'A fantastic, provocative book about where we are now and where we are going' Phil Simon Huffington Post Amazon, Apple, Facebook, and Google are the four most influential companies on the planet. Just about everyone thinks they know how they got there. Just about everyone is wrong. For all that's been written about the Four over the last two decades, no one has captured their power and staggering success as insightfully as Scott Galloway. Instead of buying the myths these companies broadcast, Galloway asks fundamental questions: - How did the Four infiltrate our lives so completely that they're almost impossible to avoid (or boycott)? - Why does the stock market forgive them for sins that would destroy other firms? - And as they race to become the world's first trillion-dollar company, can anyone challenge them? In the same irreverent style that has made him one of the world's most celebrated business professors, Galloway deconstructs the strategies of the Four that lurk beneath their shiny veneers. He shows how they manipulate the fundamental emotional needs that have driven us since our ancestors lived in caves, at a speed and scope others can't match. And he reveals how you can apply the lessons of their ascent to your own business or career. Whether you want to compete with them, do business with them, or simply live in the world they dominate, you need to understand the Four. Technology is a key driver behind the effects of contemporary globalization on business and other organizations worldwide. innovative technologies and their impact on education. The contributions to this volume are all authored by practicing academics and research students, with the central theme the realisation that learning and teaching are strongly influenced by technology and innovation. Schools, colleges and academic institutes took the lead in harnessing this technology and created innovative opportunities for learning that did not exist before, one of which being the field of e-Learning. One of the latest innovations in education is the introduction of Massive Open Online Courses (MOOCs), which represents an interesting development in the use of technology and innovation by providing opportunities for learning to massive numbers of students (regardless of their location) at almost no cost. This phenomenon is subject to a great deal of analysis in this book, and will provide an interesting read for students, teachers, decision makers and ordinary people. A particular strength of this book is that the contributors are drawn from, and represent, a number of cultural backgrounds, which provides a range of insights that is often missing from other publications on such important subjects.

The economic growth and increasing Internet access within the countries of Brazil, Russia, India, and China (BRIC) is opening new opportunities for companies to reach wider audiences. This study examines these opportunities and assesses how global companies are capitalizing on these emerging markets - in particular, the degree to which digital marketing and social CRM through social networks are being used. For the purposes of this analysis, three German brands are examined in detail - BMW, Adidas, and NIVEA. The book shows that the regular interaction with Internet users and the monitoring of social networks can result in companies experiencing an uplift in both public perception and engagement. Another aspect addressed is the cultural

variance that needs to be taken into account when planning social media activities. The book concludes that the full potential of social media has yet to be utilized within the BRIC countries, and that there is a unique opportunity to be realized by companies. bestseller, Cathy O'Neil, one of the first champions of algorithmic accountability, sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric. We live in the age of the algorithm. Increasingly, the decisions that affect our lives - where we go to school, whether we get a loan, how much we pay for insurance - are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: everyone is judged according to the same rules, and bias is eliminated. And yet, as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and incontestable, even when they're wrong. Most troubling, they reinforce discrimination. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort CVs, grant or deny loans, evaluate workers, target voters, and monitor our health. O'Neil calls on modellers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change.

This book primarily deals with corporate restructuring through mergers and acquisitions (M&As). It critically examines all functions that must be performed in completing an M&A transaction. Domestic and cross-border M&A's are very similar in many respects even though differences between them also exist. The book includes discussions of international finance and multinational financial management, the topics that arise in cross-border M&A transactions. Given the increasing importance of China as the second largest economy in the world and Chinese companies' growing merger and acquisition (M&A) activities globally, we devote the last two chapters of the book to China's outward foreign direct investment and cross-border M&A activities. Moreover, the second volume includes the case studies regarding Chinese foreign direct investment both in Greenfield and acquisition forms give additional insights into challenging tasks of due diligence and post-merger cultural integration that foreign investors face. The M&A literature is a fragmented field of inquiry. The book brings together important, practical insights from this vast literature in a short, but cohesive form that has high managerial relevance.

The New York Times bestselling work of undercover reportage from our sharpest and most original social critic, with a new foreword by Matthew Desmond, author of *Evicted* Millions of Americans work full time, year round, for poverty-level wages. In 1998, Barbara Ehrenreich decided to join them. She was inspired in part by the rhetoric surrounding

welfare reform, which promised that a job—any job—can be the ticket to a better life. But how does anyone survive, let alone prosper, on \$6 an hour? To find out, Ehrenreich left her home, took the cheapest lodgings she could find, and accepted whatever jobs she was offered. Moving from Florida to Maine to Minnesota, she worked as a waitress, a hotel maid, a cleaning woman, a nursing-home aide, and a Wal-Mart sales clerk. She lived in trailer parks and crumbling residential motels. Very quickly, she discovered that no job is truly "unskilled," that even the lowliest occupations require exhausting mental and muscular effort. She also learned that one job is not enough; you need at least two if you int to live indoors. Nickel and Dimed reveals low-rent America in all its tenacity, anxiety, and surprising generosity—a land of Big Boxes, fast food, and a thousand desperate stratagems for survival. Read it for the smoldering clarity of Ehrenreich's perspective and for a rare view of how "prosperity" looks from the bottom. And now, in a new foreword, Matthew Desmond, author of *Evicted: Poverty and Profit in the American City*, explains why, twenty years on in America, *Nickel and Dimed* is more relevant than ever.

An instant New York Times Bestseller! Named a most anticipated book of 2021 by O Magazine, Playbill.com, CNN, Town & Country, and more! A magnificent biography of one of the most protean creative forces in American entertainment history, a life of dazzling highs and vertiginous plunges—some of the worst largely unknown until now—by the acclaimed author of *Pictures at a Revolution* and *Five Came Back* Mike Nichols burst onto the scene as a wunderkind: while still in his twenties, he was half of a hit improv duo with Elaine May that was the talk of the country. Next he directed four consecutive hit plays, won back-to-back Tonys, ushered in a new era of Hollywood moviemaking with *Who's Afraid of Virginia Woolf?*, and followed it with *The Graduate*, which won him an Oscar

and became the third-highest-grossing movie ever. At thirty-five, he lived in a three-story Central Park West penthouse, drove a Rolls-Royce, collected Arabian horses, and counted Jacqueline Kennedy, Elizabeth Taylor, Leonard Bernstein, and Richard Avedon as friends. Where he arrived is even more astonishing given where he had begun: born Igor Peschkowsky to a Jewish couple in Berlin in 1931, he was sent along with his younger brother to America on a ship in 1939. The young immigrant boy caught very few breaks. He was bullied and ostracized--an allergic reaction had rendered him permanently hairless--and his father died when he was just twelve, leaving his mother alone and overwhelmed. The gulf between these two sets of facts explains a great deal about Nichols's transformation from lonely outsider to the center of more than one cultural universe--the acute powers of observation that first made him famous; the nourishment he drew from his creative partnerships, most enduringly with May; his unquenchable drive; his hunger for security and status; and the depressions and self-medications that brought him to terrible lows. It would take decades for him to come to grips with his demons. In an incomparable portrait that follows Nichols from Berlin to New York to Chicago to Hollywood, Mark Harris explores, with brilliantly vivid detail and insight, the life, work, struggle, and passion of an artist and man in constant motion. Among the 250 people Harris interviewed: Elaine May, Meryl Streep, Stephen Sondheim, Robert Redford, Glenn Close, Tom Hanks, Candice Bergen, Emma Thompson, Annette Bening, Natalie Portman, Julia Roberts, Lorne Michaels, and Gloria Steinem. Mark Harris gives an intimate and evenhanded accounting of success and failure alike; the portrait is not always flattering, but its ultimate impact is to present the full story of one of the most richly interesting, complicated, and consequential figures the worlds of theater and motion pictures have ever seen. It is a triumph

'Ulysses' is a novel by Irish writer James Joyce. It was first serialised in parts in the American journal 'The Little Review' from March 1918 to December 1920, and then published in its entirety by Sylvia Beach in February 1922, in Paris. 'Ulysses' has survived bowdlerization, legal action and bitter controversy. Capturing a single day in the life of Dubliner Leopold Bloom, his friends Buck Mulligan and Stephen Dedalus, his wife Molly, and a scintillating cast of supporting characters, Joyce pushes Celtic lyricism and vulgarity to splendid extremes. An undisputed modernist classic, its ceaseless verbal inventiveness and astonishingly wide-ranging allusions confirm its standing as an imperishable monument to the human condition. It takes readers into the inner realms of human

consciousness using the interior monologue style that came to be called stream of consciousness. In addition to this psychological characteristic, it gives a realistic portrait of the life of ordinary people living in Dublin, Ireland, on June 16, 1904. The novel was the subject of a famous obscenity trial in 1933, but was found by a U.S. district court in New York to be a work of art. The furor over the novel made Joyce a celebrity. In the long run, the work placed him at the forefront of the modern period of the early 1900s when literary works, primarily in the first two decades, explored interior lives and subjective reality in a new idiom, attempting to probe the human psyche in order to understand the human condition. This richly-allusive novel, revolutionary in its modernistic experimentalism, was hailed as a work of genius by W.B. Yeats, T.S. Eliot and Ernest Hemingway. Scandalously frank, wittily erudite, mercurially eloquent, resourcefully comic and generously humane, 'Ulysses' offers the reader a life-changing experience. Publisher : General Press
