Long Beach Press-Telegram writer Tim Grobaty was promoted to columnist at his newspaper back when it was still a glamorous and coveted job. In I'm Dyin' Here, the author means two things: He'll likely die at the job that he's spent nearly four decades doing, and at the same time his profession, too, is seeing its last days. Weaving together personal history and a selection of columns written over the course of his storied career, Grobaty offers readers a rare glimpse into the inner workings of a dying breed: the local columnist. With everyday life — fatherhood, holidays, suburbia, and random encounters with animals — serving as fodder for his column, Grobaty reveals his sources of motivation and vulnerability, all the while struggling to maintain relevance in a rapidly changing industry.

Foundational Hands-On Skills for Succeeding with Real Data Science Projects This pragmatic book introduces both machine learning and data science, bridging gaps between data scientist and engineer, and helping you bring these techniques into production. It helps ensure that your efforts actually solve your problem, and offers unique coverage of real-world optimization in production settings. –From the Foreword by Paul Dix, series editor

Machine Learning in Production is a crash course in data science and machine learning for people who need to solve real-world problems in production environments. Written for technically competent “accidental data scientists” with more curiosity and ambition than formal training, this complete and rigorous introduction stresses practice, not theory. Building on agile principles, Andrew and Adam Kelleher show how to quickly deliver significant value in production, resisting overhyped tools and unnecessary complexity. Drawing on their extensive experience, they help you ask useful questions and then execute production projects from start to finish. The authors show just how much information you can glean with straightforward queries, aggregations, and visualizations, and they teach indispensable error analysis methods to avoid costly mistakes. They turn to workhorse machine learning techniques such as linear regression, classification, clustering, and Bayesian inference, helping you choose the right algorithm for

each production problem. Their concluding section on hardware, infrastructure, and distributed systems offers unique and invaluable guidance on optimization in production environments. Andrew and Adam always focus on what matters in production: solving the problems that offer the highest return on investment, using the simplest, lowest-risk approaches that work. Leverage agile principles to maximize development efficiency in production projects Learn from practical Python code examples and visualizations that bring essential algorithmic concepts to life Start with simple heuristics and improve them as your data pipeline matures Avoid bad conclusions by implementing foundational error analysis techniques Communicate your results with basic data visualization techniques Master basic machine learning techniques, starting with linear regression and random forests Perform classification and clustering on both vector and graph data Learn the basics of graphical models and Bayesian inference Understand correlation and causation in machine learning models Explore overfitting, model capacity, and other advanced machine learning techniques Make informed architectural decisions about storage, data transfer, computation, and communication Register your book for convenient access to downloads, updates, and/or corrections as they become available. New York Times bestselling author, K. Bromberg, is back with a new Kincade sister and a swoon-worthy football player in an all new standalone romance that will make you believe in first crushes and true love. I've signed numerous players to my family's agency—I assumed winning over my next client would be just as easy. The last thing I expected was to run into the boy who took my first kiss and broke my heart: only now Drew Bowman is all grown up. Sexy. Scandal-tainted. Second-string. The crush I never got over. I tell myself work is the reason I can't get him out of my head. I tell him his talent far outweighs his position, and I know I can help. I lie and lie, because admitting that I want a second chance at my first love is impossible. Some lines cannot be crossed, and ours was drawn in the sand years ago. *** I'm supposed to hate her. I've been told so time and again for ten years - her father ruined our family, smeared my name before my career even began. But that's not what I'm feeling now. Brexton Kincade just strode out of my memories and onto my field. Driven. Determined. Grown

the game with Wayne Stewart's *You're the Ref*. *You're the Ref* is divided into three exciting sections. "Routine Calls" deals with scenarios and rules which typically come up in games and deals with clear cut rules—out of bounds calls, holding, pass interference. "Basic Situations" deals with matters and rules that are just a bit more unusual or, for the casual fan, more obscure—illegal man downfield, for example, isn't a call you see every game, but it remains a rule that referees and many fans know quite well. In the final section, you can put your knowledge to the test. You'll be presented with what many football people call "knotty" problems. Here you will be asked questions involving the complex "tuck rule," the difference between roughing and running into the kicker, and other arcane matters. Most of the situations in this book come from real games, but some scenarios are made up to illustrate specific points or rules. *You're the Ref* is the ultimate test of your refereeing skills and knowledge.

Have you come to the point where you think something needs to be done in order to bring sports back to their original purpose? Based on his experiences in Upstate New York as a father of two athletes, a college professor, a coach, and a sports administrator, Bruce Svare examines the failings of our present sports culture. *Reforming Sports Before the Clock Runs Out* is both an expose on what ails our sports culture as well as a call for corrective action by all segments of our society.
