This magazines is a specialist motoring magazine, we have always catered to the enthusiast in you and brought an unadulterated view of the world of motoring. Sharp, sassy, clean, wittier and edgier than ever before. Drive it home today!

Direct injection enables precise control of the fuel/air mixture so that engines can be tuned for improved power and fuel economy, but ongoing research challenges remain in improving the technology for commercial applications. As fuel prices escalate DI engines are expected to gain in popularity for automotive applications. This important book, in two volumes, reviews the science and technology of different types of DI combustion engines and their fuels. Volume 1 deals with direct injection gasoline and CNG engines, including history and essential principles, approaches to improved fuel economy, design, optimisation, optical techniques and their applications. Reviews key technologies for enhancing direct injection (DI) gasoline engines Examines approaches to improved fuel economy and lower emissions Discusses DI compressed natural gas (CNG) engines and biofuels

The public debt crisis in Europe has shaken the confidence not just in the Euro, but in the European model. Aging and uneconomical Europeans are being squeezed between innovative Americans and efficient Asians, it is said. With debt and demographics dragging down them down, one hears that European economies will not grow much unless radically new ways are discovered. The end of complacency in Europe is a good thing, but this loss of confidence could be dangerous. The danger is that in a rush to rejuvenate growth, the attractive attributes of the European development model could be abandoned along with the weak. In fact, the European growth model has many strong points and enviable accomplishments. One can say without exaggeration that Europe had invented a convergence machine , taking in poor countries and helping them become high income economies. World Bank research has identified 27 countries that have grown from middle-income to high income since 1987: a few thanks to the discovery and exploitation of massive natural resources (e.g.: oil in Oman and Trinidad and Tobago), several others like Japan, Hong Kong, Singapore, Taiwan, and South Korea, embracing aggressive export-led strategies which involved working and saving a lot, postponing political liberties, and looking out only for themselves. But half of the countries that have grown from middle income to high income Croatia, Cyprus, Czech Republic, Estonia, Greece, Hungary, Latvia, Malta, Poland, Portugal, Slovak Republic, and Slovenia are actually in Europe. This is why the European model was so attractive and unique, and why with some well designed efforts it ought to be made right again.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Technology-based firms continue to compete primarily on innovation, and are continuously required to present new solutions to an exacting market. Innovation processes have progressively become interdisciplinary, collaborative, inter-organizational, and international, and a firm's ability to synthesize knowledge across disciplines, organizations, and geographical locations has a major influence on its viability and success. This book demonstrates how knowledgeintegration is crucial in facilitating innovation within modern firms. It provides original, detailed empirical studies of prerequisites, mechanisms, and outcomes of knowledge integration processes on several organizational levels, from key individuals, projects, and internal organizations, tocollaboration between firms.

Singapore's best homegrown car magazine, with an editorial dream team driving it. We fuel the need for speed!

Written from a real-world perspective by an award-winning copywriter/producer/director, this comprehensive guide is what every writer needs to create powerful, strategic ad copy. Focusing on strategy, technique, and the skills needed to write for different media, The Copywriter's Toolkit book will sharpen your copywriting skills whatever your level. Introduces essential conceptual strategies and key writing techniques for result-driven copy Provides practical advice on writing for specific media including: print, radio, TV, websites, blogs, social media, ambient, digital, direct mail, product packaging, and viral marketing Covers all areas of copy development: on-strategy and on-target messaging; headline and slogan creation; brand personality and tone of voice; broadcast production conceptualization and print / digital typesetting consideration Presents innovative visual examples from exciting multimedia campaigns, comments from copywriters at world-renowned agencies, inspiring radio scripts, TV scripts and storyboards, effective blog posts, imaginative package copy, and more Shares invaluable writing tips and insights from award-winning copywriters currently at global agencies Includes supplementary website an instructor's manual, sample syllabus, PowerPoint presentations, and creative assignments, as well as student study aids, flashcards, podcasts and/or webinars by the author, and links to sample and featured campaigns, agencies, and related videos

'Proceedings of the FISITA 2012 World Automotive Congress' are selected from nearly 2,000 papers submitted to the 34th FISITA World Automotive Congress, which is held by

Leninist success story. Nelson sets East German history within the context of the landscape history of two centuries to underscore how forest and ecosystem change offered a reliable barometer to the health and stability of the political system that governed them. Cold War Ecology records how East German leaders' indifference to human rights and their disregard for the landscape affected the rural economy, forests, and population. This lesson from history suggests new ways of thinking about the health of ecosystems and landscapes, Nelson shows, and he proposes assessing the stability of modern political systems based on the environment's system qualities rather than on political leaders' goals and beliefs.

This Proceedings volume gathers outstanding papers submitted to Proceedings of China SAE Congress 2018: Selected Papers, the majority of which are from China – the largest car-maker as well as most dynamic car market in the world. The book covers a wide range of automotive topics, presenting the latest technical advances and approaches to help technicians solve the practical problems that most affect their daily work. It is intended for researchers, engineers and postgraduate students in the fields of automotive engineering and related areas.
