regarding the total cost of ownership of a project or finance and return investment of GIS products. Achieving Business Success with GIS highlights that the use of GIS technology needs to be focused on the business issues, not the technology. The book begins by describing the use of GIS in a global context within a business environment as the background to outlining the need for organizations to have a strategy for their GIS. The book then goes on to explore the elements of a GIS strategy and explains issues which are relevant for such approaches and how to go about developing it. In the closing chapters of this book, the process of specifying and tendering for a GIS are discussed to ensure that the focus of the reader remains on the business issues of the organization. This is followed by examples of the best and worst Geographic Information Systems including a discussion on Google Earth and Web 2.0. The combination of the statistics from the GIS / Spatial surveys and the author's consulting experiences make this book an invaluable resource for GIS managers in government (federal, state and local) and utilities, organisations using GIS, and students and lecturers in this field.

For years, China has served as the "factory floor" for global production, driving down prices for consumers worldwide. But, unfortunately, China's rapid and chaotic industrialization has put it on a collision course with the rest of the world. The Coming China Wars was the first book to systematically cover all those conflicts: political, economic, and environmental. Now, in this new edition, Dr. Peter Navarro has thoroughly updated the entire book. You'll find new chapters on the danger posed by China's flood of defective products and contaminated

food; China's dramatic military expansion and the rising threat of a "hot war"; China's space program and its profound strategic implications; China's growing suppression of human rights and free speech; and much more. The coming China Wars will be fought over everything from decent jobs, livable wages, and advanced technologies to strategic resources...and eventually to our most basic of all needs: bread, water, and air. Unless all nations immediately address these impending conflicts, the results may be catastrophic. Like the First Edition, this book demands that we think much more deeply about how to stop the coming China Wars, laying out hard choices that must be made sooner rather than later. This new edition offers even more policy recommendations, including original contributions from several of the world's most important China experts.

Publisher's note - in this book various quotes and viewpoints are attributed to a 'Ron Vara'. Ron Vara is not an actual person, but rather an alias created by Peter Navarro in order to present his views and opinions.

armed Muslim rebels belonging to the MNLF (Mindanao National Liberation Front). This fact-based account describes the incidents that led up to the massacres and the continuing slaughter that spiraled out of control, when elements of the Armed Forces of the Philippines came to the defense of the town and in the process retaliated against the neighboring Muslim communities. Hundreds of Muslim men were mindlessly slaughtered in retaliation. These events during the civil conflicts of 1974 exacted a heavy toll upon both communities.
