This paper provides an assessment of the consistency of unemployment and output forecasts. We show that, consistent with Okun's Law, forecasts of real GDP growth and the change in unemployment are negatively correlated. The Okun coefficient—the responsiveness of unemployment to growth—from forecasts is fairly similar to that in the data for various countries. Furthermore, revisions to unemployment forecasts are negatively correlated with revisions to real GDP forecasts. These results are based on forecasts taken from Consensus Economics for nine advanced countries since 1989.

This book presents a comprehensive survey of the Indian Economy in terms of GDP growth, savings, investment and developments in various sectors such as agriculture, industry and services. A contradiction observed in India is that while the reform process has resulted in boosting GDP growth, it has failed to yield acceleration in the process of poverty reduction and growth of employment. crisis of 1997–98, monetary issues in Asia have acquired great significance as the region holds the largest reserves in the world and consequently plays a major role in the global macro-economy. In addition, there are also a great variety of monetary policy regimes at play in the region – reflecting each country's needs and policy preferences. This volume explores monetary, exchange rate and macroeconomic policies in Asia. A particular question that is analysed is Asia's experience since the crisis with the use of monetary policy to manage the resurgence in capital inflows. It also examines the theoretical and policy issues associated with international capital flows, the increasing degree of integration of financial markets and exchange rates for emerging Asian economies. The book is unique in focussing on China, India and Southeast Asia, rather than just having a sub-regional or country-specific focus. Rigorous empirical analysis is applied to important practical policy issues. The book also provides accessible overviews of recent research relevant to the questions that are explored and is written throughout in a manner that is accessible to policy makers, students and business/financial journalists.
