NHM Organising and Planning Guide is an excellent teacher resource. It gives you all the support you need to implement the programme and plan your lessons. Achievement goal theory has emerged as one of the preeminent approaches to motivation. Goals, Goal Structures, and Patterns of Adaptive Learning presents the findings of a large scale, longitudinal study that use goal theory as the lens through which to examine the relation among achievement goals, the learning context, and students' and teachers' patterns of cognition, affect, and behavior. These results are integrated within the larger literature on goal theory, providing an overview of the research that has been conducted, as well as suggestions that goal theory researchers might want to consider. Written by scholars who are well-known in the field, this book: *provides a comprehensive summary of research related to achievement goal theory--one of the preeminent approaches to motivation today; *presents a detailed overview of research conducted in conjunction with the Patterns of Adaptive Learning Study--a decade-long multi-faceted study employing both quantitative and qualitative methods. A description

of the development, reliability, and validity of the Patterns of Adaptive Learning Scales is included. These scales are being used by many researchers using achievement goal theory in this country and internationally; *includes important information about the relevancy of achievement goal theory for an understanding of avoidance behaviors in schools; *describes the relevancy of achievement goal theory for children who are disaffected from school and schooling; and *points to the gaps in research on achievement goal theory, and provides guidance for future research in the field.

This report offers an initial overview of the available information regarding the circumstances, nature and outcomes of the education of schoolchildren during the first wave of COVID-19 lockdowns of March-April 2020. Its purpose is primarily descriptive: it presents information from high quality quantitative studies on the experience of learning during this period in order to ground the examination and discussion of these issues in empirical examples.

This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1988.

Each number is the catalogue of a specific school or college of the University.

Are you overwhelmed by the amount of paperwork that SEN generates in your school? Would you like to spend more time actually improving the quality of teaching and learning for pupils with SEN or disabilities? If so, this is an essential book for you. Containing practical strategies for reducing the number of individual education plans and review meetings, 'Beating Bureaucracy' will help you to use existing systems for target setting, recording and planning – personalised systems that are used for all children as part of everyday teaching practices. The book showcases the work of four schools that have successfully developed ways of planning provision, working with parents, and supporting staff development. Ready-to-use proforma in the book are also available online, and include: a model policy to give to Ofsted to explain why the school does not use IEPs an information sheet for parents curriculum planning formats strategy sheets that can be highlighted and given to class and subject teachers proformas for commonly used interventions that describe the intervention, its target group, its entry and exit criteria, and monitoring and evaluation arrangements. This invaluable resource will help you (in the words of one SENCO) 'get your life back'. Adopting the new and more effective ways of working presented here will reduce the bureaucratic burden on your school – whilst at the same time improving the impact of your SEN provision on children's learning and well-being. This is the Year 3, Autumn Test, Pack of 10 Progress in Understanding Mathematics (PUMA) is a standardised, curriculum-linked suite of tests written to the NEW mathematics curriculum. It is designed for whole-class use and for pupils of all abilities. Uniquely, the series offers three tests for each primary school year, to monitor pupils' progress term by term, and provides reliable, predictive and diagnostic information. Or you can pick the test(s) you want, to give you

maximum flexibility to assess just at the beginning, middle or end of each year, if you prefer. - simple and quick to administer and mark - taking less than an hour to assess a whole class - standardised scores, curriculum levels and maths ages, plus a diagnostic profile across the separate strands of mathematics, will give you a wealth of information and make you more effective in managing learning in your classroom - a decimalised PUMa scale score, based on the termly performance data of over 10,000 pupils nationally, lets you monitor small increments of progress and gives a reliable basis for predicting pupil progress and setting realistic targets - a separate test is available for autumn, spring and summer terms for Years 1-6 - attractively presented, to engage the children (the KS1 tests are printed in full colour) To view samples of all Autumn tests please visit: www.hoddereducation.co.uk/puma Free teacher guidance is available for the Autumn tests - a web link to download the guidance document will be sent with your Autumn Test order.

Dated December 2005

The Numeracy Extras series provides a range of materials developed to be used alongside existing resources as extras to support maths teaching. The books in the Maths Express range are designed to stretch the more able pupil in a whole class context, and feature challenging exercises.

Choose word problems relevant to your teaching from a selection of over 300 thought-provoking problems. Word problems is structured so that you can select problems relevant to your work for any week of the year.

* The Heinemann Mathematics scheme has been developed by the authors of the primary course SPMG, with the aim of building on established strengths to provide a structured

development of children's mathematical knowledge and skills within the revised curricula. This volume explores the influence of students' background on educational outcomes, ways of contextualising school performance, and current issues and developments in school effectiveness research. Also investigated is how the research contributes to understanding of school and classroom processes.

Word Problems Pupil Book offers over 300 thought-provoking problems.

New Heinemann Mathematics Heinemann

This book is for teachers who are looking for interesting and practical ways to incorporate ICT into their daily lesson plans. It shows how ICT can be used as a tool for mathematics, but more importantly how its proper use can enhance the mathematics being taught. The authors cover all current aspects of ICT and mathematics, including: databases spreadsheets logo and the use of floor turtles and control technology handling of resources including interactive whiteboards management of ICT within the classroom how ICT can be used to present mathematical topics and links to other areas of the curriculum. With plenty of suggestions on how to use the software and hardware described in the book, this is a useful resource for all primary teachers, particularly subject co-ordinators for ICT and mathematics. It will also be of interest to students on PGCE and Initial Teacher Training courses.
