

## Wild Babies

Join the Thornberrys as they study and play with the wild baby animals they find on their adventures. This paint-with-water book comes with a paintbrush. Illustrations. Consumable.

The author-illustrator of *The Rabbit Listened* and *Good Dog* captures the incredible bond between parent and child with this exuberant picture book about a carefree young ape who goes barreling through the jungle...and the worried mom who must chase after. As her baby goes on a mad dash through the jungle, it's up to mama to make sure the curious little orangutan doesn't get into too much trouble—like dancing on a bear, bouncing on an elephant, or even pulling on a leopard's tail. But when you have a wild baby, life is full of surprises! With a simple, playful rhyme, this adorable and humorous story illustrates the oftentimes chaotic but always loving bond between parent and child. This board book edition is perfect for little hands. *Wild Baby* is sure to capture the heart of fans of Amy Krouse Rosenthal, Smriti Prasadam-Halls, and anyone with a wild child of their own!

Bobcat and squirrel kittens, batlings, bear cubs, and other wild animal babies learn to survive in their canyon environment.

Unravel this beautiful cloth book and meet Bear and his five friends! Little hands can explore this lovable collection of animal babies with these soft touch and feel cloth books. With each cloth book presented in a sweet presentation box, this is the perfect baby's first soft book! Wee Gallery - This stunning new range of board, cloth, and activity books for pre-schoolers marries fresh design with engaging educational content. The result of a fantastic partnership between Wee Gallery and QEB Publishing, the beautiful illustrations, bold lines, whimsical animals, and repeating patterns are designed to stimulate visual development in young infants. Family-run Wee Gallery have over 10 years experience in graphic design and education, and so these books are guaranteed to excite and engage little minds.

Uses simple text and photographs to capture baby animals as they move about in the wilderness, along with sections that provide brief facts about each animal and a sketch of its footprints.

What do grizzly bear cubs eat? Where do baby raccoons sleep? And how does a baby otter learn to swim? Every baby mammal, from a tiny harvest mouse "pinky" to a fierce lion cub, needs food, shelter, love, and a family. Filled with illustrations of some of the most adorable babies in the kingdom, *Born in the Wild* is an awww-inspiring look at the traits that all baby mammals share and proves that, even though they're born in the wild, they're not so very different from us, after all! This non-fiction picture book by Lita Judge is sure to appeal to budding naturalists and animal lovers.

Cindy Traisi has done it again. She has brought me joy with her storytelling abilities and brought this self-perceived, tattooed tough guy to tears with her accounts of the injured wild animals passing through the Fund for Animals Wildlife Center in Southern California. Cindy's first book, *Because They Matter*, was a constant nightstand companion when my children were younger. My daughters demanded "just one more" of the heart-touching stories of the remarkable job of treating wild animals while they are trying to get by as best they can in a world dominated by human hazards. Some animals in her stories make it, too many don't, but every one of Cindy's accounts of the work done by her husband, Chuck, and their dedicated staff allows readers to appreciate the personalities and endearing qualities of nature's wonders. *Because They Matter, Too* is filled with new heart-lifting and heartbreaking stories of the wild animals that live all around us in Southern California. If you love nature, or just love expert story-telling, *Because They Matter, Too* is a must read. As my daughters put it: just one more Cindy! Better yet... keep them coming, Cindy. Loren Nancarrow, Weathercaster and Environmental Reporter- KGTV San Diego It's time now to go to wherever on Earth the wild babies grow. Join the Cat in the Hat as he introduces beginning readers to baby animals.

Rescuing wild animals in distress requires a unique set of skills, very different from those used in handling domestic animals. The equipment, degree of handling, the type of caging and level of care a wild animal receives can mean the difference between life and death. *Wildlife Search and Rescue* is a comprehensive guide on 'best practices' and suggested standards for response to sick, injured and orphaned wildlife. This valuable resource covers the fundamentals of wildlife rescue, from 'phone to field', including safe and successful capture strategies, handling and restraint techniques and initial aid. *Wildlife Search and Rescue* is a must have for anyone interested in knowing what to do when they are face to face with a wild animal in need, or for anyone involved in animal rescue. While the book focuses on wildlife native to North America, much of the information and many of the techniques are applicable to other species, including domestic dogs and cats. Visit [www.wiley.com/go/dmytryk/wildlifeemergency](http://www.wiley.com/go/dmytryk/wildlifeemergency) to access the figures from the book.

A handbook offering instruction on the housing, feeding, and general care of orphaned wild animal babies and how to prepare them for life in the wild.

In this second book in the *West Coast Wild* series, readers will meet the baby animals born in the pristine wilderness of the Pacific west coast, including land and marine mammals, fish, birds and amphibians.

A collection of stories about a great horned owl, a mother coyote, a bobcat, a one-eyed raven, and a bear cub.

Describes the various parenting techniques of different types of wild animals and provides a close look at the behavior and characteristics of their offspring.

In *Born in the Wild: Animal Babies*, students will learn how animal parents care for, protect and teach their babies. Young readers will love turning the page as they gain valuable information and are prompted to answer questions along the way. Take a fantastic photo journey into the wild with Rourke's *Close-Up on Amazing Animals* for readers in grades K–3. Readers will explore the unique adaptations and relationships that help animals survive in the wild. Repetitive text aids comprehension while real photographs assist in vocabulary development for beginning

readers.

Cute! Cute! Cute! There are few things as cute to young children as other baby mammals—especially the ones featured in this new series! From beautiful, cuddly cats to some of kids' favorite rodents, this series about mammal babies is sure to fly off library shelves. Developed by literacy experts, each 24-page book features controlled text with age-appropriate vocabulary, grammar, and sentence structure for emergent readers. Colorful photos closely aligned to the text and popular, grade-appropriate topics guarantee that kids will gain confidence in reading while learning all about some of the cutest wild baby mammals around.

Skip, splash, sniff and cuddle with the cutest animals in the rough with Wild Baby Animals. Venture out into the world of monkeys, squirrels, bears, foxes and more and as they play, learn, and explore in their natural habitats in Wild Baby Animals. Perfect for 5-7 year olds beginning to read fluently with support, Level 2 titles contain carefully selected photographic images to complement the text, providing strong visual clues to build vocabulary and confidence. Additional information spreads are full of extra fun facts, developing the topics through a range of nonfiction presentation styles, such as diagrams, and activities. Created with parent and teacher feedback in mind and based on the topics kids love, DK's new leveled readers series features eye-catching jackets and fresh nonfiction narrative content. Written and reviewed by literacy experts, each book contains contemporary photography and age appropriate text, plus a glossary and index, making them the perfect choice for helping develop strong reading habits for kids ages 3-11.

Who takes care of hurt wild animals? Veterinarians? Zoos? State wildlife agencies? Only wildlife rehabilitators legally care for wild animals. Every year they heal hundreds of thousands of sick, orphaned, and injured animals and release as many of them back to the wild as possible. Learn about these unsung heroes and the incredible creatures they care for -- from bats and raccoons to whales and loons. Healers of the Wild is also filled with advice for individuals, with instructions on how to be helpful, including a series of Wildlife Fact Sheets from the Fund for Animals. This new edition has been fully revised, including a greatly expanded and updated resource section. Anyone who might ever be tempted to take a baby bird home or to stop to help an injured fox, would benefit from reading this book and learning how to safely help wildlife. Book jacket.

Wild Babies

Bedtime finds wild baby animals asleep in mother's pouch, buried under the sand, and inside a log.

Bestselling author and photographer Traer Scott captures the magic and wonder of a young animal's first weeks of life in this heartwarming collection of photographs. Featuring portraits of more than 30 baby animals, Wild Babies provides a glimpse into the rarely seen world of newborn creatures. From rambunctious little kangaroos and fluffy fox cubs to a wide-eyed elephant seal pup and a tiny painted turtle, these playful images are paired with engaging text that highlights the remarkable moments in wild infants' first days as they learn to eat, walk, swim, and fly. Animal lovers will delight in these close-up shots and fun trivia celebrating the unique personalities of irresistibly cute creatures navigating their way out into the world for the very first time.

Date grid for noting appointments; also includes holidays of major religions, U.S. and Canadian civil holidays, and phases of the moon.

Encourages readers to see baby animals as they live in the wild, and to find the other animals that are hiding in the pictures.

This authoritative reference, the first of its kind, is a necessary addition to the library of any practitioner or behaviorist who sees avian companion animals. Because of their beauty, intelligence, playfulness and ability in mimicry, parrots are the most widely kept companion birds. It is estimated that more than half of the psittacine cases presented to clinicians are the result of behavioral problems-problems inherent to captivity. Bringing together a host of international experts on avian behavior, Manual of Parrot Behavior explores the many facets of psittacine behavior, both normal and abnormal. The book not only provides readers with a solid understanding of the basic principles of psittacine behavior but also offers useful techniques of diagnosis and treatment for specific problems. Covers both normal and abnormal parrot behavior Offers practical techniques on diagnosis and treatment of behavior problems Written by a team of international experts on avian behavior A necessary addition to the library of any practitioner of behaviorist who sees avian companion animals

Boys' Life is the official youth magazine for the Boy Scouts of America. Published since 1911, it contains a proven mix of news, nature, sports, history, fiction, science, comics, and Scouting.

Hours upon hours of coloring and activity fun featuring amazing and adorable wild baby animals! The Animal Planet: Wild Baby Animals Coloring Book is 224 pages packed with baby gorillas, lion cubs, young crocodiles, newly hatched owls, and many more baby animals that are born and grow up in the wild. This book is chock-full of pages to color, mazes, matching, spot the difference, drawing, and other activities, and it includes dozens of fascinating facts, too.

Whether we find them adorable or bizarre, newborn wild animals never fail to intrigue and enchant.

Young readers learn about the characteristics, behavior, diet, and life cycle of elephants as they follow Liza, a real-life baby elephant in the African desert. Wild babies play hide-and-seek just like human children do. The difference is the game is higher stakes for baby animals. Those that can't stay hidden don't survive. Hungry predators seek them for dinner! The cuties in this book share their best hiding strategies with kids.
