Development education is much more than learning about development; it is a pedagogy for the globalised societies of the twenty-first century that incorporates discourses from critical pedagogy and postcolonialism, and a mechanism for ensuring that differing perspectives are reflected within education, particularly those from developing countries. Learning about development and global issues is now part of the school curriculum in a number of countries, and terms such as global citizenship, sustainable development and cultural understanding are commonplace in many educational contexts. Development education has been recognised as one of the educational discourses that has influenced the acceptance of these terms, for both policy-makers and practitioners. This ground-breaking volume addresses the history, theoretical influences, practices and impact of development education in Europe, North America, Australia and Japan. Chapters include how development education evolved, the influence of theorists such as Paulo Freire, the practices of aid and development agencies, and the impact of governments seeking evidence of public understanding of and engagement with development. The Theory and Practice of Development Education provides essential reading for anyone engaged in re-thinking and reflecting upon the educational needs of a globalised society, and seeking approaches towards learning that place social justice at the heart of that practice. It will be of particular interest to academics and postgraduate students in the fields of development education, international education and globalisation.

Incorporating the thinking, feeling, and behaving dimensions of human experience, the tenth edition of Corey's best-selling book helps students compare and contrast the therapeutic models expressed in counseling theories. Corey introduces students to the major theories (psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, cognitive-behavior, family systems, feminist, postmodern, and integrative approaches) and demonstrates how each theory can be applied to two cases (Stan and Gwen). With his trademark style, he shows students how to apply those theories in practice, and helps them learn to integrate the theories into an individualized counseling style. 'Structural reform has been one of the most important, and yet one of the most neglected, aspects of modern local government. This book represents the first attempt, since the early seventies, at providing a comprehensive account of both the theory and practice of structural reform in local government in developed countries. Using recent policy experience from seven different countries, the authors present seminal theoretical perspectives on structural reforms in local governance and the policy implications deriving from them. Written by well-known scholars of local government from around the world, this volume is a "must-read" for all academics, practitioners, students and policymakers.' - Giorgio Brosio, University of Turin, Italy

Compiled by scholars at the court of Liu An, king of Huainan, in the second century B.C.E, The Huainanzi is a tightly organized, sophisticated articulation of Western Han philosophy and statecraft. Outlining "all that a modern monarch needs to know," the text emphasizes rigorous self-cultivation and mental discipline, brilliantly synthesizing for readers past and present the full spectrum of early Chinese thought. The Huainanzi locates the key to successful rule in a balance of broad knowledge, diligent application, and the penetrating wisdom of a sage. It is a unique and creative synthesis of Daoist classics, such as the Laozi and the Zhuangzi; works associated with the Confucian tradition, such as the Changes, the Odes, and the Documents; and a wide range of other foundational philosophical and literary texts from the Mozi to the Hanfeizi. The product of twelve years of scholarship, this remarkable translation preserves The Huainanzi's special rhetorical features, such as parallel prose and verse, and showcases a compositional technique that conveys the work's powerful philosophical appeal. This path-breaking volume will have a transformative impact on the field of early Chinese intellectual history and will be of great interest to scholars and students alike.

Metafiction begins by surveying the state of contemporary fiction in Britain and America and explores the complex political, social and economic factors which influence critical judgment of fiction. The author shows how, as the novel has been eclipsed by the mass media, novelists have sought to retain and regain a wide readership by drawing on the themes and preoccupations of these forms. Making use of contemporary fiction by such writers as Fowles, Borges, Spark, Barthelme, Brautigan, Vonnegut and Barth, and drawing on Russian Formalist theories of literary evolution, the book argues that metafiction uses parody along with popular genres and non-literary forms as a way not only of exposing the inadequate and obsolescent conventions of the classic novel, but of suggesting the lines along which fiction might develop in the future.

This book provides students, researchers, and practitioners of speechwriting with a unique insight in the theory, history, and practice of speechwriting. The combination of theory and practice with case studies from the United States and Europe makes this volume the first of its kind. The book offers an overview of the existing research and theory, analysing how speeches are written in political and public life, and paying attention to three central subjects of contemporary speechwriting: convincing characterization of the speaker, writing for the ear, and appealing with words to the eye. Chapters address the ethics and the functions of speechwriting in contemporary society and also deliver general instructions for the speechwriting process. This book is recommended reading for professional speechwriters wishing to expand their knowledge of the rhetorical and theoretical underpinnings of speechwriting, and enables students and aspiring speechwriters to gain an understanding of speechwriting as a profession.

There is an historical element throughout philosophy. As Edel notes, this is always in the context of problems, so emphasis will fall on the major objective of reflective analysis of ideas. The major objective of Edel's analysis in *The Theory and Practice of Philosophy* is the fundamental interrelatedness of problems of method, metaphysics, and value. Each part is an integral whole, complete in itself. That philosophy has this central role in human practice indicates that it should be neither discarded nor deified. This is the explicit premise of the book. Students are likely to be faced increasingly with a demand for clarification on the fundamental issues of life and value. The expectation that philosophy will provide ready-made answers to these kinds of questions is as naive as the demand for any panacea, but this task cannot be turned over to any other department of human knowledge or any other branch of social activity. By placing emphasis on the importance of theory in matters of practice, the need for clear and systematic understanding of the world and man within it, and on the constant role of reflection in the management of human affairs, Edel seeks to shed light on the larger questions of philosophy by examining them in a systematic way. The result is a great text and tool for students and teachers that deals directly with the fundamental issues of our civilization.
