The craft, the science and the loving art of flogging... by a 30-year veteran master flogger! Possible the most popular activity in the erotic power exchange lexicon, flogging offers sensations ranging from gentle massage through tearing agony. Leatherman/educator Joseph W. Bean explains how to choose a flogger, negotiate a scene, read your partner's mental and physical state, select patterns and strokes to create a palette of sensation, and much more!

"Designed to help the beginning leather braider acquire basic skills in a straightforward manner, this book shows readers how to braid simple projects fairly quickly. With close attention to detail and a little practice using the methods described here, novices can produce attractive and enduring items from either precut lace or from a skin or side of leather. Leather braiding was developed in Australia in whipmaking shops. The craft had been carried to Australia by thongmakers from England, who were familiar with the thongs used on finely braided carriage whips. Kangaroo leather, one of the finest leathers available for braiding, provided the material for high-quality work, and a large and discriminating market in Australia led to improvements in techniques. Using these highly refined techniques and providing complete instructions and clear closeup photographs showing each step in the process, David Morgan has created an excellent book for those who want to learn to braid leather. A metallurgical engineer by training and occupation, in the 1960s Morgan became interested in Australian braided work made from kangaroo hide. With his wife he set up a part-time mail-order business selling a variety of Australian imports. In the 1980s he made the whips for the Indiana Jones movies, and he has been making them

ever since. By 1990 he had abandoned metallurgy to run the mail-order business full time. He is now following an interest in the historical aspects of cattle-working whips."--Wheelers.co.nz.

Uses and types, design and construction, use of whips, plaiting.

From homemade horsewhips to fancy carriage whips, braided leather straps have worked to move our country (and our livestock) forward. Author , in his new book, *Whips of the West, An Illustrated History of American Whipmaking*, shows how whipmaking and the industrial revolution intertwined. Morgan illustrates inventions that have revolutionized the whipmaking industry and analyzes important points in American history including the crowning of whips city of the world. With more than four decades of whipmaking experience, including creating the famous Indiana Jones whips, David W. Morgan is a whipmaking expert. *Whips of the West, An Illustrated History of American Whipmaking* is a valuable addition to your leathercraft and American History book collections.

Ron Edwards was born in Australia in 1930 and brought up in the country where small farmers still plowed with horses and harvested their half acres with sickles and scythes, and larger properties relied on the annual visit of the steam-driven threshing machines. By the 1940s all this had vanished, and Edwards had realized that the countrys traditional crafts also were disappearing. He began making drawings and notes of them and published these materials in his native country. *How to Make Whips* is the American edition of his ninth book. The first section gives instructions for a basic eight-strand whip; the second deals with the making of fine kangaroo hide whips. Other chapters explain the making of bullwhips, snake whips, and whips made from precut lace. Also included are instructions on plaiting names in whips and using plaiting designs for whip handles.

The incredible story behind the founder of Noble & Noble and cofounder of Barnes & Noble comes to life in this compelling biography of G. Clifford Noble. From his humble beginnings as a poor country boy to the co-owner of the most prestigious bookstore chain in the country, *The Noble Legacy* celebrates the life of a true American icon. Already a budding entrepreneur at age twelve, Noble grew up in Massachusetts in the aftermath of the Civil War. Dedicated to his religious faith and driven to succeed, he graduated from Harvard with distinction and moved to New York City in the fall of 1886. His first job as a clerk at a small wholesale and retail bookstore ignited his passion for bookselling. Noble's amazing business sense propelled him to continued success, culminating in the establishment of two premier book companies, Barnes & Noble and Noble & Noble. Noble's granddaughter, Betty Noble Turner, pens a touching tribute to her grandfather and artfully captures his legacy. She also offers a historical dissertation on the origin and challenges of Noble's two companies, as well as a loving life story about the man himself.

Whipmaking is the highest refinement of the art of leather braiding. This revised edition introduces another major category of whipsthose made in the Mongol tradition. Braiding details are shown in an extensive selection of photographs that also serve to document the geographic distribution of the whips; their historic use and characteristics are explained in detailed captions. A new chapter describes the evolution of a whip design

that became world famous through its association with Hollywood. The whips used by Indiana Jones were all made by the author, David W. Morgan, and the films prompted an immediate revival of interest in whips for performance and sport use.

Whips and Whipmaking Cornell Maritime Press/Tidewater Publishers

Whips of one sort or another have been around for centuries where the predominant material used in their construction was leather. Not so now, before the handling and use of leather left whip making in the domain of those skilled with such materials but the humble nylon Paracord now enables anyone with the will and determination to make their own robust, strong whip at a fraction of the price of a leather one. If you are such a person, then read within these pages and learn how to make one, or all three of the whips covered in this manual.

Painter's Archaeology: Finding & Reconstructing Decorative Paint· by Stephen G. Heaver The Road Club Spring Drive by Mark Jurd The Goulash Cannon by Kathleen Haak

This is the most comprehensive, and most comprehensively chilling, study of modern torture yet written. Darius Rejali, one of the world's leading experts on torture, takes the reader from the late nineteenth century to the aftermath of Abu Ghraib, from slavery and the electric chair to electro-torture in American inner cities, and from French and British colonial prison cells and the Spanish-American War to the fields of Vietnam, the wars of the Middle East, and the new democracies of Latin America and Europe. As Rejali traces the development and application of one torture technique after another in these settings, he reaches startling conclusions. As the twentieth century progressed, he argues, democracies not only tortured, but set the international pace for torture. Dictatorships may have tortured more, and more indiscriminately, but the United States, Britain, and France pioneered and exported techniques that have become the lingua franca of modern torture: methods that leave no marks. Under the watchful eyes of reporters and human rights activists, low-level authorities in the world's oldest democracies were the first to learn that to scar a victim was to advertise iniquity and invite scandal. Long before the CIA even existed, police and soldiers turned instead to "clean" techniques, such as torture by electricity, ice, water, noise, drugs, and stress positions. As democracy and human rights spread after World War II, so too did these methods. Rejali makes this troubling case in fluid, arresting prose and on the basis of unprecedented research--conducted in multiple languages and on several continents--begun years before most of us had ever heard of Osama bin Laden or Abu Ghraib. The author of a major study of Iranian torture, Rejali also tackles the controversial question of whether torture really works, answering the new apologists for torture point by point. A brave and disturbing book, this is the benchmark against which all future studies of modern torture will be measured.
