From Expeditionary Learning Schools comes a proven approach to student assessment Leaders of Their Own Learning offers a new way of thinking about assessment based on the celebrated work of Expeditionary Learning Schools across the country. Student–Engaged

Assessment is not a single practice but an approach to teaching and learning that equips and compels students to understand goals for their learning and growth, track their progress toward those goals, and take responsibility for reaching them. This requires a set of interrelated strategies and structures and a whole–school culture in which students are given the respect and responsibility

to be meaningfully engaged in their own learning.

Includes everything teachers and school leaders need to implement a successful Student–Engaged Assessment system in their schools Outlines the practices that will engage students in making academic progress, improve achievement, and involve families and communities in the life of the school Describes each of the book’s eight key practices, gives advice on how to begin, and explains what teachers and school leaders need to put into practice in their own classrooms Ron Berger is Chief Program Officer for Expeditionary Learning and former public school teacher Leaders of Their Own Learning shows educators how to ignite the capacity of students to take responsibility for their own learning, meet Common Core and state standards, and reach higher levels of achievement. DVD and other supplementary materials are not included as part of the e–book file, but are available for download after purchase.

Explore the world with students in grades 7–8 using

Discovering the World of Geography. This 128-page book helps students use geographical knowledge and skills to interpret and analyze data. This text covers topics including population, political landscapes, climate, understanding developed and underdeveloped countries, and regions of conflict. The book presents information through activities such as maps, charts, diagrams, and graphs that support National Geography Standards. It also includes assessments and answer keys.

Debates in Geography Education encourages student and practising teachers to engage with and reflect on key issues, concepts and debates in their specialist subject teaching. It aims to enable geography teachers to reach their own informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Expert editors and contributors provide a balance of experience and perspectives and offer international, historical and policy contexts, evidence informed classroom debates and a glimpse of the subject's expanding horizons. Debates considered include: what constitutes knowledge in geography? constructing the curriculum; how do we link assessment to making progress in geography? the contribution of fieldwork and outdoor experiences; technology and media; how we use Geographical Information; how geography contributes to 'global learning'; sustainable development and geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, reflective questions and a range of specific web-based resources, will help support shape your own

research and writing. Debates in Geography Education is a source of knowledge, experience and debate that will be essential reading for all students studying at Masters level, practising teachers who want to develop a better understanding of the issues that shape their practice, and Education Studies students considering in-depth subject teaching.

'For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians. Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq, Iran and Afghanistan on a map.' Prof. Dennis Hayes – Oxford Brookes University, UK 'A prescient and critical analysis of the changing face of geography teaching. This book deserves to be widely read and debated. Alex Standish's book puts current trends in geography teaching in historical and critical context. It comprises a forthright and timely defence of geographical education for its own sake.' Dr Jim Butcher, FRSA, Department of Sport Science, Tourism and Leisure, Canterbury Christ Church University. Since the early 1990s, educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools, from a subject which encourages students to explore spatial concepts, ideas and skills, to a more ethics based subject concerned with the promotion of environmentalism, cultural diversity and social justice. In

this book the new approach is critically examined, within a historical and ideological context, addressing a number of fundamental questions: Should geography be used as a tool for the delivery of citizenship ideals? How does this affect the intellectual and moral value of geographical education for young people? If the state and teachers are taking more responsibility for the values, attitudes and emotional responses of students, how will they learn to develop these qualities for themselves? If global perspectives shift the focus of education from learning about the outside world to learning about the self, what is its vision of social progress and conception of social change? This book advocates a return to liberal models of education, arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject, and the freedom of young people to shape the world in which they live. A vital resource for teachers and student teachers alike, *Global Perspectives in the Geography Curriculum* makes a significant contribution to the growing debate about the future direction of the discipline itself.

Help students in grades 5 and up learn about themselves with *Developing Life Skills!* This 96-page informative text is full of engaging activities and helpful life tips, including understanding oneself, setting goals, relationships, consumer skills and money management, nutrition and fitness, food preparation, grooming, manners, and careers. The book includes reproducibles and a complete answer key.

Geography textbook examines physical and human geography by continent and world regions. Annotated teacher's edition.
