Many smart entrepreneurs prefer to buy an existing business instead of beginning a new one. Buying a business that is already operational will bring many benefits, including an already established product or service, well trained staff who know the business and enough success to have kept the company afloat for a period of time. Not having any money to purchase the business will not necessarily keep you from buying it. Banks have been tightening their commercial lending standards in the last few years, but you can still find the funding necessary to purchase a business without using your own money. If you were born with that "entrepreneurial spark" in your eye, then no economist or banker is going to keep you from starting a business. While many analysts may say that it's not a good time to become a business owner, others have found that buying a business with no money is suddenly a possibility.

Then read this book.

Parents will do just about anything to give their kids happy lives and successful futures. Unfortunately, the drive to give kids the best of everything leads to a financial strategy based in fear and competition, and results in millions of dollars worth of unnecessary purchases. Enough is enough. In Not Buying It, Brett Graff, the "Home Economist," separates the truth about what parents need for their kids to succeed from the fiction perpetuated by ads, peer pressure, and internal fear. Graff shows how parents can save up to a million dollars by investing the money they would otherwise spend on overpriced and unnecessary purchases for their kids. Graff exposes the many ways that overspending can actually harm kids by encouraging narcissism and unhealthy habits. Her tips range from the everyday (understand when supposedly "organic" products aren't worth the extra dollars) to the long-term (consider investing in a smaller home for your family, which encourages intimacy and connection), making this a valuable manual for all stages of a parent's life. An essential book for new parents as well as parenting veterans, Not Buying It is the definitive guide for families who want to separate the truth about raising kids from the hype.

The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times. This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining!
