With flaps to lift on every page, this delightful and funny book answers the questions that all young children ask about poo! From what is poo, to how much poo can an elephant do? This new series from Usborne presents information for the very youngest children in a fun, interactive way, using children's questions as a starting point for some interesting and entertaining discussions. 'What are germs?' and 'What are stars?' will follow.

An engaging introduction for very young children to the basic facts of life in a way that is gentle, age-appropriate and accessible. Child psychologist Dr. Jillian Roberts created the Just Enough series to help parents and caregivers approach difficult subjects with little ones. These primers offer a gentle and accessible starting point for conversations about important topics. Research shows that children are learning about sex at an increasingly young age and often from undesirable sources. The Q&A format, with questions posed in the child's voice and answers starting simply and becoming gradually more in-depth, allows the adult to guide the conversation to a natural and satisfying conclusion. Additional questions at the back of the book allow for further

Everyone agrees parents must talk to their children about sex, but the questions always arise: How do I start? What should I cover? *Ten Talks* offers advice on exactly how to begin and what to say -- not just about sex, but about safety, character, peer pressure, ethics, meeting people on the internet, and mixed messages from TV. *Ten Talks* is based on innovative and proven approaches that the authors are using in parent workshops across the country. The talks can be adapted for all kinds of families and offer immeasurable rewards, strengthening the relationships of parents and children. This innovative and illustrated book helps prepare kids for the complex world of relationships, sex, and growing up.

"For several decades, the field of bioethics has played a dominant role in shaping the

way society thinks about ethical problems related to developments in science, technology, and medicine. But its traditional emphases on, for example, doctor-patient relationships, informed consent, and individual autonomy have led the field to not be fully responsive to the challenges posed by new human biotechnologies such as assisted reproduction, human genetic enhancement, and DNA forensics. Beyond Bioethics provides a focused overview for students and others grappling with the profound social dilemmas posed by these developments. It brings together the work of cutting-edge thinkers from diverse fields of study and public engagement, all of them committed to a new perspective that is grounded in social justice and public interest values. The contributors to this volume seek to define an emerging field of scholarly, policy, and public concern: a new biopolitics."--Provided by publisher.

Geared to readers from preschool to age eight, *What Makes a Baby* is a book for every kind of family and every kind of kid. It is a twenty-first century children's picture book about conception, gestation, and birth, which reflects the reality of our modern time by being inclusive of all kinds of kids, adults, and families, regardless of how many people were involved, their orientation, gender and other identity, or family composition. Just as important, the story doesn't gender people or body parts, so most parents and families will find that it leaves room for them to educate their child without having to erase their own experience. Written by a certified sexuality educator, Cory Silverberg, and illustrated by award-winning Canadian artist Fiona Smyth, *What Makes a Baby* is

By the age responses to tough questions kids ask parents about sex (for parents of kids aged 3 -14)

A creature wonders where his strange younger sibling came from--a squeaking, leaking baby that should surely be set free.

Why cracking the code of human conception took centuries of wild theories, misogynist blunders, and ludicrous mistakes Throughout most of human history, babies were surprises. People knew the basics: men and women had sex, and sometimes babies followed. But beyond that the origins of life were a colossal mystery. The Seeds of Life is the remarkable and rollicking story of how a series of blundering geniuses and brilliant amateurs struggled for two centuries to discover where, exactly, babies come from. Taking a page from investigative thrillers, acclaimed science writer Edward Dolnick looks to these early scientists as if they were detectives hot on the trail of a bedeviling and urgent mystery. These strange searchers included an Italian surgeon using shark teeth to prove that female reproductive organs were

not 'failed' male genitalia, and a Catholic priest who designed ingenious miniature pants to prove that frogs required semen to fertilize their eggs. A witty and rousing history of science, *The Seeds of Life* presents our greatest scientists struggling-against their perceptions, their religious beliefs, and their deep-seated prejudices-to uncover how and where we come from. **MINI TREASURES:** delightful mini picture books to treasure forever. **MUMMY LAID AN EGG** Mum and Dad decide it's time to tell the kids about the facts of life. But do they dare? And do they really know everything about the birds and the bees?

Using simple text this mini book offers an introduction to where babies come from, written with the aim of helping to answer children's questions. It is one of a series of books about the natural and scientific world which offers safe and easy experiments to help clarify explanations. Without delving into the realm of sexual intercourse, a guide answers preschoolers' commonly asked questions about reproduction, birth, and the difference between the sexes through simple text and illustrations.

A latest entry in the series that includes *It's NOT the Stork!* follows the adventures of young Gus and Nellie, who watch their mother's pregnancy and anticipate the arrival of a new sibling while learning engaging facts about how unborn babies develop.
