Fall in love with a brand-new set of books from the author of the bestselling *Psychic Surveys* and *This Haunted World* series. When you look in the mirror, who do you see? With Mandy the haunted doll now safely ensconced in Mason Town Museum, sealed in a glass case, Shady Groves and her colleagues, Annie and Ray, can relax. After a fashion. The small-town museum they run is not like others, it's a place that seeks to contain and understand artifacts and relics charged with negative energy. Their aim is to gradually reduce how potent that energy can be, and the destruction it can lead to. All is well, until Shady chances upon a mirror in a thrift store. The reflection staring back at her is not quite her own. The artifact is purchased and brought back to the museum, where, under controlled circumstances, they begin to explore its history. A girl, a woman, appears to be the previous owner. One who is troubled, who swings between emotions like some wild pendulum. As more is revealed, Shady follows her down each dark avenue, finally uncovering an involvement in one of the most shocking episodes of American history. Appalled, she refuses to continue. But, as Shady, Annie and Ray know, sometimes there's no turning back. Just what did happen at Cades Home Farm? Hannah Torrington has used her newfound training to seek revenge for her sister's death at the hands of the vampires. Her relationship with Will ruined and her abilities

growing stronger each day, she is determined to graduate from the program and help end the vampire uprising. When the vampires continue to stalk her family and Will refuses to let her go, she must battle both her feelings for the Lycan and the vampires who wish to destroy her.

From the author of the bestselling *Psychic Surveys* series comes a Christmas ghost novella to chill your bones! Just what defines a haunting? On a strange island, amongst strangers, a strange tale unfolds... Beth Williams leads a lonely existence, going to work, then returning to her flat to watch TV, eat and sleep - the same routine on repeat, day after day. It's a loneliness she nurtures, finds comfort in even, except at Christmas, a time of dread. Then comes an invite, an offer from an old friend, to join him for 'The Damned Season' at his house on an island off the coast of Anglesey, for Christmas with a difference. Intrigued as well as desperate, Beth accepts, arriving there a few days before Christmas Eve. She's not the only one invited, however, there are four others, all strangers to each other, all crossing murky, choppy waters to meet their host, a much changed man that seems not only surprised to see them, but dismayed, and weary too. Who is nothing but a husk. With the boatman gone and the mists closing in, Beth finds herself in a solitary house of ever-changing rooms and never-ending corridors, of people disappearing and then reappearing, of feasts and famine. And then there are the doors, constantly multiplying, and locked...aren't they? *The Damned Season*. It's coming. Download today or READ FOR FREE in KU: *Psychic Surveys Series: Psychic*

Jeffrey Thomas is renowned for his novels and tales set in Punktown, a terrifying, crime-riddled city of the future, where humans and aliens mix in every sense of the word, with often horrific results. Including two stories set in Punktown, this volume features works long and short that are among Thomas's most intimate and intense weird tales. "Saigon Dep Lam" is a poignant Christmas story set in Vietnam, a city which Thomas has visited often. Art takes a central role in "Mr. Faun" and "Drawing No. 8," both of which

suggest that paintings may be quite a bit more than what you see on the canvas. This book also includes several unpublished stories. "The Temple of Ugghiutu" is a Lovecraftian tale that bears relations to Thomas's Punktown novel Monstrosity. The distinctively titled "riaH gnoL" hints at the disturbing psychosis of a young woman employed by an arcade. "Good Will toward Men" makes us wonder about the real differences between heaven and hell.

Ollie left it all behind: a new home, friends who saw her as something more than a fragile shadow walker and a budding relationship with Kane. It was all in an effort to shield Asher, who should never have been able to escape the Shadowlands. Now her money is gone, her hopes of saving other shadow walkers has slipped through her fingers, and Kane won't speak to her. She's been abducted by leprechauns, who think she committed an unspeakable crime. The vampires want her dead and there's a crawler blowing up End of the Rainbows. Kane might not want to work with her, but he's going to have to because all hell is breaking loose in Boston.

NEW YORK TIMES BESTSELLER • In the final book of his astonishing career, Carl Sagan brilliantly examines the burning questions of our lives, our world, and the universe around us. These luminous, entertaining essays travel both the vastness of the cosmos and the intimacy of the human mind, posing such fascinating questions as how did the universe originate and how will it end, and how can we meld science and compassion to meet the challenges of the coming century? glimpse of Sagan's thoughts about love, death, and God as he struggled with fatal disease. Ever forward-looking and vibrant with the sparkle of his unquenchable curiosity, *Billions & Billions* is a testament to one of the great scientific minds of our day. Praise for *Billions & Billions* “[Sagan’s] writing brims with optimism, clarity and compassion.”—Ft. Lauderdale Sun-Sentinel “Sagan used the spotlight of his fame to illuminate the abyss into which stupidity, greed, and the lust for power may yet dump us. All of those interests and causes are handsomely represented in *Billions & Billions*.”—The Washington Post Book World “Astronomer Carl Sagan didn’t live to see the millennium, but he probably has done more than any other popular scientist to prepare us for its arrival.”—Atlanta Journal & Constitution “*Billions & Billions* can be interpreted as the Silent Spring for the current generation. . . . Human history includes a number of leaders with great minds who gave us theories about our universe and origins that ran contrary to religious dogma. Galileo determined that the Earth revolved around the Sun, not the other way around. Darwin challenged Creationism with his *Evolution of Species*. And now, Sagan has given the world its latest challenge: *Billions & Billions*.”—San Antonio Express-News “[Sagan’s] inspiration and boundless curiosity live on in the gift of his work.”—Seattle Times & Post-Intelligencer “Couldn’t stay awake in your high school science classes? It takes a graveyard to raise a child. Nobody Owens, known as Bod, is a normal boy. He would be completely normal if he didn't live in a graveyard, being raised by ghosts, with a guardian who belongs to neither the world of the living nor the dead. There are adventures in the graveyard for a boy—an ancient Indigo Man, a gateway to the abandoned city of ghouls, the strange and terrible Sleer. But if Bod leaves the graveyard, he will be in danger from the man Jack—who has already killed Bod's family. Trying to forget the boy with whom she fell in love, Abbey returns to Sleepy Hollow and throws herself into school, her perfume making, and her friendship with Ben to get over Caspian, but Caspian, who is dead, is a Shade and Abbey is his destiny.

As staff writer for Scientific American, John Horgan has a window on contemporary science unsurpassed in all the world. Who else routinely interviews the likes of Lynn Margulis, Roger Penrose, Francis Crick, Richard Dawkins, Freeman Dyson, Murray Gell-Mann, Stephen Jay Gould, Stephen Hawking, Thomas Kuhn, Chris Langton, Karl Popper, Stephen Weinberg, and E.O. Wilson, with the freedom to probe their innermost thoughts? In *The End Of Science*, Horgan displays his genius for getting these larger-than-life figures to be simply human, and scientists, he writes, "are rarely so human . . . so at their mercy of their fears and desires, as when they are confronting the limits of knowledge." This is the secret fear that Horgan pursues throughout this remarkable book: Have the big questions all been answered? Has all the knowledge worth pursuing become known? Will there be a final "theory of everything" that signals the end? Is the age of great discoverers behind us? Is science today reduced to mere

puzzle solving and adding details to existing theories? Horgan extracts surprisingly candid answers to there and other delicate questions as he discusses God, Star Trek, superstrings, quarks, plectics, consciousness, Neural Darwinism, Marx's view of progress, Kuhn's view of revolutions, cellular automata, robots, and the Omega Point, with Fred Hoyle, Noam Chomsky, John Wheeler, Clifford Geertz, and dozens of other eminent scholars. The resulting narrative will both infuriate and delight as it mindless Horgan's smart, contrarian argument for "endism" with a witty, thoughtful, even profound overview of the entire scientific enterprise. Scientists have always set themselves apart from other scholars in the belief that they do not construct the truth, they discover it. Their work is not interpretation but simple revelation of what exists in the empirical universe. But science itself keeps imposing limits on its own power. Special relativity prohibits the transmission of matter or information as speeds faster than that of light; quantum mechanics dictates uncertainty; and chaos theory confirms the impossibility of complete prediction. Meanwhile, the very idea of scientific rationality is under fire from Neo-Luddites, animal-rights activists, religious fundamentalists, and New Agers alike. As Horgan makes clear, perhaps the greatest threat to science may come from losing its special place in the hierarchy of disciplines, being reduced to something more akin to literary criticism as more and more theoreticians engage in the theory twiddling he calls "ironic science." Still, while Horgan offers his critique, grounded in the thinking of the world's leading researchers, he offers homage too. If science is ending, he maintains, it is only because it has done its work so well. The Weight of the Soul is the eighth in the bestselling Psychic Surveys series, that feature plot twists, compelling characters and a mystery at its dark heart. Perfect for fans of Stephen King, Darcy Coates, CJ Tudor and James Herbert. Life may have moved on to new challenges for

What was it like? Living in that house. Maggie Holt is used to such questions. Twenty-five years ago, she and her parents, Ewan and Jess, moved into a rambling Victorian estate called Baneberry Hall. They spent three weeks there before fleeing in the dead of night, an ordeal Ewan later recounted in a memoir called House of Horrors. His tale of ghostly happenings and encounters with malevolent spirits became a worldwide phenomenon. Now, Maggie has inherited Baneberry Hall after her father's death. She was too young to remember any of the events mentioned in her father's book. But she doesn't believe a word of

People from the pages of her father's book lurk in the shadows, and locals aren't thrilled that their small town has been made infamous. Even more unnerving is Baneberry Hall itself - a place that hints of dark deeds and unexplained happenings. As the days pass, Maggie begins to believe that what her father wrote was more fact than fiction. That, either way, someone - or something - doesn't want her here. And that she might be in danger all over again . . .

predilection towards two types of subject in his early work: exceptionally bloody *musha-e* ("warrior prints"), and supernatural images of demons and ghosts. Yoshitoshi maintained an interest in depicting the haunted realm of Japanese myth right up until his last major series, *36 Ghosts*, in 1889 (two years before his death). Like all Yoshitoshi's art, these prints are now considered to be the work of *ukiyo-e*'s last master practitioner. *DEMONS FROM THE HAUNTED WORLD* collects and considers over 150 of Yoshitoshi's most striking and disturbing images of spectres, monsters and demons - including the series *100 Ghost Stories*, *Heroic Beauty*, and *36 Ghosts* in their entirety - presented in large-format and full-colour throughout.

While belief in religious supernatural claims is waning throughout the West, evidence suggests belief in nonreligious supernatural claims is on the rise. What explains this contradiction? How can a society with a falling belief in God have a rising belief in ghosts, psychic powers, ancient astronauts, and other supernatural or pseudo-scientific phenomena? Taking the same anthropological approach he employed in his notable studies of religion, atheist author and activist David G. McAfee turns his attention to nonreligious faith-based claims. Whether going undercover as a medium, getting tested at Scientology headquarters in Los Angeles, or interviewing celebrity paranormalists and famous skeptics, he leaves no stone unturned in his investigation. As in the case of religion, he finds an unwillingness among "believers" to critically examine their most closely held convictions. Only once individuals honestly assess their own sacred cows will they be able to ensure that their beliefs conform to the known facts—and that our decisions as a society are based on the best available evidence.

For many critics, Bava was a gifted stylist but few have bothered to look beneath the surface to uncover the deeper significance of his work. The Haunted World of Mario Bava was first published in 2002. It has now been updated, revised and expanded by author Troy Howarth to give a better overview of Bava's remarkable legacy as a director and "cinema magician." This new edition contains new contributions from Bava's son, director Lamberto Bava, and genre icon Barbara Steele. The book examines all of Bava's directorial works in detail while also providing a portrait of the man himself—a man for whom publicity and self-promotion was always shied away from, even as he continued to work himself to the point of exhaustion as he improvised and pushed himself to deliver films which would go on to influence such major filmmakers as William Friedkin, Martin Scorsese, Quentin Tarantino, Tim Burton and Joe Dante. Author Troy Howarth "discovered" Bava's work as a child on late night TV and has worked hard to help bring more serious attention to his films. In addition to holding down a full-time job in the field of social work, he is also a contributor to We Belong Dead magazine and writes reviews for such websites as AV Maniacs and Eccentric Cinema.

"It's difficult to love a woman whose vagina is a gateway to the world of the dead..." Steve is madly in love with his eccentric girlfriend, Stacy. Unfortunately, their sex life

has been suffering as of late, because Steve is worried about the odd noises that have been coming from Stacy's pubic region. She says that her vagina is haunted. She doesn't think it's that big of a deal. Steve, on the other hand, completely disagrees. When a living corpse climbs out of her during an awkward night of sex, Stacy learns that her vagina is actually a doorway to another world. She persuades Steve to climb inside of her to explore this strange new place. But once inside, Steve finds it difficult to return... especially once he meets an oddly attractive woman named Fig, who lives within the lonely haunted world between Stacy's legs. "A very strange and surprisingly touching love story, despite the deliberately asinine premise. With subtle humor, surreal erotica, and some genuinely creepy moments, *The Haunted Vagina* is a completely unique reading experience."

A prescient warning of a future we now inhabit, where fake news stories and Internet conspiracy theories play to a disaffected American populace "A glorious book . . . A spirited defense of science . . . From the first page to the last, this book is a manifesto for clear thought."—Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don't understand the difference between the myths of pseudoscience and the testable hypotheses of science? Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. Casting a wide net through history and culture, Sagan examines and

authoritatively debunks such celebrated fallacies of the past as witchcraft, faith healing, demons, and UFOs. And yet, disturbingly, in today's so-called information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms. Praise for *The Demon-Haunted World* “Powerful . . . A stirring defense of informed rationality. . . Rich in surprising information and beautiful writing.”—*The Washington Post Book World* “Compelling.”—*USA Today* “A clear vision of what good science means and why it makes a difference. . . . A testimonial to the power of science and a warning of the dangers of unrestrained credulity.”—*The Sciences* “Passionate.”—*San Francisco Examiner-Chronicle*

Christmas is coming but at Blakemort that's not something to get excited about. A house that sits and broods, that calculates and considers, it's then that it lashes out - the attacks endured over five years becoming worse. There are also the spirits, some willing residents, others not. Amongst them a boy, a beautiful, spiteful boy... Who are they? What do they want? And is Corinna right when she suspects it's not just the dead the house traps but the living too? Book Two: Thirteen What happened all those years ago, in the dark?
