of essays on theoretical and practical criticism focusing on the play's original dramatic context, on its signifying processes and its present-time screen remediation.

The relationship between travel and translation might seem obvious at first, but to study it in earnest is to discover that it is at once intriguing and elusive. Of course, travelers translate in order to make sense of their new surroundings; sometimes they must translate in order to put food on the table. The relationship between these two human compulsions, however, goes much deeper than this. What gets translated, it seems, is not merely the written or the spoken word, but the very identity of the traveler. These seventeen essays—which treat not only such well-known figures as Martin Luther, Erasmus, Shakespeare, and Milton, but also such lesser known figures as Konrad Grünenberg, Leo Africanus, and Garcilaso de la Vega—constitute the first survey of how this relationship manifests itself in the early modern period. As such, it should be of interest both to scholars who are studying theories of translation and to those who are studying “hodoeporics”, or travel and the literature of travel.

"In *Race Riots*, the first study of racial humour in the work of modern British authors, examines the complex ways in which laughter can either reinforce or subvert racial stereotyping. Filling a critical gap, *Race Riots* focuses on the rhetorical function of laughter within comic texts, a seldom studied dimension of the subject. It also explores the relationship between humour and power in society, concerns that are customarily treated separately." --Résumé de l'éditeur.

Which John Dryden should be brought into the twenty-first-century college classroom? The rehabilitator of the ancients? The first of the moderns? The ambivalent laureate? The sidelined convert to Rome? The literary theorist? The translator? The playwright? The poet? This volume in the MLA series *Approaches to Teaching World Literature* addresses the tensions, contradictions, and versatility of a writer who, in the words of Samuel Johnson, "found [English poetry] brick, and left it marble," who was, in the words of Walter Scott, "one of the greatest of our masters." Part 1, "Materials," offers a guide to the teaching editions of Dryden's work and a discussion of the background resources, from biographies and literary criticism to social, cultural, political, and art histories. In part 2, "Approaches," essays describe different pedagogical entries into Dryden and his time. These approaches cover subjects as various as genre, adaptation, literary rivalry, musical setting, and political and religious poetry in classroom situations that range from the traditional survey to learning through performance.

Four thousand years of shipwrecks in literature and film

Forests are "victims" of disaster when unable to provide services required by society and cannot recover within a relevant timeframe. Trees damaged may host insect pests that may kill healthy trees or become fuel for forest fires. Fallen trees also damage infrastructure. Extreme events can change the cultural and economic life of small states/islands and/or cause the breakdown of societal services. Disasters affect timber supplies, distorting market functioning. Damaged timber is susceptible to attack from insects and fungi, quickly losing value, and insect attacks may spread to healthy trees. Forests can mitigate disasters by e.g. reducing the intensity of tsunamis or stabilizing slopes. Single trees may become important refuges for people during floods. Key messages include: • Responses require planning and training to enable efficient response also in the absence of key personnel. • Information about the location of critical resources is important, e.g. key staff, forestry equipment, access routes, and timber storage sites. • It is impossible for many small countries to be resilient on their own. Development of regional response capacity is desirable, e.g. pools of qualified

operators, equipment resources, and training. • Salvage timber is a resource and an economic asset. Planning on the use of forest resources after disasters is rarely undertaken, and policies or regulations covering this type of use are often missing. • Salvaging timber is dangerous and requires training.
