you for taking robust steps to help restore sanity in the world around you. Subcultural phenomena continue to draw attention from many areas of contemporary society, including the news media, the marketing and fashion industries, concerned parents, religious, and other citizen groups, as well as academia. Research into these phenomena has spanned the humanities and social sciences, and the subcultural theories that underlie this work are similarly interdisciplinary. Subcultural Theory brings these diverse analytic issues together in a single text, offering readers a concise discussion of the major concepts and debates that have developed over more than eighty years of subcultural research, including style, stratification, resistance, identity, media and "post subcultures". The text emphasizes methods, concepts, and analysis rather than mere descriptions of individual subcultures, all the while ensuring readers will gain insight into past and present youthful subcultures, including mod, punk, hardcore, straightedge, messenger, goth, riot grrrl, hip-hop, skinhead, and extreme metal, among others. The book closes with an assessment of the subculture concept as a viable and useful sociological tool in comparison with other fields of study including social movements and fandom.

Eagerly awaited and long out of print, this new edition is already an instant hit! Written in the 70's with all the influence of the wild and wonderful 60's, *The Game Of Life* reflects the depth of mind of one of the unique human beings of this century.

Extensively illustrated

There was a time between Be-Bop and Hip-Hop, when a new generation of teenagers created rock 'n' roll. Cole was one of those teenagers and was host of his own Saturday night, pop music TV show. "Sh-Boom!" is the pop-culture chronicle of that exciting time when teenagers created their own music.

Reveals how your individual time perspective shapes your life and is shaped by the

world around you, interacting to create national cultures, economics, and personal destinies.

The New York Times bestselling coauthor of *Sex at Dawn* explores the ways in which “progress” has perverted the way we live—how we eat, learn, feel, mate, parent, communicate, work, and die—in this “engaging, extensively documented, well-organized, and thought-provoking” (Booklist) book. Most of us have instinctive evidence the world is ending—balmy December days, face-to-face conversation replaced with heads-to-screens zomboidism, a world at constant war, a political system in disarray. We hear some myths and lies so frequently that they feel like truths: Civilization is humankind’s greatest accomplishment. Progress is undeniable. Count your blessings. You’re lucky to be alive here and now. Well, maybe we are and maybe we aren’t. *Civilized to Death* counters the idea that progress is inherently good, arguing that the “progress” defining our age is analogous to an advancing disease. Prehistoric life, of course, was not without serious dangers and disadvantages. Many babies died in infancy. A broken bone, infected wound, snakebite, or difficult pregnancy could be life-threatening. But ultimately, Christopher Ryan questions, were these pre-civilized dangers more murderous than modern scourges, such as car accidents, cancers, cardiovascular disease, and a technologically prolonged dying process? *Civilized to Death* “will make you see our so-called progress in a whole new light” (Book Riot) and adds to the timely conversation that “the way we have been living is no longer

sustainable, at least as long as we want to the earth to outlive us” (Psychology Today). Ryan makes the claim that we should start looking backwards to find our way into a better future.

A renowned psychotherapist's and scholar's significant and inspiring work on the relation of shamanism to both the psyche and society. Shows the relevance of shamanism to the modern world and how it can lead to a creative and affirmative relationship with life. The Shaman's Doorway is one of the most significant and inspiring works on the relation of shamanism to both the psyche and society. Drawing on his own experience as a psychotherapist and his understanding of primordial shamanic traditions, Stephen Larsen shows the relevance of this path to the modern world and how it can lead to a creative and affirmative relationship with life. Defining the task of the shaman as one of bringing meaning and healing into life, and creating a sense of growing accord with the root of all being, Larsen clearly shows how the shaman, all too often perceived as belonging to the world's past, actually holds the key to our future. Aldous Huxley and Alternative Spirituality offers an analysis of Huxley's spiritual interests, spanning both mysticism and Western esotericism. With this methodology, Jake Poller generates new insights into Huxley's work and draws revealing parallels between Huxley's ideas and the New Age.

One of the Christian Science Monitor's annual "Books We Liked Best" Take a walk down the halls and into the dorms and hearts of tiny Patrick Henry College, a Christian school just outside the nation's capital, where ambitious young evangelicals are groomed to become tomorrow's conservative elite. The future front lines of politics, entertainment, and science will be commanded by these idealistic graduates, who plan to lead the battle in reclaiming a godless nation. God's Harvard reveals the evangelical movement at a moment of crisis and climax, its future leaders struggling to resist the temptations of modern life even as they try to remake the world in their image. This is a vibrant, insightful look at kids who may very well be in charge of our country one day. "A rare accomplishment for many reasons—perhaps most of all because Rosin is a journalist who not only reports but also observes deeply." —San Francisco Chronicle "Rosin is at her best when chronicling sympathetically the lives of these young evangelicals, as ambitious as their secular peers but single-minded in their focus on politics." —Chicago Tribune "Nuanced and highly readable . . . With her feisty, richly detailed prose." —The Washington Post

On a snowy Thursday night in Chicago, there is a knock on Detective Hank Purcell's door. Sister Mary Philomena has seen something terrible at Saint Fidelis Church?—?a violation of all she holds sacred. The next Monday, she is found murdered in the convent basement, next to a furnace stuffed with old papers and photographs. And Margaret, Hank's teenage daughter, has disappeared. Hank and his unconventional partner Marvin Bondarowicz try to force their way through a wall of ecclesiastical silence to find the killer, while their search for Margaret takes them from swank lakeside flats to drug dens to south-side basement blues clubs...and the snow keeps falling.

Can't Find My Way Home is a history of illicit drug use in America in the second half of the twentieth century and a personal journey through the drug experience. It's the remarkable story of how America got high, the epic tale of how the American Century transformed into the Great Stoned Age. Martin Torgoff begins with the avant-garde worlds of bebop jazz and the emerging Beat writers, who embraced the consciousness-altering properties of marijuana and other underground drugs. These musicians and writers midwived the age of marijuana in the 1960s even as Timothy Leary and Richard Alpert (later Ram Dass) discovered the power of LSD, ushering in the psychedelic era. While President John Kennedy proclaimed a New Frontier and NASA journeyed to the moon, millions of young Americans began discovering their own new frontiers on a voyage to inner space. What had been the province of a fringe avant-garde only a decade earlier became a mass movement that affected and altered mainstream America. And so America sped through the century, dropping acid and eating magic mushrooms at home, shooting heroin and ingesting amphetamines in Vietnam, snorting cocaine in the disco era, smoking crack cocaine in the devastated inner cities of the 1980s, discovering MDMA (Ecstasy) in the rave culture of the 1990s. Can't Find My Way Home tells this extraordinary story by weaving together first-person accounts and historical background into a narrative vast in scope yet rich in intimate detail. Among those who describe their experiments with consciousness are Allen Ginsberg, Timothy Leary, Robert Stone, Wavy Gravy, Grace Slick, Oliver Stone, Peter Coyote, David Crosby, and many others from Haight Ashbury to Studio 54 to housing projects and rave warehouses. But Can't Find My Way Home does not neglect the recovery movement, the war on drugs, and the ongoing debate over drug policy. And even as

Martin Torgoff tells the story of his own addiction and recovery, he neither romanticizes nor demonizes drugs. If he finds them less dangerous than the moral crusaders say they are, he also finds them less benign than advocates insist. Illegal drugs changed the cultural landscape of America, and they continue to shape our country, with enormous consequences. This ambitious, fascinating book is the story of how that happened.

Media Reception Studies broadly surveys the past century of scholarship on the ways in which audiences make meaning out of mass media. It synthesizes in plain language social scientific, linguistic, and cultural studies approaches to film and television as communication media.

Janet Staiger traverses a broad terrain, covering the Chicago School, early psychological approaches, Soviet theory, the Frankfurt School, mass communication research and critical theory, linguistics and semiotic theory, social-psychoanalytical research, cognitive psychology, and cultural studies. She offers these theories as a set of tools for understanding the complex relationships between films and their audiences, TV shows and their viewers. She explains such questions as the behavior of fans; the implications of gender, sexuality, and race/ethnicity with regard to the media; the effect of violence, horror, and sexually explicit images on viewers; and the place of memory in spectatorship. Providing an organized and lucid introduction to a staggering amount of work, Media Reception Studies is an indispensable resource for anyone interested in understanding the effects of mass media.

Offers a comprehensive overview of the fundamentals of effective management, including management styles, managing with technology, communicating effectively, conflict resolution, managing teams, and leading business change.

Among the most significant subcultures in modern U.S. history, the hippies had a far-reaching impact. Their influence essentially defined the 1960s—hippie antifashion, divergent music, dropout politics and “make love not war” philosophy extended to virtually every corner of the world and remains influential. The political and cultural institutions that the hippies challenged, or abandoned, mainly prevailed. Yet the nonviolent, egalitarian hippie principles led an era of civic protest that brought an end to the Vietnam War. Their enduring impact was the creation of a 1960s frame of reference among millions of baby boomers, whose attitudes and aspirations continue to reflect the hip ethos of their youth. He was there when Dylan went electric, when a generation danced naked at Woodstock, and when Ken Kesey started experimenting with acid. Jerry Garcia was one of the most gifted musicians of all time, and he was a member of one of

the most worshiped rock 'n' roll bands in history. Now, Blair Jackson, who covered the Grateful Dead for twenty-five years, gives us an unparalleled portrait of Garcia--the musical genius, the brilliant songwriter, and ultimately, the tortured soul plagued by his own addiction. With more than forty photographs, many of them previously unpublished, Garcia: An American Life is the ultimate tribute to the man who, Bob Dylan said, "had no equal."

Booklist Top of the List Reference Source The heir and successor to Eric Partridge's brilliant magnum opus, The Dictionary of Slang and Unconventional English, this two-volume New Partridge Dictionary of Slang and Unconventional English is the definitive record of post WWII slang. Storming Heaven is a riveting history of LSD and its influence on American culture. Jay Stevens uses the "curious molecule" known as LSD as a kind of tracer bullet, illuminating one of postwar America's most improbable shadow-histories. His prodigiously researched narrative moves from Aldous Huxley's earnest attempts to "open the doors of perception" to Timothy Leary's surreal experiments at Millbrook; from the CIA's purchase of millions of doses to the thousands of flower children who turned on and burned out in Haight-Ashbury. Along the way, this brilliant, novelistic work of cultural history unites such figures as Allen Ginsberg, Cary Grant, G. Gordon Liddy, and Charles Manson. Storming Heaven irrefutably demonstrates LSD's pivotal role in the countercultural upheavals that shook America in the 1960s and changed the country forever. How historical, social, and cultural forces shaped the psychedelic experience in

midcentury America, from CIA LSD experiments to the Harvard Psilocybin Project. Are psychedelics invaluable therapeutic medicines, or dangerously unpredictable drugs that precipitate psychosis? Tools for spiritual communion or cognitive enhancers that spark innovation? Activators for one's private muse or part of a political movement? In the 1950s and 1960s, researchers studied psychedelics in all these incarnations, often arriving at contradictory results. In *American Trip*, Ido Hartogsohn examines how the psychedelic experience in midcentury America was shaped by historical, social, and cultural forces—by set (the mindset of the user) and setting (the environments in which the experience takes place). He explores uses of psychedelics that range from CIA and military experimentation to psychedelic-inspired styles in music, fashion, design, architecture, and film. Along the way, he introduces us to a memorable cast of characters including Betty Eisner, a psychologist who drew on her own experience to argue for the therapeutic potential of LSD, and Timothy Leary, who founded the Harvard Psilocybin Project and went on to become psychedelics' most famous advocate. Hartogsohn chronicles these developments in the context of the era's cultural trends, including the cold war, the counterculture, the anti-psychiatric movement, and the rise of cybernetics. Drawing on insights from the study of science, technology, and society, he develops the idea of LSD as a suggestible

technology, the properties of which are shaped by suggestion. He proposes the concept of collective set and setting, arguing that the historical and sociocultural context of midcentury America offered a particular set and setting—creating the conditions for what he calls the American trip.
