With wit, colour and clarity, What A Wonderful World quickly and painlessly brings us up to speed on how the world of the 21st century works. From economics to physics and biology to philosophy, Marcus Chown explains the complex forces that shape our universe. Why do we breathe? What is money? How does the brain work? Why did life invent sex? Does

time really exist? How does capitalism work - or not, as the case may be? Where do mountains come from? How do computers work? How did humans get to dominate the Earth? Why is there something rather than nothing? In *What a Wonderful World*, Marcus Chown, bestselling author of *Quantum Theory Cannot Hurt You* and the *Solar System* app, uses his vast scientific knowledge and deep understanding of extremely complex processes to answer simple questions about the workings of our everyday lives. Lucid, witty and hugely entertaining, it explains the basics of our essential existence, stopping along the way to show us why the Atlantic is widening by a thumbs' length each year, how money permits trade to time travel why the crucial advantage humans had over Neanderthals was sewing and why we are all living in a giant hologram.

Carl Rhodes examines the implicit power of writing and authorship that is at play when people and organisations are (re)presented in research. To explore this, the book reports a research project in the area of organisational storytelling that investigates how people in one organisation used stories to (re)present their own learning experiences from the implementation of a quality management program. This research is written in three principal genres: autobiography, ethnography and a fictional short story. These (re)presentational strategies are reviewed to examine how different genres effect authority in different ways. Drawing extensively on the work of Mikhail Bakhtin and on writers associated with postmodernism and poststructuralism, the book offers a challenging discussion of what organisational research might be when the notion of the equivalence of reality and representation is radically questioned.

*Would You Lie to Save a Life? Love Will Find a Way Home: A Theology on the Ethics of Love* In 1968, Commander Lloyd Bucher and the USS *Pueblo* were pirated on the high seas. They were held captive for 11 months, and Bucher was forced to sign a confession – forced to lie to save the lives of his men. How does Love impact that decision in a Christian theology? Love makes the world go round. Without Love, little else has value this side of heaven. In this dilemma between Love and Truth, Love was chosen over Truth, but not at the expense of all Truth. Between the deontological and teleological elements, time itself comes into play in the determination of the absolute "rightness" of the choice in perfect Love. How is as capable as Jesus was and is today? The course of Love is a sacred "stewardship of time" that is the highest exhibition of the Christian's own *Imago Dei* or image of God granted to us in creation. When we are able to follow the Scarlet Thread of obedience perfectly, it will lead straight through all of (1) the areas of complexity, uniting (2) all of the demands of all of the absolutes and run dead center between (3) all of the ethical fine lines. These three areas are detailed specifically.

This book provides scholars, educators, and legislators with a personal, classroom-level tour of daily life at a community college. Readers will accompany the author into the classroom as he goes about his work as an English teacher meeting with classes and corresponding with students on Blackboard and e-mail. Answering the call for "student-centered scholarship", this book blends traditional academic writing with chapters that feature a rich variety of student work, including essays, journal entries, poems, art, and responses to creative assignments. In this volume, Sullivan theorizes the modern community college as a social justice institution: by mission and mandate, the modern community college has democratized America's system of higher education and distributed hope, equity, and opportunity more broadly across the nation. Patrick Sullivan is Professor of English at Manchester Community College, USA.

Many Bible studies about knowing God are too mechanical and systematic. Using "story theology" to highlight God's character, Christians will be introduced to a different approach for desiring spiritual intimacy and transformation. Go Deeper invites you to explore your relationship with God by placing yourself into the biblical narratives. Readers will encounter God, who passionately pursues us with His sovereignty, holiness, presence, grace, and love.

Why is it that only flowers bloom? What if a duck became an egret? Why do parrots look alike but butterflies are all different? What if sea water turned sweet and rivers became salty? These wonderful questions which bubble in the curious minds of children, may not have ready or obvious answers and can at times try the patience of a teacher or parent. They spring from developing powers of observation and supple imagination, and an effort to provide inherent logic to the scheme of things that dominate the world of adults. As parents and teachers, we need to understand and match the answers to the questions which emerge from free minds and unadulterated observation. Then adults too, can share these wonderful constructs, which are in fact, the 'truths of wonderland'. What a Wonderful World provides a generous helping of such truths- to nurture and delight the child in us all.
