The only authorized Lab Manual for the Cisco Networking Academy CCNP Version 7 TSHOOT course A CCNP certification equips students with the knowledge and skills needed to plan, implement, secure, maintain, and troubleshoot converged enterprise networks. The CCNP certification requires candidates to pass three 120-minute exams ROUTE 300-101, SWITCH 300-115, TSHOOT 300-135 that validate the key competencies of network engineers. The Cisco Networking Academy curriculum consists of three experience-oriented courses that employ industry-relevant instructional approaches to prepare students for professional-level jobs: CCNP ROUTE: Implementing IP Routing, CCNP SWITCH: Implementing IP Switching, and CCNP TSHOOT: Troubleshooting and Maintaining IP Networks. CCNP TSHOOT: Troubleshooting and Maintaining Cisco IP Networks This course teaches students how to monitor and maintain complex, enterprise routed and switched IP networks. Skills learned include the planning and execution of regular network maintenance, as well as support and troubleshooting using technology-based processes and best practices, based on systematic and industry-recognized approaches. Extensive labs emphasize hands-on learning and practice to reinforce troubleshooting

[Siren Everlasting Classic ManLove: Erotic Alternative Paranormal Romance, M/M, vampires, bondage, HEA] The humans are tired of living in fear of the vampires. Hawke West, a skilled assassin, is sent on a mission to kidnap any important member of a rich vampire house in the hopes of finally starting an open war instead of allowing the vampires to pick them off. The problem is that the vampire he kidnaps is the very one who freed him from slavery as a child, and now he finds himself not only protecting him from his vampire-hating village, but also falling for him. William Delany was running from an arranged marriage when Hawke came back into his life. Though their former relationship was of a master and servant, they were still children together, and he hasn't forgotten the man,

A "street smart" look at incident management in all its permutations Incident Management Systems (IMS) provide the means by which to coordinate the efforts of individual agencies in order to stabilize an incident and protect life, property, and the environment. Born from the FireScope project of the late 1960s, which was developed in response to the major wildfires that regularly plagued Southern California, these systems have evolved with many similarities and certain fundamental differences. Emergency Incident Management Systems: Fundamentals and Applications contrasts the major forms of Incident Management/Incident Command Systems. The author illuminates these differences and offers a fresh perspective on the concepts on which these systems are founded in order to make them more accessible and user-friendly. Without suggesting major changes in the systems, he bridges the gap between their theoretical and academic foundations and their real-world applications, and makes them more applicable to the professional's daily needs. Timely features of the book include: * An "in the field" point of view * Coverage of incidents of mass

destruction * Filled-out sample forms designed to aid professionals in completing reports In post-9/11 America, where incident management has become a national priority-one that must be easily understood and applicable across all emergency systems-this book provides a useful tool for helping today's emergency workers be more informed and more prepared than ever.

This model course is intended to provide the knowledge, skill and understanding of ECDIS and electronic charts to the thorough extent needed to safely navigate vessels whose primary means of navigation is ECDIS. The course emphasizes both the application and learning of ECDIS in a variety of underway contexts. The course is designed to meet the STCW requirements in the use of ECDIS, as revised by the 2010 Manila Amendments. It should be understood that this is a generic course which requires a structured and complementary on-board ship specific ECDIS familiarization for each shipboard ECDIS system on which the navigating officer serves. Those who successfully complete the course should be able to demonstrate sufficient knowledge to undertake the duties assigned under the SSP.

explores the incredible scope and character of Letizia Battaglia's work. With over one hundred photographs including previously unpublished works, the collection captures an intimate insight into the ambivalence of Italian life, from harrowing images of the Mafia to beautiful portraits of the women and children of Palermo. In a recent interview with *The Daily Beast*, Battaglia explained that through the duality of her work, she aimed to denounce corruption and to exalt beauty. Contributors include the Dean of the International Centre of Photography in New York, Fred Ritchin; curator, Paolo Falcone; journalist, Attilio Bolzoni; photography critic, Giovanna Calvenzi; the Mayor of Palermo, Leoluca Orlando; Palermo's Anti-Mafia Magistrate, Franca Imbergamo; the President of the MAXXI Museum, Giovanna Melandri and the Museum's Director of Architecture, Margherita Guccione."

In undergraduate classes on communications it is crucial for the students to acquire a deep and thorough understanding of the system principles, methods of analysis, and design tradeoffs. *Communication Systems: Fundamentals and Design Methods* provides a rigorous mathematical treatment of modulations, covering well-established analog techniques, such as AM and FM, and the more advanced digital formats, such as QAM and CDMA. Using a probabilistic approach, the analytical evaluation of system

performance gives rise to the key concept of 'link budget', showing the role of transmit power, channel bandwidth and receiver noise level. Different systems are then compared on the basis of the above parameters. Key features: Comprehensively covers the basics of communication systems, without overemphasizing new technologies which require a much deeper background Presents a clearly outlined course track, derived from years of teaching experience Enriched by discussions and examples of implementation, and by a wide variety of almost 300 problems, with solutions provided in the companion website Includes coverage of deterministic and random signals, as well as transmission media and devices, passband signals, linear, amplitude, angular, digital and binary modulation The book is a perfect textbook for undergraduate students on electrical engineering, computer science and telecommunications courses, as well as graduate students, engineers and operators involved in the design and deployment of communication networks.

Nanobiotechnology Applications in Plant Protection: Volume 2 continues the important and timely discussion of nanotechnology applications in plant protection and pathology, filling a gap in the literature for nano applications in crop protection. Nanobiopesticides and nanobioformulations are examined in detail and presented as powerful alternatives for eco-friendly management of plant pathogens and nematodes. Leading scholars discuss the applications of nanobiomaterials as antimicrobials, plant growth enhancers and plant nutrition management, as well as nanodiagnostic tools in phytopathology and magnetic and supramagnetic nanostructure applications for plant protection. This second volume includes exciting new content on the roles of biologically synthesized nanoparticles in seed germination and zinc-based nanostructures in protecting against toxigenic fungi. Also included is new research in phytotoxicity, nano-scale fertilizers and nanomaterial applications in nematology and discussions on Botrytis grey mold and nanobiocontrol. This book also explores the potential effects on the environment,

ecosystems and consumers and addresses the implications of intellectual property for nanobiopesticides. Further discussed are nanotoxicity effects on the plant ecosystem and nano-applications for the detection, degradation and removal of pesticides.

Documentary Storytelling has reached filmmakers and filmgoers worldwide with its unique focus on the key ingredient for success in the growing global documentary marketplace: storytelling. This practical guide reveals how today's top filmmakers bring the tools of narrative cinema to the world of nonfiction film and video without sacrificing the rigor and truthfulness that give documentaries their power. The book offers practical advice for producers, directors, editors, cinematographers, writers and others seeking to make ethical and effective films that merge the strengths of visual and aural media with the power of narrative storytelling. In this new, updated edition, Emmy Award-winning author Sheila Curran Bernard offers: New strategies for analyzing documentary work New conversations with filmmakers including Stanley Nelson (The Black Panthers), Kazuhiro Soda (Mental), Orlando von Einsiedel (Virunga), and Cara Mertes (JustFilms) Discussions previously held with Susan Kim (Imaginary Witness), Deborah Scranton (The War Tapes), Alex Gibney (Taxi to the Dark Side), and James Marsh (Man on Wire).

This collective work identifies the latest developments in the field of the automatic processing and analysis of digital color images. For researchers and students, it represents a critical state of the art on the scientific issues raised by the various steps constituting the chain of color image processing. It covers a wide range of topics related to computational color imaging, including color filtering and segmentation, color texture characterization, color invariant for object recognition, color and motion analysis, as well as color image and video indexing and retrieval.

Contents 1. Color Representation and Processing in Polar Color Spaces, Jesús Angulo, Sébastien Lefèvre and Olivier Lezoray. 2. Adaptive Median Color Filtering, Frédérique Robert-Inacio and Eric Dinet. 3. Anisotropic Diffusion PDEs

Politicians rely on Twitter, Facebook and YouTube to exercise political power. Citizens around the world also use these tools to vent political frustrations, join political groups and organize revolutions. Political activists blog to promote candidates, solicit and coordinate financial contributions and provide opportunities for volunteers. iPolitics describes the ways in which new media innovations change how politicians and citizens engage the political arena. Among other things, contributors to this volume analyze whether the public's political knowledge has increased or decreased in the new media era, the role television still plays in the information universe, the effect bloggers have had on

the debate and outcome of healthcare reform, and the manner in which political leaders should navigate the new media environment. While the majority of contributors examine new media and politics in the United States, the volume also provides a unique comparative perspective on this relationship using cases from abroad.

Contemporary processes of globalization have had a profound impact on cultural production and dissemination both intra- and cross-culturally. The dissemination of cultures on a global scale has led to multiple and complex effects, among them the formation of radical new modes of cultural interaction, transcultural flows, and hybridized knowledges, forms not easily understandable in terms of traditional models of discrete national or ethnic cultures/subcultures. *Transcultural Experiments* develops new scholarly and creative strategies out of this intersection of cultural traditions, specifically in Russia and the United States. Ellen E. Berry and Mikhail N. Epstein define and enact a transcultural method as an alternative to the legacies of cultural divisions and hegemony that have dominated both Western and Second Worlds. The book introduces a system of original concepts and genres of writing that will help in mapping twenty-first century global culture: 'transculture' (vs. multiculturalism), 'interference' (vs. difference), 'potentiation' (vs. deconstruction), ethics of imagination, and

collective improvisation. The authors make a revolutionary argument in cultural studies that will be of profound interest to anyone concerned with finding new modes of intercultural communication between the former First and Second Worlds.

This study examines the relationship between multinationality and the performance of Japanese manufacturing companies during the period 1999–2008 by using geographic segment information. Despite the enormous interest in and importance given to multinationality from the academic and business worlds, prior findings about the multinationality–performance relationship are conflicting and inconsistent. The overall results of the present study show that multinationality has a positive impact both on accounting performance and on market-based performance. In additional tests, Japanese electric and electronic equipment companies' reliance on the Asian market was found to have a negative impact on profitability and no significant impact on firm value, whereas reliance on other foreign markets such as the Americas and the EU had a positive impact on profitability and firm value. The multinationality–performance relationship cannot be generalized and varies among geographic regions. This book contributes to both the multinationality–performance literature and the geographic segment reporting

Pop City examines the use of Korean television dramas and K-pop music to promote urban and rural places in South Korea. Building on the phenomenon of Korean pop culture, Youjeong Oh argues that pop culture-featured place selling mediates two separate domains: political decentralization and the globalization of Korean popular culture. The local election system introduced in the mid 90s has stimulated strong desires among city mayors and county and district governors to develop and promote their areas. Riding on the Korean Wave—the overseas popularity of Korean entertainment, also called Hallyu—Korean cities have actively used K-dramas and K-pop idols in advertisements designed to attract foreign tourists to their regions. Hallyu, meanwhile, has turned the Korean entertainment industry into a speculative field into which numerous players venture by attracting

cities as sponsors. By analyzing the process of culture-featured place marketing, Pop City shows that urban spaces are produced and sold just like TV dramas and pop idols by promoting spectacular images rather than substantial physical and cultural qualities. Popular culture-associated urban promotion also uses the emotional engagement of its users in advertising urban space, just as pop culture draws on fans' and audiences' affective commitments to sell its products. Oh demonstrates how the speculative, image-based, and consumer-exploitive nature of popular culture shapes the commodification of urban space and ultimately argues that pop culture-mediated place promotion entails the domination of urban space by capital in more sophisticated and fetishized ways.

Sahaptin, or Ichishkin Snwit (literally, "this language"), is a Plateau Penutian language spoken in south-central Washington and northern Oregon. This dictionary documents the dialect of Sahaptin that is spoken by the Yakama people. *Ichishkin Snwit Yakama / Yakima Sahaptin Dictionary* is the first modern published dictionary of any Sahaptin dialect. The dictionary is divided into three sections: a Sahaptin-English section; an English-Sahaptin section; and a section listing roots used in the formation of Sahaptin words. The Sahaptin-English section contains approximately 3,500 headwords, over 4,500 example sentences, more than 100 images, and over 9,200 sound files available online. Copious cross-references alert readers to related words elsewhere in the Sahaptin-English section. The English-Sahaptin and roots sections serve as indices to the Sahaptin-English section. In the English-Sahaptin section, users can look up the Sahaptin equivalents of English words. In the root section, users can see words from different parts of the dictionary that share the same component of meaning. The dictionary also contains essays by noted Plateau

Poetry. "Robert Gibbons (Salem, MA, 1946) is one of the great secrets of contemporary US poetry. Gibbons says that ANIMATED LANDSCAPE is the collection he was destined to write. One hopes too that it's the collection destined to reveal him to a wider circle of readers. It places him firmly in the tradition of modern US poetry, following Olson, Creeley and the Objectivists, and alongside some of the best contemporary Anglophone poets, like Jean

Sprackland, and great poets writing today in Spanish, like Cristian Aliaga and Sergio Raimondi." —Ben Bollig, Professor of Spanish American Literature, Oxford University "Robert Gibbons' new collection of poems lays bare the vast expanse of human history as a widening landscape of the most august imagination. Gibbons, a born maximalist, carries Charles Olson's excavations into the present tense, but does so in his own measure of music, personal and specific, yet universal and inclusive.
