Treedom is an exploration of Japan's most well-known treehouse builder Takashi Kobayashi. Takahashi, who has been featured in the New York Times and on Animal Planet's Treehouse Masters, as well as many television programs, newspapers, and magazines in Japan, examines being an outcast in a rigid society of rules and conformity and finding salvation in the trees. Treedom, filled with photography, poetry, and Takashi's personal accounts of treehouse building, describes how treehouse living is not just a lifestyle but a philosophy.

Go back to the thrilling time of warring knights who were prepared to give their life in order to protect their lord and his castle. Castles may conjure up a romantic fairy tale world; however, in real life, during the Middle Ages, castles were fortresses, providing shelter and protection for the lord as well as for the peasants who lived on his land. For an army, a lord depended on young soldiers in armor called knights who spent years at the castle learning the skills of warfare. Author Sarah Fabiny dives into the history of castles and how they grew from simple wood structures to mighty fortresses in stone. She also explains who could become a knight and what their lives were like off of the battlefield, enjoying feasts, courting their lady loves, and showing off in tournaments. With 80 fun black-and-white illustrations and an engaging 16-page photo insert, readers will be excited to read this latest addition to Who HQ!

It seems that almost everyone likes treehouses. Smiles of recognition turn into grins of enthusiasm as more people discover them and dream about making their own private retreats or family play spaces. And it's nice to remind ourselves that treehouses are built into the oldest and most forgiving, living things on earth. Also, history records treehouses as being built as deliberate follies, as challenges for arboreal designers, for merrymaking, and for keeping the spirit of fairy tales alive. But treehouses can also be social places. We will visit many that were built to entertain, to hang out with friends, or as guest houses. Trees come in all types. The House of Three Streams is a sprawling spectacle with high ceilings, verandas, and pavilions, perched atop a ridge overlooking two ravines. A medley of steel, glass, wood, and stone, the house weaves along the contour of the landscape, almost as an extension of the forest. Encina House by Aranguren & Gallegos, an elegant, sloping structure reminiscent of a gazebo, similarly inhabits its surrounding vista. Ensnared in a pine forest north of Madrid, the lower level is embedded in rock and connected to the upper by a natural stone wall. Shinichi Ogawa's Seaside House is an immaculate two-story minimalist marvel in Kanagawa that overlooks the Pacific. Its living area spills onto a cantilevered terrace and infinity pool, almost dissolving into the ocean as one seamless entity. In Vietnam, Shunri Nishizawa's House in Chau Doc exudes tropical sophistication with exposed timber beams, woven bamboo, plants, concrete panels, and inner balconies and terraces. Its corrugated iron panels act as moveable walls and shutters, ushering in views of surrounding rice fields. These homes--along with more than 50 others--are each remarkably distinct in design. They all, however, toe the line between inside and outside, each one symbiotic with its surroundings.

"Concrete? That characterless stuff of parking lots or Communist tower blocks, right? Well, yes. And no. Concrete is actually a name applied to a remarkably wide range of building substances, and, when properly handled, is one of the noble materials of contemporary architecture. A kind of "liquid stone" at the outset, it is malleable, durable, and capable of prodigious feats of engineering. This two-volume book highlights the best work done in concrete of recent years. It includes such stars as Zaha Hadid, Herzog & de Meuron, and Steven Holl, but also surprising new architects like the Russians SPEECH, and rising stars of the international scene like Rudy Ricciotti from France, as well as artists such as James Turrell, who turned the famous concrete spiral of Frank Lloyd Wright's Guggenheim in New York into the setting of one of his most remarkable pieces."--Provided by publisher.
