An eye-opening firsthand exploration of why Asian students are outpacing their American counterparts, and how to help our children excel in today's competitive

world. When Teru Clavel had young children, the oldest barely two, she watched as her friends and fellow parents vied to secure a spot in the right New York City preschools. Following a gut feeling that a truly world-class education involves more than the privilege and ennui of elite private schools, Teru and her family moved to Asia, embarking on a ten-year-long journey through the public schools of Hong Kong, Shanghai, and Tokyo. During this time, Teru discovered firsthand why students in China and Japan are far outpacing their American counterparts. In Hong Kong, her children's school was nicknamed The Prison for its foreboding, austere facilities, yet her three-year-old loved his teachers and his nightly homework. In Shanghai, in a school without flush toilets, the students were kept late not out of punishment but to master the day's lesson. In Tokyo, her children and their classmates were responsible for school chores, like preparing and serving school lunches—lunches that featured grilled fish, stewed vegetables, and miso soup, not hot dogs and french fries. These schools were low-tech and bare-bones, with teachers who demanded obedience and order. Yet Teru was shocked to discover that her children thrived in these foreign and academically competitive cultures; they learned to be independent, self-confident, and resilient, and, above all, they developed a deep and abiding love of learning. The true culture shock came when Teru returned to the States and found their

top-rated California school woefully ill-prepared to challenge her children. Her kids were passing, but the schools were failing them. In this revelatory book, Teru shares what she learned during her decade in Asia, providing practical tips and takeaways to bring the best of Asia's education and parenting philosophies into American homes and schools. Written with warmth and humor, *World Class* is an insightful guide to set your children on a path towards lifelong learning and success.

The *One Percent Solution* is a tough no holds barred look at the world of professional high stakes sales. This book was written for those in sales with the drive and ambition to sell their way into the top One Percent income bracket. The *One Percent Solution* will give you a simple yet effective framework to build a winning repeatable process.

- Explore the building and integrating of Vision Statements into your new limited planning processes.
- Discover the Magic Seven Decisive Sales Activities that result in consistent winning performances and more effective use of your time.
- Integrate the Sales Process Curve into every activity to check for proper alignment. This will redefine how you look at every sales opportunity. You'll know when to close, and more importantly, be ready to close. Whether you're new to sales, function as a pre or post sales team member, or are a non-traditional player, there are answers for your most

pressing questions. There's even a chapter For Women Only. The One Percent Solution is a salesman's tale that will make you laugh, shout, and most importantly remember the course of action required to become a One Percenter for life!

This student text provides coverage of all the underpinning knowledge for the compulsory units. It includes lots of activities for reinforcing students' learning as well as for building their portfolio, and integrates key skills learning as well as identifying opportunities to bring in citizenship.

NCHRP Synthesis 326: Strategic Planning and Decision Making in State Departments of Transportation examines state and provincial transportation departments' experience with strategic planning and synthesizes current approaches to linking strategic planning with other decision-making processes, including operational and tactical planning, resource allocation, performance management, and performance measurement.

What is the progress in hydraulic research? What are the new methods used in modeling of transport of momentum, matter and heat in both open and conduit channels? What new experimental methods, instruments, measurement techniques, and data analysis routines are used in top class laboratory and field hydro-environment studies? How to link novel findings in fundamental hydraulics

with the investigations of environmental issues? The consecutive 32nd International School of Hydraulics that took place in Łódź, Poland brought together eminent modelers, theoreticians and experimentalists as well as beginners in the field of hydraulics to consider these and other questions about the recent advances in hydraulic research all over the world. This volume reports key findings of the scientists that took part in the meeting. Both state of the art papers as well as detailed reports from various recent investigations are included in the book

Manufacturing managers are still focused on the short-term tactical issues related to their business. Strategic issues tend to receive less attention. However, manufacturing can play an important strategic role. Learning From World Class Manufacturers 2012 helps managers consider the strategic roles their operations can play and provides guidance as to what actions can be taken.
