This book deals with a wide range of techniques used in the urban design process. It then goes on to relate these techniques to a unique, comprehensive account of method. A method of urban design is developed which has sustainability and environmental protection at the centre of its philosophy. Previously, literature regarding the urban design method has been almost totally neglected; this book introduces the topic to the reader. This revised Second Edition encompasses the latest techniques including the development of geographic information systems and financial techniques which help evaluate projects. A number of techniques are illustrated by example or case study. Where techniques are discussed they are located within the structure of the design process. The book develops a logical framework for a process, which includes problem definition, survey, analysis, concept generation, evaluation and implementation. It is this framework which leads toward the development of an urban design method. This book is a practical guide for students or professionals in the early part of their careers. It is organized so that each chapter provides guidance which readers would have otherwise had to discover for themselves, often with some difficulty.

Offers information on how to draw convincing works of architecture even with little or no knowledge about perspective, design, or color theory.

The power of reportage drawing is in the immediacy of the images that are created and the feeling of the illustrator's presence on location. Comparable in some ways to photojournalism, reportage illustrators are acting as visual journalists, proactively creating narrative work about issues and subjects, translating what they witness into handmade imagery. There is evidence that illustrations connect to people in powerful ways whether they are drawings created while embedded with troops in Afghanistan, documenting during a courtroom trial or recreating the energy of the crowd at a rock concert. This area of applied illustration also provides career opportunities for students and takes them out of the classroom and into different environments and situations. With practical information about tools, techniques and coping in various situations as well as inspirational interviews and advice from reportage artists working in the field, this book will fill a gap in this growing market.
