A Zombie Summer School Diary GENRE: Children's Adventure Book 2: My Science Teacher Is a Witch Ugh, that's how I feel and that's also my name. I'm a Zombie going through an all-monster's summer school. I need to pass three classes this summer if I

want to be able to make it into middle school next year. I already passed one class, a history class taught by a Skeleton. Now I need to pass a science class taught by a witch! I bet this class is going to be crazy, but I know that I'll still need to try my best in class because science isn't exactly my best subject...which could be why I'm in summer school... At least I have my friends Grunt and Snow to help me to stay entertained during and outside of class. They're really great pals, even though Grunt can be temperamental at times. My goals for this class are to pass, with both my brain and friendships intact. This month is going to be intense, I just know it! Book 3: My Gym Teacher Is a Blaze My name is Ugh, and I'm finally in my last month of my all-monsters summer school. I had to sign up for three months of summer school because I failed three classes in school last year. I already passed my history and science classes, but now I have to face my last challenge: gym class. I always skipped gym class during the school year, but now I need to show up every day if I want to pass the class and make it to middle school next year. This won't be easy because my gym teacher is a Blaze. Blazes are known to be pretty hardcore, and I doubt that I can get away with slacking in this class. My best friends, Grunt and Snow, won't even be there to help me because they'll be taking different classes this month. I'll have to make new friends or go at this alone if I want to make it through the month. I'm just wondering if a Zombie like me has what it takes to get through a gym class taught by a tough Blaze. I guess that I'll find out while I write this diary! Author's Note: This short story is for your reading pleasure. The characters in this "Minecraft Adventure Series" such as Steve, Endermen or Herobrine...etc are based on the Minecraft Game coming from Minecraft (r)/TM & (c) 2009-2013 Mojang / Notc

Technology has become a major component of today's classroom environment. Teachers are using new methods like makerspaces in order to engage their students. Makerspaces refer to tools students can use to explore, discover, and create new ideas and concepts using technology. This book will focus on makerspace projects that will help students with math. Complete with detailed directions and examples, this easy-to-read guide will focus on new methods of learning and mastering mathematical concepts. At last there's a way to make math fun and hands-on using the latest tools and technology.

Create 25 amazing projects with 3D printing! With 3D Printing and Maker Lab for Kids, you can explore the creative potential behind this game-changing technology. Design your projects using free browser-based versions of CAD software Tinkercad and SketchUp. Follow the simple steps to create a variety of different projects. Learn about the fascinating science behind your creations. Get guidance on organizing team activities and contests. The popular Lab for Kids series features a growing list of books that share hands-on activities and projects on a wide host of topics, including art, astronomy, clay, geology, math, and even how to create your own circus—all authored by established experts in their fields. Each lab contains a complete materials list, clear step-by-step photographs of the process, as well as finished samples. The labs can be used as singular projects or as part of a yearlong curriculum of experiential learning. The activities are open-ended, designed to be explored over and over, often with different results. Geared toward being taught or guided by adults, they are enriching for a range of ages and skill levels. Gain firsthand knowledge on your favorite topic with Lab for Kids. Be a part of the future with 3D Printing and Maker Lab for Kids!

Includes a variety of creative exercises that explore the aspects of Minecraft and use them to teach fun, educational lessons.

Little Learning Labs: Unofficial Minecraft for Kids--an abridged edition of Unofficial Minecraft Lab for Kids--offers a variety of creative exercises that explore the game through fun, educational lessons. Activities selected from an Amazon Best Kids' Books of 2016 pick! Balancing your child's screen time can be difficult, especially when it comes to wildly popular, open-ended video games like Minecraft. Minecraft offers players an environment focused on exploration, imagination, and creation, but its nonlinear game structure can mean spending a lot of time in the game. You will start the book by brushing up on some common Minecraft terminology and examining the two main modes of game play: creative and survival. You'll then use this knowledge to venture off onto the six different quests that combine out-of-game and in-game activities and encourage child and adult participation. You'll even learn how to screencast and narrate your own videos to share with family and friends. Little Learning Labs: Unofficial Minecraft for Kids provides fun, educational gaming goals that you and your child can reach together!

can't resist sneaking a peek at it while all of the other kids are outside watching a rare solar eclipse. But when Jack finds himself suddenly transported INTO his familiar Minecraft world--real life body and all--the boy finds that he's gotten into a VR gaming experience that is a little TOO real!Minecraftians Steve and Alex live a pretty peaceful life in their mountain home that Alex built around a mysterious anomaly she called 'the Divining Pool'. One day while repairing some creeper damage to their animal pens from the night before, Alex is perplexed when the sky suddenly darkens and a shadow passes over the sun. The Divining Pool offers cryptic words about the arrival of the Weird Walker, and when she and Steve go looking for their missing sheep, they find a strange creature like nothing they've ever seen in their blocky world before...Season 1 Episode 2 One Block at a TimeJack is stuck in a video game! And not just any video... game. He's stuck in his own modded version of Minecraft in a new world he created called 'Vortexia' moments before a solar flare back in the real world somehow transported him into his school's new virtual reality system! Being inside this pixelated world is weird--Jack is a real boy with a real flesh and blood body surrounded by a digital world! It's a darned good thing that he ran into the famous Steve and Alex. Otherwise, he probably wouldn't survive the first night!As Jack struggles to cope with being trapped in the game he loves without an inventory or crafting menu and missing critical controls that a player would normally have on a keyboard, how will the boy survive if he's reduced to working with one block at a time When a seemingly easy task of helping Alex and Steve gather some lost sheep becomes a lot more difficult than Jack anticipated, will the real boy--the Weird Walker--manage to cope with this bizarre, new world? And what wacky messages will the Divining Pool have in store for the trio today...?Season 1 Episode 3 Save the Village!(Description Inside)Season 1 Episode 4 Shifting Sands(Description Inside)Season 1 Episode 5 The Quest for Iron(Description Inside)Season 1 Episode 6 Unwanted GuestsThe Season ONE Finale!!(Description Inside)Love Minecraft adventure Buy this BUNDLE of books and read the "Skeleton Steve the Noob Years" Season One TODAY!Join the Skeleton Steve Club! Introduce kids to stop-motion animation and animated filmmaking. Animation is everywhere--from movies and TV to apps and video games--and today's tech-savvy kids know all about it. With the accessibility and ease of use of cameras and video-editing software, people of all ages are learning how to make stop-motion animation. In "Animation Lab for Kids," artists, teachers, and authors Laura Bellmont and Emily Brink present exciting, fun, hands-on projects that teach kids a range of animation techniques. From the classic zoetrope, flip book, and cel methods (which don't require any devices or technology) to different methods of shooting, the lessons require no previous experience for either child or adult. Experimenting with a variety of art materials (drawing, clay, and paper cut-outs), young animators will learn to plan a film through writing, storyboarding, and creating sets. The book also features helpful and informative sidebars on the history of the early animation techniques as well as the inspiring work of innovative and influential animators, including Kirsten Lepore, PES, Hailey Morris, and William Kentridge. The authors are co-founders and lead teachers of The Good School, an arts-education school that cultivates and combines traditional art-making skills and the technologies involved in stop-motion animation filmmaking. They teach animation techniques at camps, schools, and events, including the New York International Children's Film Festival.
