Praise for Tyrannosaurus Wrecks "Punchy writing, an equally in-your-face palette, and OHora's characteristically brash painting style make this as much a stompalong as a readaloud." --Publishers Weekly "Along with the pleasure of pronouncing those multisyllabic dino names, young audiences may find food for thought in the behavioral dynamics on display." --Kirkus Reviews "Warmly colored with childlike bodies and emotive faces, Ohora's dinosaurs are among the cutest you will come across in children's books." --Booklist "The brief rhyming text, which scans well, tells a story with child appeal. There is a good balance of two-to-three word sentences with large, uncluttered illustrations, making the book a good choice for reading aloud. In their simplicity, the brightly colored pictures have the look of children's art, but they enhance the classroom setting appropriately with interesting details." --School Library Journal "The shapely dinos, whose rough charcoal-style outlines and strong colors vividly contrast with the white or sometimes black backgrounds, are chunky and friendly in an eight-crayon-box color scheme and snazzy Peanuts-reminiscent outfits." --Bulletin of the Center for Children's Books "Together the chanting rhythm, ragged lines, and setting of an un-chaperoned dinosaur class create a satisfyingly high-energy, primal read-aloud strongly reminiscent of Bob Shea's 'Dinosaur vs.' series." --The Horn Book Magazine

"Lowell Dingus and Mark Norell have produced a highly readable, comprehensive account of the life and scientific work of Barnum Brown, arguably the most intrepid and successful collector of dinosaurs and other prehistoric vertebrates ever. Their story goes beyond the sensationalism of earlier accounts to flesh out Brown as not only an intrepid explorer but an important contributor to American science."--Kevin Padian, University of California, Berkeley "In Barnum Brown an engrossing narrative and a treasury of firsthand field notes and letters combine to form a true epic: the life of a great paleontologist and an all-too-human, and therefore fascinating, man.

Indispensable reading for anyone interested in fossils and the people who hunt them."--Michael Novacek, author of Terra "The greatest dinosaur hunter of all time, ' a fitting title for the man who shipped more than 1200 crates of fossilized bones to New York from far flung localities around the globe. In this superb, first-ever biography of Barnum Brown, Dingus and Norell paint a vivid portrait of an intrepid field worker, accomplished researcher, and popularizer of dinosaurs--a larger-than-life character who left a deep and indelible mark on the field of paleontology."--Scott D. Sampson, author of Dinosaur Odyssey: Fossil Threads in the Web of Life "Without a doubt the most popular and well-known dinosaur in the world, Tyrannosaurus rex has inspired millions of people worldwide through fact and fiction. Similarly, just about every vertebrate palaeontologist has been affected by the amazing career of Barnum Brown. But there has never been a biography written by scientists . . . until now! Here at last is an intimate look at the man who discovered the beast and turned our imaginations loose."--Philip J. Currie, author of Encyclopedia of Dinosaurs
