The rise of retro has led many to conclude that it represents the end of marketing, that it is indicative of inertia, ossification and the waning of creativity.

Marketing — The Retro Revolution explains why the opposite is the case, demonstrating that retro-orientation is a harbinger of change and a revolution in marketing thinking. In his engaging and lively style, Stephen Brown shows that the implications of today's retro revolution are much more profound than the existing literature suggests. He argues that just as retro-marketing practitioners are looking to the past for inspiration, so too students, consultants and academics should seek to do likewise.

What inspired me to write *Letters to Evelyn* was that I was seeing so many things wrong with a negative outlook on life. I thought that I would give some of my dreams away that integrate with reality. My name is John J. Selman, I'm originally from Albuquerque, New Mexico, however I grew up in Brunswick, Maine when my parents moved here when I was four. I thought Brunswick, Maine had a strong tradition with poetry so, much of what I've seen in the English language are displayed in a lyrical sense. I graduated first in my NROTC class at the University of Maine with a B.A. in German Language and Literature, and with my degree, I chose to join naval service to become a pilot. My flight time has been spent in 9 different types of aircraft and I presently have two world records, one for the longest time spent with no sleep, greater than 12 days, that's talked about in my memoir, *Letters to Evelyn*, and my second is for the steepest, highest Sarajevo Approach with the lowest recovery in a T-34C. I flew from 6000 feet down to five feet above the treetops onto Elgin AFB at greater than a seventy degree nose down attitude. So, I enjoyed writing *Letters to Evelyn* because it allowed me to construct worlds with an impression, and give some of my ideas

Ask a scientist about Hollywood, and you'll probably get eye rolls. But ask someone in Hollywood about science, and they'll see dollar signs: moviemakers know that science can be the source of great stories, with all the drama and action that blockbusters require. That's a huge mistake, says Randy Olson: Hollywood has a lot to teach scientists about how to tell a story—and, ultimately, how to do science better. With *Houston, We Have a Narrative*, he lays out a stunningly simple method for turning the dull into the dramatic. Drawing on his unique background, which saw him leave his job as a working scientist to launch a career as a filmmaker, Olson first diagnoses the problem: When scientists tell us about their work, they pile one moment and one detail atop another moment and another detail—a stultifying procession of “and, and, and.” What we need instead is an understanding of the basic elements of story, the narrative structures that our brains are all but hardwired to look for—which Olson boils down, brilliantly, to “And, But, Therefore,” or ABT. At a stroke, the ABT approach introduces momentum (“And”), conflict (“But”), and resolution (“Therefore”)—the fundamental building blocks of story. As Olson has shown by leading countless workshops worldwide, when scientists' eyes are opened to ABT, the effect is staggering: suddenly, they're not just talking about their work—they're telling stories about

it. And audiences are captivated. Written with an uncommon verve and enthusiasm, and built on principles that are applicable to fields far beyond science, *Houston, We Have a Narrative* has the power to transform the way science is understood and appreciated, and ultimately how it's done.
