Calling it 'a virtual cinemath'que on video', the Telluride Film Festival gave its coveted Silver Medallion award to Facets Video Encyclopedia. The Encyclopedia lists more than 35,000 rare films on video, laser disc and DVD. Included are foreign, independent, classic American, silent, documentary, experimental, cult and children's films. Each is carefully described and lists director, country of origin, year and running time credits and is categorized and cross-referenced by director and country. All films are available for sale or rent from Facets Multimedia.

Smart. Funny. Fearless."It's pretty safe to say that Spy was the most influential magazine of the 1980s. It might have remade New York's cultural landscape; it definitely changed the whole tone of magazine journalism. It was cruel, brilliant, beautifully written and perfectly designed, and feared by all. There's no magazine I know of that's so continually referenced, held up as a benchmark, and whose demise is so lamented" --Dave Eggers. "It's a piece of garbage" --Donald Trump.

In Touch, Laura U. Marks develops a critical approach more tactile than visual, an intensely physical and sensuous engagement with works of media art that enriches our understanding and experience of these works and of art itself. These critical, theoretical, and personal essays serve as a guide to developments in nonmainstream media art during the past ten years -- sexual representation debates, documentary ethics, the shift from analog to digital media, a new social obsession with smell. Marks takes up well-known artists like experimental filmmaker Ken Jacobs and mysterious animators the Brothers Quay, and introduces groundbreaking, lesser-known film, video, and digital artists. From this emerges a materialist theory -- an embodied, erotic relationship to art and to the world. Marks's approach leads to an appreciation of the works' mortal bodies: film's volatile emulsion, video's fragile magnetic base, crash-prone Net art; it also offers a productive alternative to the popular understanding of digital media as "virtual" and immaterial. Weaving a continuous fabric from philosophy, fiction, science, dreams, and intimate experience, Touch opens a new world of art media to readers.

Using an interdisciplinary framework, this book offers a fresh perspective on the issues of diaspora culture and border crossings in the films, popular cultures, and media and entertainment industries from the popular Hindi cinema of India. It analyses and discusses a range of key contemporary films in detail, such as Veer Zaara, Jhoom Barabar Jhoom, and Dostana. The book uses the notion of travel analytically in and through the cinema to comment on films that have dealt with Indo-Pak border crossings, representations of diaspora, and gender and sexuality in new ways. It engages with common sense assumptions about everyday South Asian and diasporic South Asian cultures and representations as expressed in Bollywood cinema in order to look at these issues further. Moving towards an innovative exploration beyond the films, this book charts the circuits and routes of Bollywood as

South Asian club cultures in the diaspora, and Hindi cinema entertainment shows around the world, as well as its impact on social media websites. Bollywood Travels is an original and thought provoking contribution to studies on Asian Culture and Society, Sociology, World Cinema, and Film, Media and Cultural Studies.

"A testament to the synergy of two evolving fields. From the study of staged performances to examinations of the performing body in everyday life, this book demonstrates the enormous profitability of moving beyond disability as metaphor. . . . It's a lesson that many of our cultural institutions desperately need to learn." -Martin F. Norden, University of Massachusetts-Amherst This groundbreaking collection imagines disabled bodies as "bodies in commotion"-bodies that dance across artistic and discursive boundaries, challenging our understanding of both disability and performance. In the book's essays, leading critics and artists explore topics that range from theater and dance to multi-media performance art, agit-prop, American Sign Language theater, and wheelchair sports. Bodies in Commotion is the first collection to consider the mutually interpretive qualities of these two emerging fields, producing a dynamic new resource for artists, activists, and scholars.

"The FLOTUS Effect" emphasizes the import of agency on the part of Michelle Obama in relation to her politics as evidenced in her positionality and presence as the first African American woman to serve as First Lady of the United States of America. Her occupation of a previously white space and place tended to frame her as an enigma in the American mind and media. Contributors reflect on Mrs. Obama's eight years in her ceremonial position, and the ways she chose to uniquely embody her role. Hence, the result is a volume that speculates upon her evolving legacy, and the likely "effects" of what it meant to be the first African-American woman to serve in the ceremonial, yet powerful, role of FLOTUS.

New technologies are radically changing the way that families connect with one another: we can text our teenagers from work, eat dinner with far-away parents via video link, and instantly upload and share photos after a family day out. Whether we are bridging time or distance, and whether we are enhancing our closest relationships or strengthening the bonds of extended family, as computer technologies alter the communication landscape, they in turn are changing the way we conduct and experience family life. This state of the art volume explores the impact of new communication systems on how families interact – how they share their lives and routines, engage in social touch, and negotiate being together or being apart – by considering a range of different family relationships that shape the nature of communication. Composed of three sections, the first looks at what is often the core of a 'family', the couple, to understand the impact of technology on couple relationships, communication, and feelings of closeness. The second section studies immediate families that have expanded beyond just the individual or couple to include children. Here, the emphasis is on connection for communication, coordination, and play. The third section moves beyond the immediate family to explore connections between extended, distributed family members. This includes connections between adult children and their parents, grandparents and grandchildren, and adult siblings. Here family members have grown older, moved away from 'home', and forged new families. Researchers, designers and developers of new communication technologies will find this volume invaluable. Connecting Families: The Impact of New Communication Technologies on Domestic Life brings together the most up-to-date studies to help in understanding how new communication technologies shape – and are shaped by – family life, and offers inspiration and guidance for design by making clear what families need and value from technological systems.

What does it take to stand out from the crowd? How do you build a brand people notice, connect with, and trust? What does it really take to get (and keep) a constant flow of incoming and loyal customers and opportunities? In *CRAVED*, Keli Hammond walks you through the ins and outs of building a brand that is not only noticed, but sought-after and profitable. She uncovers the key elements needed to craft cohesive and clever marketing campaigns and demystifies the components needed to gain influence and be memorable. In this book, Hammond combines decades of award-winning industry knowledge with helpful stories and advice that illustrates what not to do in brand building. She walks you through how to build a loyal tribe that advocates for you and endorses you. Because marketing rules change quickly, the things that worked five years ago are now outdated and old-fashioned. The guidance you get from *CRAVED* will help you elevate your profile, attract more people to you, monetize your influence, and set the stage for long-term profit for your personal brand or business. Whether you're just starting out or you've been at this for a while, this is the resource you need to help make your entrepreneurial dreams a reality. Transform your life by strategically creating a brand people CRAVE.

This funny, charming story is the perfect way to introduce young children to teasing, and help them find ways to build empathy. Also included are suggestions for activities and ideas to talk through together to help children understand their behaviour. Llama thinks it is funny to tease others. He whispers about them and makes fun of them. But when his friends say they don't want to play with him any more, Llama is upset. Can he start treating others more kindly?

Illustrations and rhyming text present animals in silly situations, such as a pig in a wig and a moose drinking juice, along with a reminder not to tease.

Jargon buster: convergent journalism: ?Media convergence is the most significant development in the news industry in the last century. The ability to interchange text, audio, and visual communication over the Internet has fundamentally transformed the way news organizations operate. Convergence has enabled media companies to gather, disseminate, and share information over a variety of platforms. Throughout the history of journalism, it has been common for journalists to study one medium, such as traditional print or broadcast, and to anticipate a career working only in their chosen field. However, the 21st century journalist has fluidity to write and deliver news content in a variety of formats. (source: <http://www.convergencejournalism.com/>) Broadcast News Writing, Reporting, and Producing presents a solid foundation for any student learning how to become a broadcast journalist ? in today's world of convergent journalism, it is more important than ever that broadcast textbooks cover the most current trends in media. Convergent journalism (the coverage of news across multiple delivery platforms such as the internet, television, podcasts, ipods, blogs, etc) is here to stay ? broadcast journalism continues to morph as newer and more advanced content platforms are hatched and developed, and broadcast journalists must understand how to write, report, and produce for multiple platforms simultaneously. Just one crucial fact remains: students will need training on how to perform successfully in a world in which current events aren't just shown on the ten o'clock evening news. Broadcast News Writing, Reporting, and

Producing will be completely overhauled to reflect the trends of convergent journalism on every page. New co-author Frank Barnas brings a multi-faceted perspective of writing, reporting, and producing that allows for multi-platform delivery systems, and shows students with real-world examples the functions and practices of today's media. The new edition will be rewritten and restructured to accommodate common 16-week course modules, and will be divided into four major sections of the news: gathering, writing, reporting, and producing. Sidebars featuring how examples used in the text relate to convergence in journalism help students to draw connections easily between current stories and trends in the industry. The comprehensive approach of this text brings a multi-faceted perspective of writing, reporting, and producing that is needed more than ever in today's world of convergent journalism. This newest edition is being completely overhauled by the experienced journalist Frank Barnas. New photos and illustrations, a restructuring of the text, expanded end-of-chapter exercises, newer and more relevant examples, and more information on producing all contribute to giving readers what they need most: a nuanced understanding of how the media of today function in a world without news boundaries.

Seeking ways to understand video games beyond their imperial logics, Patterson turns to erotics to re-invigorate the potential passions and pleasures of play. Video games vastly outpace all other mediums of entertainment in revenue and in global reach. On the surface, games do not appear ideological, nor are they categorized as national products. Instead, they seem to reflect the open and uncontaminated reputation of information technology. Video games are undeniably imperial products. Their very existence has been conditioned upon the spread of militarized technology, the exploitation of already-existing labor and racial hierarchies in their manufacture, and the utopian promises of digital technology. Like literature and film before it, video games have become the main artistic expression of empire today: the open world empire, formed through the routes of information technology and the violences of drone combat, unending war, and overseas massacres that occur with little scandal or protest. Though often presented as purely technological feats, video games are also artistic projects, and as such, they allow us an understanding of how war and imperial violence proceed under signs of openness, transparency, and digital utopia. But the video game, as Christopher B. Patterson argues, is also an inherently Asian commodity: its hardware is assembled in Asia; its most talented e-sports players are of Asian origin; Nintendo, Sony, and Sega have defined and dominated the genre. Games draw on established discourses of Asia to provide an "Asiatic" space, a playful sphere of racial otherness that straddles notions of the queer, the exotic, the bizarre, and the erotic. Thinking through games like *Overwatch*, *Call of Duty 4: Modern Warfare*, *Shenmue II*, and *Alien: Isolation*, Patterson reads against empire by playing games erotically, as players do—seeing games as Asiatic playthings that afford new passions, pleasures, desires, and attachments.

Proposes an “intra-cultural philosophy” based on John Dewey’s “cultural turn” and promotes Daoist thought as a resource that can help to reconstruct outmoded assumptions that continue to shape how we currently think. In this timely and original work, Dewey’s late-period “cultural turn” is recovered and “intra-cultural philosophy” proposed as its next logical step—a step beyond what is commonly known as comparative philosophy. The first of two volumes, *John Dewey and Daoist Thought* argues that early Chinese thought is poised to join forces with Dewey in meeting our most urgent cultural needs: namely, helping us to correct our outdated Greek-medieval assumptions, especially where these result in pre-Darwinian inferences about the world. Relying on the latest research in both Chinese and American philosophies, Jim Behuniak establishes “specific philosophical relationships” between Dewey’s ideas and early Daoist thought, suggesting how, together, they can assist us in getting our thinking “back in gear” with the world as it is currently known through the biological, physical, and cognitive sciences. Topics covered include the organization of organic form, teleology, cosmology, knowledge, the body, and technology—thus engaging Dewey with themes generally associated with Daoist thought. Volume one works to establish “Chinese natural philosophy” as an empirical framework in which to consider cultural-level phenomena in volume two. Jim Behuniak is Professor of Philosophy at Colby College. He is the author of *John Dewey and Confucian Thought: Experiments in Intra-cultural Philosophy, Volume Two* and *Mencius on Becoming Human*, both also published by SUNY Press.

Breaking and entering has never been one of Harlee Davis's sins, but that's about to change when she falls asleep in a stranger's bed while seeking refuge from the storm raging outside and the one created by her screwed-up life. When Jake Reynolds returns home late at night, the last thing he expects is a curvy blond Goldilocks warming his sheets. Instead of throwing the intruder out on her fine ass, he hires her to organize his disorganized construction office. When his wealthy family meets the polyester siren posing as Jake's assistant, they fear he's slipped back into his bad boy ways. After Harlee discovers that Jake plans to demolish the very camp she's been entrusted to preserve, she mounts a crusade. They wage a war of wills battling their conflicting interests on a professional level and too much interest on a sexual level, and one of them stands to lose everything in a game where there may not be a winner. *San Juan Islands, Small Town Romance, Washington, Blue Collar Hero*, hot contemporary romance

Why we need a daily dose of touch: an investigation of the effects of touch on our physical and mental well-being. Although the therapeutic

benefits of touch have become increasingly clear, American society, claims Tiffany Field, is dangerously touch-deprived. Many schools have “no touch” policies; the isolating effects of Internet-driven work and life can leave us hungry for tactile experience. In this book Field explains why we may need a daily dose of touch. The first sensory input in life comes from the sense of touch while a baby is still in the womb, and touch continues to be the primary means of learning about the world throughout infancy and well into childhood. Touch is critical, too, for adults' physical and mental health. Field describes studies showing that touch therapy can benefit everyone, from premature infants to children with asthma to patients with conditions that range from cancer to eating disorders. This second edition of *Touch*, revised and updated with the latest research, reports on new studies that show the role of touch in early development, in communication (including the reading of others' emotions), in personal relationships, and even in sports. It describes the physiological and biological effects of touch, including areas of the brain affected by touch, and the effects of massage therapy on prematurity, attentiveness, depression, pain, and immune functions. Touch has been shown to have positive effects on growth, brain waves, breathing, and heart rate, and to decrease stress and anxiety. As Field makes clear, we enforce our society's touch taboo at our peril.

Reading has arguably the longest and richest history of any domain for scientifically considering the impact of technology on the user. From the 1920s to the 1950s, Miles Tinker [1963] and other researchers ran hundreds of user tests that examined the effects of different fonts and text layout variables, such as the amount of vertical space between each line of text (called leading). Their research focused on user performance, and reading speed was the favoured measure. They charted the effect of the manipulated variables on reading speed, looking for the point at which their participants could read the fastest. Their assumption was that faster reading speeds created a more optimal experience. Printers and publishers eagerly consumed this research. In recent years, some of these variables have been reexamined as the technology and capabilities evolve with the advent of computers and computer screens. Dillon [1992] examined how to design textual information for an electronic environment. Boyarski et al. [1998] examined the effect of fonts that were designed for computer screens. Dyson & Kipping [1998] examined the effect of line length on computer screens. Larson et al. [2000] examined the effect of 3-D rotation on reading. Gugerty et al. [2004] demonstrated a reading performance advantage with the Microsoft ClearType display technology.
